Santos H. Kreimann
Chief Executive Officer

"Once a course is set, reaching our destination still depends on adapting to changing conditions and making corrections en route. Achieving positive market returns was a challenge in 2022, with a nearly flat return for the pension fund. Regardless, the fund exceeded the policy benchmark for the year by nearly 5 percent, a testament to our diligent management, carefully diversified asset allocation structure, and long-term focus."

Executive Team

The executive team comprises six executive officers responsible for carrying out the strategic goals set by the Boards of Retirement and Investments.

LUIS A. LUGO
Deputy Chief Executive Officer

JONATHAN GRABEL
Chief Investment Officer

LAURA GUGLIELMO
Assistant Executive Officer

STEVEN P. RICE
Chief Counsel

JJ POPOWICH
Assistant Executive Officer

LACERA Los Angeles County Employees Retirement Association
300 N. Lake Ave., Pasadena, CA 91101 / PO Box 7060, Pasadena, CA 91109-7060 / www.lacera.com / 626/564-6000·800/786-6464

December 16, 2022

Los Angeles County Employees Retirement Association
Board of Retirement/Board of Investments
300 N. Lake Avenue, Suite 820
Pasadena, CA 91101

I am pleased to present the Los Angeles County Employees Retirement Association (LACERA) Annual Comprehensive Financial Report (ACFR) for the fiscal year ended June 30, 2022. This report is intended to provide a detailed review of the association's financial, actuarial, and investment status. LACERA has the duty and authority to administer defined retirement plan benefits for the employees of Los Angeles County and outside districts. It is our mission to produce, protect, and provide the promised benefits to our members and their beneficiaries. In the course of fulfilling that mission, we provide comprehensive customer service to over 187,000 members, which includes over 71,000 benefit recipients.

Providing Direction

LACERA's work has always been dedicated to ensuring the stability of our members' financial futures and benefits while finding the most effective path to do so. Progress rarely, if ever, occurs in a straight line, so once a course is set, reaching our destination still depends on adapting to changing conditions and making corrections en route, with our mission serving as our true north.

In 2022, LACERA embarked on its first strategic planning process in five years. The process had been delayed due to changes in executive leadership, vacancies in the executive team, and the organization's focus on transforming operations in response to the COVID-19 pandemic in 2020 and 2021. With the filling of two key positions on the executive team in the second half of 2021, LACERA undertook a broadly inclusive approach to strategic planning at the start of 2022, fostering active participation from all levels of the organization and getting input from member stakeholders. The result is an ambitious set of strategic goals, objectives, and action plans focused on raising the bar of member service and engagement as well as internal efficacy, accountability, and financial sustainability. The new strategic plan will provide direction for LACERA for the next five years and is pending Board review and approval as of the end of 2022.

Achieving positive market returns was a challenge in 2022, with the continued effects of the pandemic, war in Ukraine, and supply chain issues hampering economic growth, exacerbating inflation, and causing volatility in the markets. Although LACERA's fiscal year pension fund time-weighted return was nearly flat at 0.1 percent, that amount exceeded the policy benchmark by nearly 5 percent, a testament to our carefully diversified asset allocation structure. Likewise, annualized returns for the three-, five-, seven-, and 10-year periods all exceeded their benchmarks, with the fund ahead of its actuarial expected return of 7.0 percent* across all periods.

The OPEB Master Trust ("OPEB Trust") equaled its policy benchmark of -15.2 percent for the fiscal year but did not meet the actuarial expected return of 6.0 percent* for any time period. However, it has still exceeded its policy benchmark return for the three- and five-year periods, underscoring the benefit of its long-term investment structure. The OPEB Trust differs from the pension fund in that it is predominantly passively managed with higher concentrations in the public equity markets. In 2023, the OPEB Trust asset allocation will look more like LACERA's pension fund, with the introduction of active management and the goal of increasing diversification and enhancing risk-adjusted returns.

*Actual expected return for the period ending June 30, 2022.

LACERA and Its Services

On January 1, 1938, LACERA was established to provide retirement allowances and other benefits to the general and safety members employed by Los Angeles County. Subsequently, LACERA expanded its membership program to include four other outside districts:

- Little Lake Cemetery District
- Local Agency Formation Commission for the County of Los Angeles
- Los Angeles County Office of Education
- South Coast Air Quality Management District

Since its inception, LACERA has been governed by the California Constitution, the County Employees Retirement Law of 1937 (CERL), and the regulations, procedures, and policies adopted by LACERA's Boards of Retirement and Investments. The Los Angeles County Board of Supervisors may also adopt resolutions, as permitted by the CERL, which may affect benefits of LACERA members. On September 12, 2012, California Governor Jerry Brown signed the Public Employees' Pension Reform Act of 2013 (PEPRA) into law. As of January 1, 2013, LACERA is governed by CERL and PEPRA. Both laws are contained in the California Government Code.

The Board of Retirement is responsible for the general management of LACERA. The Board of Investments is responsible for determining LACERA's investment objectives, strategies, and policies. Both Boards appoint a Chief Executive Officer, to whom is delegated the responsibility of overseeing the day-to-day management of LACERA and developing its annual administrative budget. Adoption of the budget is subject to approval by both Boards.

Financial Information

Internal Control

The financial statement audit performed by Plante & Moran, PLLC states that LACERA's financial statements, which are prepared by management, are presented in conformity with Generally Accepted Accounting Principles and are free of material misstatement. Management acknowledges it is responsible for the entire contents of this ACFR. In the course of sustaining a rigorous and comprehensive control environment throughout its operations, LACERA practices stringent risk management activities and annually performs a detailed, organization-wide risk assessment in which control objectives and their related processes are reviewed.

Maintaining appropriate internal controls is the responsibility of management; however, management recognizes no control or combination of controls can entirely free an organization from all error or misstatement. At their best, controls provide reasonable assurance such failings do not occur. The concept of reasonable assurance recognizes that the cost of a control should not exceed benefits likely derived; the valuation of costs and benefits requires estimates and judgments by management.

LACERA management is provided such assurance through the ongoing efforts of its Internal Audit and Quality Assurance Divisions and its Boards. The Executive Office is confident that LACERA's established controls and the interactions of those controls detect all significant occurrences and prevent noteworthy inaccuracies.

Analysis

An overview of LACERA's fiscal operations is presented in the Management's Discussion and Analysis (MD&A) preceding the financial statements. This transmittal letter, when taken into consideration with the MD&A, provides an enhanced picture of the organization's operational activities. LACERA's management is responsible for the accuracy, completeness, fair presentation of information, and all disclosures within this report.

Investment Activities

The Board of Investments adopted an Investment Policy Statement that provides a framework for the management of LACERA's investment portfolio. This statement establishes LACERA's investment policies and objectives and defines the principal duties of the Board of Investments, investment staff, investment managers, master custodian, and consultants.

A pension fund's strategic asset allocation policy, implemented in a consistent and disciplined manner, is generally recognized to have the most impact on a fund's investment performance. The asset allocation process determines a fund's optimal long-term asset class mix (target allocation), which is expected to achieve a specific set of investment objectives. LACERA's strategic asset allocation targets are long-term by design because of the Pension Plan's long-term investment horizon and the illiquidity of certain asset types.

The total Pension Plan returned 0.1 percent (net of fees), which was 470 basis points above its policy benchmark, which returned (4.6) percent. Over the five-year period ended June 30, 2022, the total Pension Plan's annualized return was 8.1 percent (net of fees).

Luis A. Lugo
Deputy Chief Executive Officer

Actuarial Funding Status

Pursuant to provisions in the CERL, LACERA engages an independent actuarial firm to perform annual actuarial valuations. A system investigation of experience (also referred to as the experience study) is performed every three years. The economic and demographic actuarial assumptions are updated at the time each experience study is performed. These triennial experience studies serve as the basis for changes in member contribution rates necessary to properly fund the system. LACERA also hires an independent actuarial firm to audit the results of each experience study. The latest experience study was conducted as of June 30, 2019.

LACERA is funded by member and employer contributions and investment earnings on those contributions. Normal member contributions are those required to fund a specific annuity at a specified age. Member contribution rates for members who entered LACERA membership prior to January 1, 2013, vary according to the member's plan and age at first membership. The CERL also requires members to pay half the contributions required to fund the cost-of-living benefit, which is affected by changes in both economic and demographic assumptions.

Liabilities not funded through member contributions are the responsibility of the employer. Changes in any of the economic and demographic assumptions impact employer contribution rates. The employer is responsible for contributing to cover the cost of benefits expected to be accrued in the future and half of the cost-of-living benefit. These are called normal cost contributions. The employer is responsible also for making additional contributions to eliminate any shortfalls in funding covering liabilities that have accrued in the past, which is known as the Unfunded Actuarial Accrued Liability (UAAL).

Provisions of the Public Employees' Pension Reform Act of 2013 (PEPRA) require equal sharing of normal costs between employers and employees. In January 2013, LACERA established two new retirement plans — General Plan G and Safety Plan C — for members with membership dates on or after January 1, 2013. Contributions for these plans are based on a single flat-rate percentage and are structured in accordance with the required 50/50 cost-sharing. A member's age at first membership is not considered.

In January 2020, the Board of Investments adopted a decrease in the investment return assumption to 7.0 percent; a decrease in the amortization periods to not more than 22 years for existing UAAL layers and 20 years for new UAAL layers; an increase in life expectancies; and kept the wage growth assumption and CPI assumption at 3.25 percent and 2.75 percent, respectively. All assumption changes were adopted effective June 30, 2019, although the impact on the employer contribution rate will be phased in over three years. These assumptions will be subject to change when the next experience study is conducted for June 30, 2022.

The June 30, 2021 valuation determined the funded ratio to be 79.3 percent and recognized an Unfunded Actuarial Accrued Liability (UAAL) of $17.0 billion. The Los Angeles County contribution rate was therefore set equal to 13.6 percent of payroll for the amortization of the UAAL, plus the normal cost rate of 10.9 percent, for a calculated contribution rate of 24.5 percent of payroll which includes the phase-in of the final portion of 2019 assumption changes.

Summary of Accomplishments for Fiscal Year 2021-2022

In 2022, LACERA underwent an ambitious strategic planning process, engaging with all stakeholders and taking a deep dive into its strategic goals and priorities, facilitated by a professional consultant. An advisory team of board trustees, executive officers, and key staff members was established to keep the process, timeline, activities, and milestones on track, and by early fall, the stages of discovery, fact-finding, and engagement had been completed. The engagement stage included an extensive print and online member survey that ran from July to August and online staff survey in August, as well as action planning teams made up of staff from all levels and specialty areas. The advisory team prepared the strategic priorities and objectives in November 2022. As of the end of 2022, the final draft of the strategic plan was being prepared, with Board approval and adoption expected in early 2023.

After two years of operating with a mostly remote work force, LACERA welcomed its staff members back to the Pasadena office in May 2022, utilizing a hybrid schedule of alternating remote and onsite workdays. This was made possible by the hard work and extensive planning of the Business Continuity Team, which oversaw completion of office modifications and established onsite safety protocols, among other duties. Due to a surge in COVID-19 variant cases in July, County transmission rates triggered a return to remote-only work for the majority of staff, but the situation was temporary. At the end of August, all employees had reverted to the hybrid work schedule and the Member Service Center had reopened for appointments.

Following are LACERA's divisional achievements for 2022 and statistics for the fiscal year ending June 30, 2022.

Laura Guglielmo
Assistant Executive Officer

Member Services answered 182,054 phone inquiries, while **Administrative Services** processed 331,992 pieces of mail and scanned and indexed 910,080 member documents. **Retiree Healthcare Division** specialists answered 82,027 calls, mailed 56,885 annual healthcare packets, and processed 7,676 enrollment forms.

Retirement benefits specialists provided 6,482 one-on-one retirement counseling sessions to members—in person, telephonically, and virtually. In addition, LACERA conducted 171 workshops and benefit fairs with 5,663 attendees.

Benefits Division added 3,911 new retirees for the fiscal year. They also ensured that 71,587 retirement allowances were paid on time each month. Meanwhile, our **Benefit Protection Unit** investigated 2,097 high-risk cases, which included instances of fraud, lost contact, and elder abuse.

Communications Division supported the strategic planning process and executive priorities throughout the year, while continuing to provide organization-wide creative and production services. Major projects completed in 2022 included: the launch of the redesigned intranet site, LACERA Connect, in March; the launch of revamped, expanded retirement planning sections of lacera.com in September; and the release of a My LACERA walkthrough video, also in September.

JJ Popowich
Assistant Executive Officer

Financial and Accounting Services Division (FASD) processed 7,412 staff, trustee, and vendor payables transactions; 644 stop payment requests; 101 check inquiries; 350 ACH reversals; 675 cancellations; 600 investment account reconciliations; and wire transfers totaling $18.2 billion. In addition, FASD passed Internal Audit's testing for no duplicate transactions during the period of May 1, 2021 through June 30, 2022 ($42 million worth of payables).

Human Resources Division hired 39 new staff members and return retirees and processed 96 supplemental paid sick leave requests for COVID-19-related absences.

Quality Assurance and Metrics Division helped ease staff shortages in the Member Operations Group by conducting two concurrent Core Benefits Training classes and providing audit support to keep up with a surge in member transactions throughout 2021 and 2022. Other fiscal year achievements included full implementation of a new audit management application and expansion of audit areas to include account settlement transactions, PEPRA retirements, and active member deaths. The proportion of audits conducted prior to completion increased to over 80 percent, allowing LACERA to intervene in more cases before problems could impact members.

Systems Division continued to provide service and secure access for staff members working both on- and offsite, while maintaining organization-wide support and completing major infrastructure projects. In 2022, My LACERA registrations climbed to 121,242, with a total of 564,943 visits and 257,521 Retirement Benefit Estimates created.

Awards and Recognition

For the 32nd consecutive year, the Government Finance Officers Association (GFOA) awarded LACERA its Certificate of Achievement for Excellence in Financial Reporting. This award is in recognition of our ACFR for the fiscal year ended June 30, 2021.

LACERA was also a recipient of the GFOA Award for Outstanding Achievement in Popular Annual Financial Reporting for the 24th year in a row. We received this honor for our Popular Annual Financial Report (PAFR) for the fiscal year ended June 30, 2021.

These awards recognize contributions to the practice of government finance exemplifying outstanding financial management. In doing so, they stress practical, documented work that offers leadership to the profession.

The Public Pension Coordinating Council (PPCC) presented its Public Pension Standards Award to LACERA in recognition of compliance with professional standards for plan design and administration for the fiscal year ended June 30, 2022. LACERA is a 20-time recipient of this honor, which is judged on a retirement system's Comprehensive Benefit Program, Funding Adequacy, Actuarial Valuation, Independent Audit, Investments, and Communications.

Acknowledgments

The preparation of this Annual Comprehensive Financial Report in a timely manner is made possible by the dedicated teamwork of LACERA staff under the leadership, dedication, and support of the LACERA Boards. I am sincerely grateful to the LACERA Boards and staff, as well as to all of our professional service providers, who perform so diligently to ensure the successful operation and financial soundness of LACERA.

Respectfully submitted,

Santos H. Kreimann

Santos H. Kreimann
Chief Executive Officer

Certificate of Achievement

Each year, a Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada (GFOA) to government units and public employee retirement systems whose Annual Comprehensive Financial Reports (ACFRs) achieve the highest standards in government accounting and reporting. This report must satisfy both Generally Accepted Accounting Principles (GAAP) and applicable legal requirements. For the 32nd consecutive year, LACERA has earned this prestigious award for its ACFR. We believe our current ACFR continues to meet the Certificate of Achievement Program's requirements, and we will submit it to the GFOA to determine its eligibility for another certificate.

PPCC Award

LACERA received the Public Pension Coordinating Council's (PPCC)* Public Pension Standards 2022 Award, in recognition of meeting professional standards for plan design and administration as set forth in the Public Pension Standards. The Public Pension Standards are intended to reflect minimum expectations for public retirement systems management and administration, and serve as a benchmark by which all defined benefit public plans should be measured. LACERA is a 20-time recipient of this important award.

*A confederation of NASRA, NCPERS, and NCTR

Board of Retirement

Established: 1938

The Board of Retirement (BOR) is responsible for the administration of the retirement system, the retiree healthcare program, and the review and processing of disability retirement applications. The Board is composed of 11 members. Six members are elected: two are elected by active general members; retired members elect one member and one alternate member; safety members elect one member and also have an alternate member. Four of its members are appointed by the Los Angeles County Board of Supervisors, and the law requires the County Treasurer and Tax Collector to serve as an ex-officio member.

Board of Investments

Established: 1971

The Board of Investments is responsible for establishing LACERA's investment policy and objectives, as well as exercising authority and control over the investment management of the Fund. The Board is composed of nine members. Four members are elected: two are elected by active general members; retired members elect one member, as do safety members. Four of its members are appointed by the Los Angeles County Board of Supervisors, and the law requires the County Treasurer and Tax Collector to serve as an ex-officio member.

Board Responsibilities

Appointment of CEO

Appointment and compensation of personnel

Adoption of annual budget

Adoption of travel policy

Board of Retirement	Board of Investments
Manage LACERA	Diversify investments
Administer retiree healthcare	Establish investment policy
Ensure prompt delivery of benefits	Set employer and employee contribution rates
Review disability retirement applications	Investigate merits of investments

Surveying

Gathering information and surveying the landscape is an important part of creating a map that others can follow.

As early as 60,000 years before the common era (BCE), Aboriginal navigators crossing the Australian desert looked for star patterns in the sky and linked them to positions in the landscape to create navigation guides, which they then taught to others through song. Markers and paths from ancient songlines line up directly with landmarks and highways on modern maps.

Independent Auditor's Report

To the Board of Retirement and Board of Investments
Los Angeles County Employees Retirement Association

Report on the Audits of the Financial Statements

Opinion

We have audited the financial statements of Los Angeles County Employees Retirement Association (LACERA) as of and for the years ended June 30, 2022 and 2021 and the related notes to the financial statements, which collectively comprise LACERA's basic financial statements, as listed in the table of contents.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of LACERA as of June 30, 2022 and 2021 and the changes in its financial position for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audits of the Financial Statements* section of our report. We are required to be independent of LACERA and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter

As explained in Note P, the financial statements include investments valued at $23,369,200,000 (32 percent of net position) at June 30, 2022 and $19,818,800,000 (26 percent of net position) at June 30, 2021, whose fair values have been estimated by management in the absence of readily determinable market values. Given that publicly listed prices are not available, management's estimates are based on alternative sources of information, including audited financial statements, unaudited interim reports, independent appraisals, and other similar sources of information to determine the fair value of investments. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about LACERA's ability to continue as a going concern for 12 months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

To the Board of Retirement and Board of Investments
Los Angeles County Employees Retirement Association

Auditor's Responsibilities for the Audits of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and, therefore, is not a guarantee that audits conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing audits in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audits.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audits in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of LACERA's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about LACERA's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audits, significant audit findings, and certain internal control-related matters that we identified during the audits.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and other required supplementary information, as identified in the table of contents, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplemental information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

To the Board of Retirement and Board of Investments
Los Angeles County Employees Retirement Association

Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise LACERA's basic financial statements. The other supplementary information, as identified in the table of contents, is presented for the purpose of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplementary information is fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the Annual Comprehensive Financial Report. The other information comprises the introductory, investment, actuarial, and statistical section but does not include the basic financial statements and our auditor's report thereon. Our opinion on the basic financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements or whether the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated October 14, 2022 on our consideration of LACERA's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of LACERA's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering LACERA's internal control over financial reporting and compliance.

Plante & Moran, PLLC

October 14, 2022, except for the introductory section, as identified in the table of contents of our report, as to which the date is December 16, 2022.

INTRODUCTION

Management is pleased to provide this discussion and analysis (MD&A) of the financial activities of the Los Angeles County Employees Retirement Association (LACERA) for the fiscal year ended June 30, 2022. Readers are encouraged to consider the information presented here in conjunction with the information included in the Letter of Transmittal found in the Introductory Section of the Annual Comprehensive Financial Report (ACFR).

Theodore Granger
Interim Chief Financial Officer

FINANCIAL HIGHLIGHTS
Pension Plan

- Fiduciary Net Position Restricted for Benefits, as reported in the June 30, 2022 Statement of Fiduciary Net Position, totaled $70.3 billion, a decrease of $2.7 billion or 3.7 percent from June 30, 2021. The reduction in the Fiduciary Net Position was primarily due to actual investment returns being lower than the assumed rate of return and benefit payments exceeding contributions.
- Total additions, as reflected in the Statement of Changes in Fiduciary Net Position, were $1.4 billion, resulting from investment earnings and employer and member contributions. Total additions decreased in 2022, equal to $17.0 billion or 92.3 percent less than the amounts realized in 2021, primarily due to lower investment activity income.
- Total deductions, as reflected in the Statement of Changes in Fiduciary Net Position, totaled $4.1 billion, an increase of $240 million or 6.1 percent from the prior year. The increase was primarily attributable to an increase in pension benefits paid to retired members.
- Milliman, LACERA's independent consulting actuary, completed the latest actuarial valuation as of June 30, 2021, and determined the funded status of the Pension Plan (the ratio of actuarial value of assets to actuarial accrued liabilities) to be 79.3 percent versus 76.3 percent as of June 30, 2020. The increase in funded ratio was primarily due to the recognition of current and prior year investment gains, which caused a 3 percentage point increase.
- The Net Pension Liability, provided in accordance with Governmental Accounting Standards Board Statement Number 67 (GASB 67), was $13.6 billion for the fiscal year ended June 30, 2022. This represents an increase of $6.3 billion from June 30, 2021, when the liability was $7.3 billion. The significant increase of the Net Pension Liability was caused by a decrease in investment activity income. Contribution and investment income inflows were less than the outflows of benefit payments and operating expenses. As of June 30, 2022, the most recent measurement date, the Pension Plan's Fiduciary Net Position was 83.8 percent of the Total Pension Liability, a decrease from 90.9 percent as measured for the previous fiscal year ended 2021. The decrease in this ratio was due to both the growth in the Total Pension Liability and decrease in the Pension Plan's Fiduciary Net Position.

Other Post-Employment Benefits (OPEB) Program

- The OPEB Custodial Fund captures the operating activity of the Retiree Healthcare Benefits Program, which is commonly referred to as the OPEB Program. The balance as of June 30, 2022 increased to approximately $193 million from the prior year, when the balance was $167 million for the fiscal year ended 2021. The increase of 15.6 percent in funds held on behalf of plan sponsors, after funding "pay-as-you-go" benefit costs, was $26 million and was primarily due to refunds from health insurance carriers that were not yet distributed to the plan sponsors and participants of the OPEB Program.
- The OPEB Trust Fiduciary Net Position increased by $87.3 million, primarily due to plan sponsor contributions slightly outpacing the investment loss for the fiscal year. The balance available to fund future OPEB liabilities as of June 30, 2022 increased by 3.8 percent, totaling $2.4 billion as compared to $2.3 billion for the prior year at June 30, 2021.

OVERVIEW OF THE FINANCIAL STATEMENTS

This MD&A serves as an introduction to the LACERA Basic Financial Statements, which include the following primary components: the Statement of Fiduciary Net Position; the Statement of Changes in Fiduciary Net Position; and the Notes to the Basic Financial Statements. The Basic Financial Statements are prepared in compliance with the accounting principles and reporting guidelines as set forth by the Governmental Accounting Standards Board (GASB), utilizing the accrual basis of accounting as prescribed by Generally Accepted Accounting Principles of the United States (U.S. GAAP). Separate statements are provided for the Pension Plan, OPEB Trust, and OPEB Custodial Fund, which are distinct from each other and report the results of the annual financial activities within their respective presentations.

The *Statement of Fiduciary Net Position* is a snapshot of account balances at fiscal year-end. This statement reflects assets available for upcoming payments to retirees and their beneficiaries, reduced by any current liabilities owed as of the report date. The Fiduciary Net Position Restricted for Benefits amount, which is the assets less the liabilities, or net position, reflects the funds available for future use to pay benefits.

The *Statement of Changes in Fiduciary Net Position* reflects all the financial transactions that occurred during the fiscal year and the impact those additions and deductions had on the Fiduciary Net Position Restricted for Benefits. The additions versus deductions trend indicates the financial condition over time for, separately, the Pension Plan, OPEB Custodial Fund, and OPEB Trust.

The *Notes to the Basic Financial Statements* (Notes) are an integral part of the financial statements. These Notes provide detailed discussions of key policies, programs, and activities that occurred during the year.

Other information to supplement LACERA's Basic Financial Statements is provided as follows:

> *Required Supplementary Information* (RSI) presents historical trend information to satisfy GASB 67 disclosures and contributes to understanding the historical changes in the participating employers' Net Pension Liability. There is some limited information provided regarding the OPEB Program investment returns to support compliance with GASB Statement Number 74 requirements under an agent plan structure.
>
> *Other Supplementary Information* (OSI) includes the schedules of Administrative Expenses, Investment Expenses, and Payments to Consultants. The OSI is presented immediately following the RSI section.

Pension Plan

Under the California Constitution, the County Employees Retirement Law of 1937 (CERL), and the California Public Employees' Pension Reform Act of 2013 (PEPRA), LACERA administers a cost-sharing multiple employer defined benefit retirement plan (Pension Plan) for eligible employees of the County of Los Angeles (County), the Los Angeles Superior Court (Superior Court), LACERA, and four outside districts (i.e., Little Lake Cemetery District, Local Agency Formation Commission for the County of Los Angeles, Los Angeles County Office of Education, and South Coast Air Quality Management District). The Pension Plan is presented separately in the Statement of Fiduciary Net Position as an irrevocable trust fund. LACERA collects contributions from employers and active members, and earns income on invested assets so the Pension Plan balances accumulate over the long term, such that promised benefits can be paid to retirees now and in future years.

Other Post-Employment Benefits Program

In April 1982, the County adopted an ordinance pursuant to the County Employees Retirement Law of 1937 (CERL) that provided for a retiree healthcare benefits program, also referred to as the Other Post-Employment Benefits Program (OPEB Program), offering a variety of medical and dental/vision healthcare plans, as well as death/burial benefits, for retired members and their eligible dependents. In that same year, the County and LACERA entered into an agreement whereby LACERA would administer the OPEB Program subject to the terms and conditions of the agreement. In 1994, the County amended the agreement to ensure that the OPEB Program will continue even if there are changes to or termination of the active employee health insurance programs.

In June 2014, the LACERA Board of Retirement approved the County's request to modify the agreement, which created a new retiree healthcare benefits tier for certain new employees to lower costs. Structurally, the County segregated all the then-current retirees and employees into the LACERA-administered OPEB Program (Tier 1) and placed all employees hired after June 30, 2014, into the newly established Los Angeles County OPEB Program (Tier 2).

Employees are eligible for the OPEB Program if they are members of LACERA and retire from the County of Los Angeles, the Superior Court, LACERA, or a participating outside district. The OPEB Program offers members an extensive choice of medical plans as well as two dental/vision plans. The medical plans are either HMOs or indemnity plans, and some are designed to work with Medicare benefits. Program benefits are provided through third-party insurance carriers with the participant's cost for medical and dental/vision insurance varying according to the years of retirement service credit with LACERA, the plan selected, and the number of persons covered.

OPEB Custodial Fund

The OPEB Custodial Fund reflects the annual financial activity of the OPEB Program for all participating employers, including those that have established advanced funding in the OPEB Master Trust at LACERA (i.e., County, Superior Court, and LACERA) and those that have not (i.e., the four outside districts). Plan sponsors and members provide monthly funding using a pay-as-you-go methodology, which finances healthcare premiums including administrative fees, as well as other healthcare benefits provided by the OPEB Program. Retirees may qualify for employer-paid medical/dental insurance subsidies from 40 percent of the selected plan or benchmark plan premium up to 100 percent depending upon the member's years of service credit. LACERA bills the healthcare premiums to the participating employers and members and receives reimbursement on a monthly basis. Plan members who do not qualify for the 100 percent subsidy based on their years of service, are required to pay their unsubsidized percentage of the premium cost. LACERA acts as a custodian for these funds on behalf of the plan sponsors and participants.

OPEB Trust

Pursuant to the California Government Code, Los Angeles County established an irrevocable, tax-exempt OPEB Trust for the purpose of holding and investing assets for prefunding a portion of the cost of the OPEB Program (or the Retiree Healthcare Benefits Program), which LACERA administers.

In May 2012, the County negotiated a trust and investment services agreement with the LACERA Board of Investments to manage and invest the OPEB Trust assets. The participating employers provide quarterly contributions, and the administrative costs incurred by LACERA are deducted from the County OPEB Trust. There are two participating employers in the County OPEB Trust: the County and LACERA. The Fiduciary Net Position Restricted for Benefits of the OPEB Trust is reported separately and is legally distinct from that of the Pension Plan. Assets held in the Pension Plan are not used to finance the benefits provided for under the OPEB Program.

The Superior Court began prefunding its OPEB obligations through a Court OPEB Trust effective and initially funded as of June 30, 2016. After discussions and negotiations between the County, LACERA, and the Court, it was determined that a separate irrevocable OPEB Trust would be established for the Court. A trust and investment services agreement was negotiated between LACERA and the Court setting forth the terms under which the LACERA Board of Investments serves as Trustee of the Court OPEB Trust. The Court Agreement was submitted and approved by the Court's Judicial Council in April 2016 and executed in June 2016. Contributions are made by the Court on a discretionary basis at fiscal year-end.

An OPEB Master Trust was created to facilitate combined assets and investment strategies for the County, LACERA, and the Court, and does not include funding from the four outside districts. LACERA administers the OPEB Master Trust as a one investment pool.

The OPEB Trust is presented separately in the Statement of Fiduciary Net Position. The LACERA Board of Investments manages the OPEB Trust for the County, LACERA, and the Court, and utilizes an investment policy statement to diversify investments based on the agencies' future obligations. The OPEB Trust's Fiduciary Net Position Restricted for Benefits at year-end serves to measure the effort in prefunding future expenses associated with other post-employment benefits such as those provided through the OPEB Program. The OPEB Trust income and expenses are also presented separately in the OPEB Trust's Statement of Changes in Fiduciary Net Position.

FINANCIAL ANALYSIS — PENSION PLAN

Fiduciary Net Position Restricted for Benefits

The Pension Plan's Total Fiduciary Net Position Restricted for Benefits represents the available fund balance of member and employer contributions—once investment activity, benefit payments, refunds, and administrative expenses are accounted for—that is available for retirement benefits. As of June 30, 2022, LACERA had Total Assets of $72.6 billion, which exceeded Total Liabilities of $2.3 billion, resulting in a Fiduciary Net Position Restricted for Benefits of $70.3 billion. This amount reflects a decrease of $2.7 billion or 3.7 percent from the prior year, primarily due to negative investment earnings as well as annual fund deductions exceeding contributions. As of the prior year, June 30, 2021, LACERA had $75.4 billion in Total Assets, which was greater than $2.4 billion in Total Liabilities, resulting in a Fiduciary Net Position Restricted for Benefits of $73.0 billion. This amount reflects an increase of $14.5 billion or a 24.8 percent increase from the prior year, 2020, because of robust investment market performance during that period.

Fiduciary Net Position Restricted for Benefits — Pension Plan

As of June 30, 2022, 2021, and 2020

(Dollars in Millions)

	2022	2021	2020	2022–2021 % Change	2021–2020 % Change

Additions and Deductions to Fiduciary Net Position Restricted for Benefits

The primary sources that finance the promised pension benefits LACERA provides to members and their beneficiaries are realized investment income and the collection of employer and member retirement contributions. For the fiscal years ended 2022 and 2021, Total Additions amounted to $1.4 billion and $18.4 billion, respectively. The Total Additions' difference between the two years was caused by depreciation of investment holdings during 2022. For the fiscal year ended 2020, Total Additions amounted to $3.9 billion. The differences between fiscal years 2021 and 2020 were due primarily to LACERA's diverse investment strategy producing positive investment performance.

The net investment loss for fiscal year 2022 was approximately $1.5 billion, a decrease of $17.1 billion from the 2021 fiscal year, when the net investment gain was $15.6 billion. This fiscal year's time-weighted investment returns of 0.1 percent (net of fees) is lower than the actuarial assumed investment earnings rate of 7.0 percent, primarily due to challenging market conditions in the first half of 2022, including war in Europe, high inflation, and an economic slowdown in China. In fiscal year 2020, the net investment gain was $1.4 billion, $14.2 billion lower than the net investment gain in 2021. The fiscal year 2021 time-weighted investment returns of 25.2 percent (net of fees) was greater than the actuarial assumed investment earnings rate of 7.0 percent, primarily due to strong results produced by global equity and private equity assets. The investment gains and losses experienced will continue to impact the actuarial funded ratio over time as they are recognized in the future through the actuarial asset-smoothing process, whereby each year's investment gains and losses are recognized over a five-year period.

To finance employer contributions that are due to LACERA, the County and the outside Districts made monthly cash payments or semi-monthly contributions to coincide with the employee payroll cycle. For the fiscal years ended June 30, 2022 and 2021, the required employer contributions due to LACERA were paid in full.

The primary uses of LACERA's assets include the payment of promised benefits to members and their beneficiaries, refunds of contributions to terminated employees, and costs of administering the Pension Plan. These deductions totaled $4.1 billion for fiscal year 2022, an increase of $240 million or 6.1 percent from the prior year. The increase in deductions is partly attributable to an increase in the number of LACERA retirees and related increase in pension benefit payments, including cost-of-living-adjustments, for the fiscal year ended June 30, 2022. These deductions totaled $3.9 billion for fiscal year 2021, an increase of $213 million or 5.8 percent from the prior year, 2020. The increase in deductions is partly attributable to an increase in the number of LACERA retirees and related increase in pension payments, including cost-of-living-adjustments, for the fiscal year ended June 30, 2021.

Administrative and miscellaneous expenses also increased 9.9 percent from the fiscal years ended June 30, 2021 to June 30, 2022, primarily due to an increase in facilities' operational costs, legal consulting costs, temporary personnel services, and scheduled salary and employee benefit increases in support of LACERA's mission of producing, protecting, and providing the promised benefits. Administrative and miscellaneous expenses also increased 5.8 percent from the fiscal years ended June 30, 2020 to June 30, 2021, primarily due the purchase of equipment and services to strengthen LACERA's information technology systems and scheduled employee salary increases. Investments in information technology and staffing resources will allow LACERA to continue to serve the needs of its membership now and into the future.

For the fiscal years ended June 30, 2022 and 2021, the net decrease to the Fiduciary Net Position Restricted for Benefits was $2.7 billion for 2022 and a $14.5 billion increase for 2021. These amounts represent the annual change in net position made available for additional investments, benefit payments, and LACERA's cost of operations. The decrease in Fiduciary Net Position for Benefits in fiscal year 2022 resulted from annual benefit payments exceeding contributions and investment income. The net increase to the Fiduciary Net Position Restricted for Benefits from fiscal years ended June 30, 2020 to June 30, 2021 was $14.5 billion due to the positive performance of LACERA's investment portfolio.

Pension Plan Investment Structure

LACERA's general investment consultant, Meketa Investment Group (Meketa), along with Investment Office staff, reviews the existing asset allocation structure every three to five years to recommend an appropriate allocation consistent with the economic environment, considering model assumptions and constraints. In March 2018, the LACERA Board of Investments approved functional asset category structure creating new asset allocation models that had more attractive return/risk quotients than the current portfolio structure at that time, and reflected greater diversification, potentially resulting in higher market performance throughout a full market cycle. The functional framework provides for a broader group of Pension Plan investments. The traditional asset classes were reassigned and expanded in these new functional asset categories, labeled as Growth, Credit, Real Assets and Inflation Hedges, and Risk Reduction and Mitigation.

fiscal year 2020, LACERA implemented a cash overlay program for the Pension Plan designed to further rebalance the portfolio toward its functional category strategic weights using the portfolio's excess cash.

During fiscal year 2021, strategic asset allocation reviews for LACERA's Pension Plan investments were completed. The Board approved revised target asset allocation weights for the Pension Plan in May 2021 and for the OPEB Trust in June 2021. The Pension Plan's new asset allocation weights were implemented as of October 2021.

Pension Plan Liabilities

As GASB Statement Number 67 (GASB 67) requires, LACERA reports the Total Pension Liability and the Net Pension Liability as calculated by LACERA's actuary. The Total Pension Liability is the portion of actuarial present value of projected benefit payments that is attributable to past periods of member service using the individual entry age actuarial cost method, based on the requirements of GASB 67. The Net Pension Liability is the Total Pension Liability minus the plan's net assets or fiduciary net position. These liabilities, which are the employers' responsibility, are solely calculated under the guidance of GASB 67 for financial statement reporting purposes.

The Actuarial Valuation of Retirement Benefits report (funding valuation) provides information about the employers' funding of such liabilities, including the Pension Plan's required contributions and funded status. In addition, the funding valuation serves as a basis for providing the information required for accounting and reporting disclosures (under GASB standards). The Total Pension Liability as of June 30, 2022, was $83.9 billion, or an increase of 4.5 percent from the Total Pension Liability of $80.3 billion as of June 30, 2021. The Net Pension Liability as of June 30, 2022, was $13.6 billion, representing an increase of 87.1 percent from the Net Pension Liability of $7.3 billion as of June 30, 2021. The Net Pension Liability increased by $6.3 billion because LACERA experienced a $2.7 billion decrease in the Fiduciary Net Position and a $3.6 billion increase in Total Pension Liability.

GASB 67 requires the presentation of the Fiduciary Net Position as a percentage of the Total Pension Liability. For the fiscal years ended June 30, 2022, and 2021, the Fiduciary Net Position as a percentage of the Total Pension Liability is reported as 83.8 percent and 90.9 percent, respectively. The decrease for the fiscal year ended June 30, 2022, is due to the growth in the Total Pension Liability of $3.6 billion and a decrease in LACERA's Fiduciary Net Position of $2.7 billion, netted against the liability. The Total Pension Liability increased as generally expected from year to year and is consistent with prior experience over time. Contributing factors include the cost of benefits earned over the period, interest on the Total Pension Liability, investment activity, and benefit payments.

Net Pension Liability

As of June 30, 2022, 2021, and 2020

(Dollars in Millions)

OPEB PROGRAM FINANCIAL REPORTING

There are two financial sources provided by plan sponsor employers used to fund the OPEB Program for retiree healthcare. One is the OPEB Custodial Fund, used to pay premium costs and administrative expenses on a current and ongoing basis. The other is the OPEB Trust, containing contributions set aside by certain participating employers to prefund certain other current administrative costs and future costs.

Financial Analysis — OPEB Custodial Fund

The OPEB Custodial Fund is used to pay benefit costs as incurred on an ongoing pay-as-you-go basis. As of June 30, 2022, the OPEB Custodial Fund's total assets exceeded total liabilities, resulting in a positive Fiduciary Net Position Restricted for Benefits of approximately $193 million. This balance, where total assets of $270 million exceeded total liabilities of $77 million, represents funds provided by plan sponsor employers in excess of benefits paid during the period, held at LACERA on behalf of the employers. As of the end of the fiscal year, June 30, 2021, the Fiduciary Net Position Restricted for Benefits was $166 million as a result of total assets, reported at $233 million, exceeding total liabilities of $67 million.

As required under GASB 84, LACERA's Statement of Changes in Fiduciary Net Position includes the financial activity of the OPEB Custodial Fund. For the fiscal years ended June 30, 2022 and 2021, total additions were $804 million and approximately $770 million, as total deductions amounted to $778 million and $752 million, respectively. This caused a $26 million and $18 million increase in the Fiduciary Net Position Restricted for Benefits over the last two fiscal years. Contributions from employers and members exceeded the total of benefit costs and administrative expenses during the year. Balances held in the OPEB Custodial Fund not used to pay benefits are invested by LACERA's Board of Investments. The OPEB Custodial Fund incurred a net investment loss of $5.1 million for the fiscal year ended June 30, 2022, and generated $0.2 million of net investment income for the fiscal year ended June 30, 2021.

Financial Analysis — OPEB Trust

As reflected in the OPEB Trust's Statement of Changes in Fiduciary Net Position, OPEB Trust additions included a net investment loss of $288.5 million for the fiscal year ended June 30, 2022, which was the opposite of the prior year when the investment portfolio generated investment income.

Deductions included $599.0 thousand for total administrative expenses. The OPEB Trust's Fiduciary Net Position Restricted for Benefits as of the fiscal year ended June 30, 2022 was $2.4 billion, representing an $87.3 million increase from last year due to employer contributions. As of June 30, 2021, the total OPEB Trust Fiduciary Net Position Restricted for Benefits was $2.3 billion, after earning $452.1 million in net investment income and deducting $583.6 thousand for total administrative expenses.

Employers provided OPEB Trust prefunding contributions of $376 million for fiscal year 2022, a 3.6 percent increase from $363 million for fiscal year 2021, which represents a portion of the total contributions presented in this statement. The OPEB Trust holds funding set aside by certain participating employers to pay current administrative costs and provide future benefits. GASB standards allow—for financial statement presentation only—pay-as-you-go activity from the OPEB Custodial Fund to be adjusted for and reported on the Statement of Changes in Fiduciary Net Position under the OPEB Trust. This adjustment increases Employer Contribution additions; however, pay-as-you-go contributions are not actually made to the OPEB Trust, but instead to the OPEB Custodial Fund. Correspondingly, Service Benefit deductions were increased to reflect pay-as-you-go benefit payments made by employers through the OPEB Custodial Fund as OPEB benefits became due. Total OPEB Trust contributions including this adjustment were $1,097 million for fiscal year 2022 and $1,057 million for fiscal year 2021. Actual amounts LACERA paid to provide benefits and reimbursed to LACERA by employers and members are included within the OPEB Custodial Fund held on behalf of employers.

OPEB Trust Investment Structure

In June 2016, the LACERA Board of Investments approved the use of a unitized fund structure for the OPEB Trust funds. The OPEB Master Trust structure allows for unitization of investments at the asset composite level while retaining individual net asset values for each participating employer. The OPEB Master Trust accommodates commingling and co-investing of the County, LACERA, and Court OPEB Trust funds. The "OPEB Master Trust" as described within the Investment Section, which is commonly referred to as the "OPEB Trust" throughout the financial statements, includes the County, LACERA, and Court OPEB Trust investments. In June 2021, the LACERA Board of Investments adopted a revised asset allocation model, including new asset classes such as private equity and real estate within the functional asset category structure. This diversified investment strategy will be implemented beginning in the upcoming fiscal year.

Information related to the OPEB Trust is included in the Financial Section, Note Q — OPEB Trust and other financial statement sections, such as Note N — OPEB Program, which describes program benefits, to meet financial reporting requirements. Due to the OPEB Program's change from a cost-sharing to an agent plan structure in July 2018, LACERA's financial statement disclosures, as the OPEB Program administrator, were reduced to report limited investment return information in accordance with GASB Statement Number 74.

PLAN ADMINISTRATION

LACERA Membership

The following table provides comparative LACERA membership data for the last two fiscal years. Active members declined by 640 or 0.6 percent as of June 30, 2022, while there was an increase of 2,061 or 3.0 percent in retirees when comparing the two fiscal years ended June 30, 2022 and 2021. When comparing the two fiscal years ended June 30, 2021 and 2020, active members declined by 50 as of June 30, 2021, while there was an increase of 1,536 or 2.3 percent in retirees.

LACERA Membership

As of June 30, 2022, 2021, and 2020

				2022–2021		2021–2020	
	2022	2021	2020	Difference	% Change	Difference	% Change
Active Members[1]	**115,599**	116,239	116,289	(640)	(0.6)%	(50)	—%
Retired Members	**71,585**	69,524	67,988	2,061	3.0%	1,536	2.3%
Total Membership	**187,184**	**185,763**	**184,277**	**1,421**	**0.8%**	**1,486**	**0.8%**

[1]Effective fiscal year ended June 30, 2019 and going forward, active member counts include inactive members who are both vestedand non-vested.

ADMINISTRATIVE EXPENSES

The LACERA Boards of Retirement and Investments jointly approve the Operating Budget, which becomes effective at the beginning of the fiscal year. During the fiscal year ended 2020–2021, LACERA adopted an annual operating budget amendment process to allow funding for urgent staffing changes and operating needs that may arise during the year. The Operating Budget information presented in these financial statements represents the amended budget amounts for the fiscal years ended June 30, 2022 and 2021. LACERA's annual budget plan controls administrative expenses and represents approximately 0.13 percent and 0.12 percent of the allowable basis for the budget calculation for the fiscal years ended June 30, 2022 and 2021, respectively. The actual administrative expenses were $100 million for 2022 compared to $91 million for 2021, resulting in a 9.9 percent increase. For fiscal years ended June 30, 2021 and 2020, the actual administrative expenses were $91 million for 2021 compared to $85 million for 2020, resulting in a 7.1 percent increase. The primary factors contributing to the rise were the organization's plan to fill vacant positions, the addition of new staffing positions, employee salary and benefit increases, additional legal consulting costs, and an increase in operational costs due to a new office lease contract.

The CERL governing the LACERA Pension Plan requires that the annual budget for administrative expenses may not exceed 0.21 percent of the Actuarial Accrued Liability (AAL) as of the prior fiscal year. CERL provides allowances for other administrative costs, such as certain costs of legal representation and expenditures for information technology projects to be excluded from the 0.21 percent calculation; LACERA includes such costs in the administrative expense allocation.

The following table provides a comparison of the actual administrative expenses for the fiscal years ended 2022, 2021, and 2020. The AAL was used to calculate the statutory budget amount. For both years, LACERA's administrative expenditures were well below the limit imposed by law.

Analysis of Administrative Expenses

As of June 30, 2022, 2021, and 2020

(Dollars in Thousands)

	2022	2021	2020
Total Statutory Budget Appropriation	$164,378	$156,735	$143,907
Basis for Budget Calculation (Actuarial Accrued Liability)	78,275,175	74,635,840	$68,527,354
Limit per CERL	**0.21%**	**0.21%**	**0.21%**
Administrative Expenses	$100,121	$90,586	$85,384
Basis for Budget Calculation (Actuarial Accrued Liability)	78,275,175	74,635,840	$68,527,354
Administrative Expenses as a Percentage of the Basis for Budget Calculation	**0.13%**	**0.12%**	**0.12%**
Total Statutory Budget Appropriation	$164,378	$156,735	$143,907
Operating Budget Request	(114,807)	(100,291)	($94,600)
Underexpended Statutory Budget Appropriation	**$49,571**	**$56,444**	**$49,307**
Operating Budget Request	$114,807	$100,291	$94,600
Administrative Expenses	(100,121)	(90,586)	(85,384)
Underexpended Operating Budget	**$14,686**	**$9,705**	**$9,216**

ACTUARIAL FUNDING VALUATIONS

In order to determine whether the Fiduciary Net Position Restricted for Benefits will be sufficient to meet the Pension Plan's future obligations, the actuarial funded status needs to be calculated. An actuarial valuation is similar to an inventory process. On the valuation date, the assets available for the payment of promised benefits are appraised. These assets are compared with the actuarial liabilities, which represent the actuarial present value of all future benefits expected to be paid for each member. The purpose of an actuarial valuation is to determine future contribution amounts needed by the employers (plan sponsors) and the employees (members) to provide all promised future benefits and to assess the Pension Plan's funded status. A valuation is performed each year. An experience study is performed every three years to review the actuarial assumptions and methods applied in preparing the annual valuations.

Board Policy

In December 2009, the LACERA Board of Investments adopted a revised Retirement Benefit Funding Policy (Funding Policy). In February 2013, the Funding Policy was further amended to conform to the new PEPRA provisions. In addition, beginning with the June 30, 2009 valuation and on a prospective basis, the LACERA Board of Investments approved the inclusion of the Supplemental Targeted Adjustment for Retirees (STAR) Reserve balance in valuation assets. As such, the actuary includes the STAR Reserve as part of actuarial assets available for funding retirement benefits.

Consistent with the 2013 Funding Policy, an asset smoothing method is applied to actuarial investment gains and losses. Variances between the actuarially expected fair value of assets (computed based on investment performance at the actuarial assumed rate of return) and the actual fair value of assets are calculated and then recognized, or smoothed over a five-year period. This actuarial smoothing process recognizes a portion of each year's actuarial investment gains and losses (in relation to the actuarially assumed return) in order to minimize substantial variations in the employer contribution rates and funded ratios.

Actuarial Liabilities

Pursuant to the customary actuarial reporting process, the actuarial valuation as of June 30, 2022, is not yet available. Information is presented here based on the most recent actuarial valuation as of June 30, 2021. The consulting actuary calculates the contributions required to fund the Pension Plan. The difference between the present value of all future obligations and the present value of future normal cost contributions is referred to as the Actuarial Accrued Liability (AAL), which totaled $81.9 billion as of June 30, 2021. The $64.9 billion of fair value of net assets reported for fiscal year-end 2021 is used to offset the AAL, and the difference is referred to as the June 30, 2021 Unfunded Actuarial Accrued Liability (UAAL), which was reported at $17.0 billion.

The Funding Policy provides an approach for managing the UAAL. LACERA applies an amortization method including multiple layers amortized over closed periods. For each fiscal year, gains or losses on the UAAL are calculated and then amortized over the period defined, which was changed from 30 years to 20 years. Existing layers with amortization periods longer than 22 years were reset to a term not longer than 22 years. New layers added each year are amortized over 20 years. All amortization periods as of the June 30, 2021, valuation are now under 20 years. This process establishes a payoff schedule of the UAAL and helps dampen volatility in required amortization payments which, in turn, is designed to provide stability in employer contribution rates. The LACERA Board of Investments updated the amortization method based on the results of the 2019 investigation of experience report prepared by the consulting actuary.

Actuarial Assumptions

In January 2020, as a result of the most recent experience and assumption study completed as of June 30, 2019, the LACERA Board of Investments adopted a decrease in the investment return assumption. The investment return assumption was reduced from 7.25 to 7.00 percent for the June 30, 2019 actuarial valuation due to projected challenges in the years ahead in achieving a higher rate of return. There were no changes approved by the LACERA Board of Investments to the corresponding price and wage inflation assumptions. Contribution rates were increased for the fiscal year beginning July 1, 2020, with revised employee rates, while higher employer contribution rates were phased in over three years (fiscal years beginning July 1, 2020 through July 1, 2022), softening the immediate impact to plan sponsors.

The funded ratio is a measurement of the funded status of the Pension Plan. It is calculated by dividing the Valuation Assets by the AAL. Valuation Assets are the value of cash, investments, and other assets belonging to the Pension Plan, as used by the actuary for the purpose of preparing the actuarial valuation. Investment returns, which have varied over the last three years, cause fluctuations in Valuation Assets. In 2019, the LACERA Board of Investments reduced the assumed investment rate of return (as described above and in the Actuarial Section of the ACFR).

FUNDED RATIO, RATES OF RETURN, AND FAIR VALUE

LACERA's independent consulting actuary, Milliman, performed the latest actuarial valuation as of June 30, 2021, and determined that the Pension Plan's Funded Ratio of the actuarial assets to the AAL increased to 79.3 percent as of that date, as compared to 76.3 percent as of the June 30, 2020 valuation.

The investment return on a market basis for 2021 resulted in a 3.0 percentage point increase in the Funded Ratio when applying the five-year actuarial asset smoothing method. For the 2021 and 2020 fiscal year-end actuarial valuations, respectively, the Pension Plan investment portfolio returned 25.2 percent and 1.8 percent (both net of fees) on a time-weighted market basis, which for 2021 was more than the 7.0 percent investment return assumption effective since 2019. When compared to the assumed rate of return, in total, there was an $11.5 billion gain on market assets. Under the actuarial asset smoothing method, which recognizes investment gains and losses over a five-year period, the return on actuarial assets was 10.4 percent, equivalent to a gain of $2 billion relative to the assumed return of 7.0 percent.

The following table provides a three-year history of investment and actuarial returns and the actuarial funded ratios. As required by GASB Statement Numbers 67 and 74, the money-weighted rate of return is presented as an expression of investment performance, net of investment expense, adjusted for the changing amounts actually invested. For the fiscal year ended June

30, 2022, the annual money-weighted rate of return on Pension Plan investments was 0.6 percent (net of fees), and the time-weighted return for the same period is 0.1 percent (net of fees). The annual 2022 Pension Plan valuation report is not yet available at this time.

Total Investment Rates of Return — Pension Plan

For the Last Three Fiscal Years Ended June 30

(Dollars in Thousands)

Fiscal Year End	Total Investment Portfolio Fair Value	Total Fund Time-Weighted Return (net of fees)[1]	Total Fund Money-Weighted Return (net of fees)[1]	Return on Smoothed Valuation Assets (net of fees)[1,2]	Actuarial Assumed Rate of Return	Actuarial Funded Ratio
2020	$56,574,410	1.8%	1.4%	5.8%	7.0%	76.3%
2021	$70,297,718	25.2%	25.2%	10.4%	7.0%	79.3%
2022[3]	**$67,467,013**	**0.1%**	**0.6%**	—	—	—

[1]The returns are presented net of investment management fees.

[2]Returns calculated using the money-weighted rate of return method.

[3]Investment information, including total investment portfolio fair value and time-weighted and money-weighted returns, is available. However, the actuarial valuation report for June 30, 2022, is not yet available at financial statement publication.

The annual time-weighted rates of return on OPEB Trust investments, net of OPEB Trust investment expenses as of the fiscal years ended June 30, 2022 and 2021, were negative 11.2 percent and positive 28.4 percent, respectively. As determined for the July 1, 2021 OPEB valuation, the OPEB Program's Funded Ratio of the actuarial assets to the AAL increased to 10.9 percent, as compared to 7.0 percent reported in the July 1, 2020 valuation. The County, LACERA, and the Superior Court continued to provide OPEB Trust contributions, which increased prefunding assets and offset the AAL. The annual 2022 OPEB Program valuation report is not available as of this ACFR's publication.

LACERA OPERATIONS

The COVID-19 pandemic impacted LACERA to a much lesser degree than in prior years, with a significant reduction in operational expenditures to address urgent needs. LACERA followed health and safety guidelines promulgated by federal, state, and local officials, including the Los Angeles County Department of Public Health, Los Angeles County Human Resources Department, and the City of Pasadena. During the year, LACERA's Board of Retirement and Board of Investments conducted their regular open public meetings (by teleconference, pursuant to the California Governor's Executive Order No. N-29-20 and the California Government Code, as applicable) to form the policy and steer the overall direction of LACERA. The executive team and staff remained flexible to quickly accommodate changes in operations during transmission level surges while implementing a new hybrid work model allowing staff to work either in the office or remotely.

The organization's primary goal to serve members and provide the promised benefits remained in focus and was the driver of decisions. These financial statements contain fiscal results that prove LACERA's ability to administer the retirement system successfully throughout an ever-changing and fluctuating environment. LACERA's financial flows and operational strategies remained consistent as the fund collected contributions from members and plan sponsors; provided counseling and retirement services to our members through multiple channels; successfully managed the pension fund investment portfolio during uncertain times, producing a positive return; and provided retirement and retiree healthcare benefits to our members without fail. At the end of the fiscal year, LACERA's governing Boards and executive teams had shifted their financial and operational focus from pandemic-related issues to organizational direction and future initiatives in a post-pandemic era. For additional information regarding the COVID-19 pandemic, please refer to Note L — Administrative Expenses.

ACCOUNTING AND FINANCIAL REPORTING STANDARDS EFFECTIVE FOR THE FISCAL YEAR ENDED 2022

Leases

GASB issued Statement Number 87, *Leases*, to increase the usefulness of governments' financial statements by requiring reporting of certain lease liabilities that currently are not reported to enhance comparability of financial statements among governments by requiring lessees and lessors to report leases under a single model. This statement is meant to enhance the decision-usefulness of the information provided to financial statement users by requiring notes to the financial statements including the timing, significance, and purpose of a government's leasing arrangements.

For LACERA's financial statements, these requirements, which were postponed by GASB for one year due to the COVID-19 pandemic, are effective for the fiscal year ended June 30, 2022. However, LACERA considered GASB 87 provisions, including those in paragraph 41 and the disclosure requirements under paragraph 57, and decided the GASB 87 recognition and measurement criteria were determined to have an insignificant impact on LACERA.

UPCOMING ACCOUNTING AND FINANCIAL REPORTING STANDARDS

Subscription-Based Information Technology Arrangements

In June 2020, the GASB issued Statement Number 96 (GASB 96), Subscription-Based Information Technology Arrangements (SBITAs), to establish SBITAs as intangible assets with a corresponding subscription liability for contracts that convey control of the right to use another party's information technology software. GASB 96 also establishes uniform accounting and financial report requirements for SBITAs, aligning the information with that of GASB 87, Leases. LACERA will determine how the provisions of GASB 96 are applicable for the fiscal year ending June 30, 2023.

REQUESTS FOR INFORMATION

This comprehensive financial report is designed to provide the LACERA Boards of Retirement and Investments, our membership, and interested third parties with a general overview of LACERA's finances and to show accountability for the funds it receives and its management of the Pension Plan and OPEB Program.

Address questions regarding this report and/or requests for additional financial information to:

Interim Chief Financial Officer
LACERA
300 N. Lake Avenue, Suite 650
Pasadena, CA 91101

Respectfully submitted,

Theodore Granger

The accompanying notes to the basic financial statements are an integral part of the basic financial statements.

NOTE A — Benefit Plan Descriptions

Pension Plan

The Los Angeles County Employees Retirement Association (LACERA) was established on January 1, 1938. It is governed by the California Constitution, the County Employees Retirement Law of 1937 (CERL), the California Public Employees' Pension Reform Act of 2013 (PEPRA), relevant provisions of the Internal Revenue Code, and the regulations, procedures, and policies adopted by the LACERA Board of Retirement and the LACERA Board of Investments. The Los Angeles County (County) Board of Supervisors may also adopt resolutions, as permitted by CERL, which may affect the retirement benefits of LACERA members. LACERA operates as a cost-sharing multiple-employer defined benefit Pension Plan for Los Angeles County, LACERA, Los Angeles County Superior Court (Superior Court), and four outside districts: Little Lake Cemetery District, Local Agency Formation Commission for the County of Los Angeles, Los Angeles County Office of Education, and South Coast Air Quality Management District.

Retiree Healthcare Benefits Program

In April 1982, the County adopted an ordinance pursuant to the CERL that provided for a Retiree Healthcare Benefits Program, also referred to as the Other Post-Employment Benefits Program (OPEB Program), that provides medical and dental/vision healthcare plans, as well as death/burial benefits, for retired members and their eligible dependents. In that same year, the County and LACERA entered into an agreement whereby LACERA would administer the program subject to the terms and conditions of the agreement. In 1994, the County amended the Agreement to ensure that the OPEB Program will continue even if there are changes to or termination of the active employee health insurance programs.

In June 2014, at the County's request, the LACERA Board of Retirement approved an amendment to the agreement, which created a new retiree healthcare benefits program tier to lower costs. The Los Angeles County Retiree Healthcare Benefits Program Tier 2 was established and provides benefits for all employees hired after June 30, 2014. The existing benefits program and current membership at that time was labeled as Tier 1.

In July 2018, the OPEB Program, in which Los Angeles County, LACERA, Superior Court, and the outside Districts participate, was restructured as an agent multiple-employer defined benefit OPEB plan. OPEB Program description and benefit provisions are explained in Note N — OPEB Program in the Financial Section.

Governance

The LACERA Board of Retirement is responsible for the administration of the retirement system, review and processing of disability retirement applications, and administration of the OPEB Program, including overseeing OPEB actuarial matters. The Board is composed of nine trustees, plus two alternate trustees. Four trustees and two alternate trustees are elected: Active general members elect two trustees; retired members elect one trustee and one alternate trustee; and safety members elect one trustee and one alternate trustee. Four trustees are appointed by the Los Angeles County Board of Supervisors. The law requires the County Treasurer and Tax Collector to serve as an ex-officio trustee. The Deputy County Treasurer and Tax Collector serves as the acting ex-officio trustee, sitting in for the ex-officio trustee as needed.

The LACERA Board of Investments is responsible for establishing LACERA's investment policy and objectives, deciding Pension Fund actuarial matters, including setting assumptions and member and employer contribution rates, and exercising authority and control over the investment management of the trust funds. The Board is composed of nine trustees. Four trustees are elected: Active general members elect two trustees; and retired and safety members each elect one trustee. Four trustees are appointed by the Los Angeles County Board of Supervisors, who are required as a condition of appointment to have significant prior experience in institutional investing. The law requires the County Treasurer and Tax Collector to serve as an ex-officio trustee. The Deputy County Treasurer and Tax Collector serves as the acting ex-officio trustee, sitting in for the ex-officio trustee as needed.

On October 18, 2021, LACERA filed a lawsuit in Superior Court against the County of Los Angeles and the County Board of Supervisors regarding LACERA's ability to set classifications and salaries for its personnel. LACERA is a separate public agency from the County and provides independent administration of the County pension system, including its assets and the payment of benefits. LACERA is seeking a court order confirming LACERA's authority and implementing critical personnel actions approved by the LACERA Boards, which the County has blocked from becoming effective.

The lawsuit filing does not affect contributions from the County, LACERA's assets, investments, or the timely delivery of benefits and services to its members and beneficiaries, nor does the case have a material monetary impact on the County or LACERA. The lawsuit is posted on LACERA.com in the Public Records section. For additional disclosures regarding litigation, please see Note M — Commitments and Contingencies.

Membership

LACERA provides retirement, disability, and death benefits to its active safety and general members and administers the plan sponsors' Retiree Healthcare Benefits (or OPEB) Program. Safety membership includes law enforcement (sheriff and district attorney investigators), firefighter, forester, and lifeguard classifications. General membership is applicable to all other occupational classifications. The retirement benefits within the Pension Plan are tiered based on the date of LACERA membership. Additional information regarding the benefit structure is available by contacting LACERA or visiting LACERA.com.

LACERA Pension Plan Membership

As of June 30, 2022 and 2021

	2022	2021
Active Members		
Vested	**74,796**	74,434
Non-Vested	**21,756**	24,684
Total Active Members	**96,552**	**99,118**
Inactive Members[1]		
Vested[2]	**9,250**	8,714
Non-Vested	**9,797**	8,407
Total Inactive Members	**19,047**	**17,121**
Total Active & Inactive Members	**115,599**	**116,239**
Retired Members		
Service	**51,477**	49,780
Disability	**10,449**	10,317
Survivors & Beneficiaries	**9,659**	9,427
Total Retired Members	**71,585**	**69,524**
Total Membership	**187,184**	**185,763**

[1]Inactive members are terminated/out-of-service.
[2]Includes deferred members.

INVESTMENTS

Pension Plan

Pension Plan funding is derived from three sources: employer contributions, employee contributions (including those made by the employer on behalf of employees pursuant to §414(h)(2) of the Internal Revenue Code), and realized investment earnings. Pension Plan assets are held separate from other assets, including the distinct OPEB Trust and OPEB Custodial Fund, and are invested pursuant to policies and procedures adopted by the LACERA Board of Investments. Pension Plan gross income is exempt from federal income taxation under §115 of the Internal Revenue Code.

OPEB Trust

In 2012, the County and LACERA, as participating employers, established an OPEB Trust for the purpose of holding and investing assets to prefund the OPEB Program administered by LACERA for eligible retired members and eligible dependents and survivors of LACERA members. In June 2016, the Los Angeles County Superior Court established and began making OPEB prefunding contributions to the Court OPEB Trust. The assets held within the OPEB Trusts meet the criteria of qualifying trusts under GASB 74 and do not modify the OPEB Program benefits, which have been administered under an agent multiple-employer plan structure since July 1, 2018.

The County and Superior Court entered into separate trust and investment services agreements with the LACERA Board of Investments to serve as trustee with sole and exclusive authority, control over, and responsibility for directing the investment and management of the respective employers' OPEB Trust assets. The County and Court OPEB Trust documentation and structure are substantively similar. The LACERA Board of Investments serves as trustee for the two OPEB trusts, exercising similar authority for each employer's OPEB Trust assets. The two trusts are collectively referred to as the OPEB Trust throughout the financial statements and note disclosures except in the Investment Section, where they are also labeled as the OPEB Master Trust.

The LACERA Board of Investments adopted an investment policy statement establishing the initial asset allocation for the purpose of effectively managing and monitoring the assets of the OPEB Trust. Contributions and transfers to the OPEB Trust are determined at the employers' discretion.

In 2016, the County trust agreement was amended to permit the co-investment of the County and the Court's trust assets. The LACERA Board of Investments approved the formation of an OPEB Master Trust to commingle funds of the County OPEB Trust and the Court OPEB Trust for investment purposes only. The OPEB Master Trust Declaration was made on July 13, 2016. The LACERA Board of Investments serves as trustee of the Master Trust assets. Gross income from all OPEB Trusts described above is exempt from federal income taxation under §115 of the Internal Revenue Code (IRC). LACERA obtained letter rulings from the Internal Revenue Service to this effect.

OPEB Custodial Fund

The County, the Superior Court, LACERA, and participating outside district employers provide a health insurance program and death benefits (OPEB Program) for retired employees and their dependents, which LACERA administers. Pursuant to an administrative agreement between the County and LACERA, and certain County ordinances, the County subsidizes, either in whole or in part, insurance premiums covering certain program participants who meet service credit hurdles.

LACERA maintains two investment accounts under the OPEB Custodial Fund: the OPEB Operating Account and OPEB Reserve Account. The County, Superior Court, LACERA, and participating outside district employers provide monthly contributions to fund current benefits and own the funds in these accounts, which LACERA reports and invests in cash and fixed income securities separately from Pension Plan assets and OPEB Trust funds. The funds held within the OPEB Custodial Fund investment accounts do not meet the definition of a qualifying OPEB Trust under GASB 74 and are not used to reduce the employers' Total OPEB Liability. External investment managers invest funds in both accounts pursuant to policies and procedures approved by the LACERA Board of Investments. In addition, investment income realized in these types of accounts maintained by government entities are generally exempt from federal income taxation under §115 of the Internal Revenue Code.

OPEB Operating Account: This account is primarily used to fund the OPEB Program's operations. Additions include the monthly health insurance premium subsidies collected from the County; health insurance premiums collected from LACERA, Superior Court, and the outside districts; payments collected from program participants; and interest income. Deductions include premium payments made to insurance carriers and administrative expenses. The OPEB Program's administrative costs are paid for by the participating employers and members, not from the Pension Plan's assets except as to LACERA's share as an employer.

OPEB Reserve Account: This account was established by the Board of Retirement to help stabilize health insurance premium rates over time. Annual surpluses and deficits for the various insurance plans result from the difference between premiums received and the healthcare costs incurred. The accumulated surplus is held in this account to address deficits and/or emergency premiums. Additions include rebates from insurance carriers and other income. Deductions include management fees and County-authorized payments to offset waived premium costs (e.g., insurance premium holidays) for both the County and affected program participants. In 2013, the LACERA Board of Retirement adopted a policy that established an account balance reserve target of 20 percent of the total annual premium cost by plan for indemnity medical and dental/vision plans.

Benefit Provisions

Retirement benefit vesting occurs when a member accumulates five years of creditable service under contributory plans or accumulates 10 years of creditable service under the general service non-contributory plan. Depending on the retirement plan, benefits—according to applicable statutory formula—are based upon 12 or 36 months of average compensation, age at retirement, and length of service as of the retirement date. Vested members who terminate employment before retirement age are considered terminated vested (deferred) members. Service-connected disability benefits may be granted regardless of length of service. Five years of service are required for nonservice-connected disability eligibility, according to applicable statutory formula. Members of the non-contributory plan, who are covered under separate long-term disability provisions not administered by LACERA, are not eligible for disability benefits provided by LACERA. A Summary of Major Program Provisions for the Pension Plan is available upon request by contacting LACERA or visiting the LACERA website. OPEB Program provisions are explained in Note N — OPEB Program.

Cost-of-Living Adjustment (COLA)

Each year, the LACERA Board of Retirement considers how the change in the cost-of-living, a measure of inflation, has affected the purchasing power of monthly retirement benefit allowances paid by LACERA. The cost-of-living is measured by the Bureau of Labor Statistics, which releases the Consumer Price Index (CPI) for all Urban Consumers in the Los Angeles-Long Beach-Anaheim area as of January 1 each year. The difference between the current and previous year's CPI shows whether the cost-of-living has increased or decreased within this geographic region during the past year.

If the CPI has increased up to 3 percent for Plan A members or 2 percent for all other retired members, the LACERA Board of Retirement may grant a cost-of-living adjustment (COLA) increase for monthly allowances. If the CPI has decreased, it is possible for the LACERA Board of Retirement to decrease monthly allowances; however, a decrease in allowances has never occurred. In any event, a cost-of-living decrease could not reduce a member's allowance to an amount less than the allowance received at the time of retirement.

CERL also allows the amount of any CPI cost-of-living increase in any year that exceeds the maximum annual change of 3 percent or 2 percent in retirement allowances to be accumulated and tracked. The accumulated percentage carryover is known as the COLA Accumulation, which under certain circumstances may be applied to retirement allowances in future years when the cost-of-living does not exceed the maximum adjustment. COLA adjustments require approval from the Board of Retirement.

LACERA members may receive more than one type of COLA:

COLA ("April 1st COLA")

The COLA percentage adjustment is effective annually on April 1. Members who retire prior to April 1 or eligible survivors of members who died prior to April 1 are eligible for that year's COLA. The adjustment begins with the April 30 monthly allowance. The COLA provision was added to CERL in 1966, and LACERA's first COLA was granted July 1, 1967. Until 2002, only contributory members were eligible for COLA.

Plan E COLA

Effective June 4, 2002, Plan E members and their survivors are also eligible for a COLA. The portion of the COLA percentage received by each Plan E member is a ratio of the member's service credit earned on and after June 4, 2002 to total service credit. The portion of the full increase not awarded may be purchased by the member.

Supplemental Targeted Adjustment for Retirees (STAR) Program

In addition to cost-of-living adjustments, the CERL also provides the LACERA Board of Retirement the authority to grant supplemental cost-of-living adjustments for retirement benefits. Under this program, known as the STAR Program, excess earnings may be used to restore retirement allowances to 80 percent of the purchasing power held by retirees at the time of retirement. STAR applies to contributory plans only. Retirees and survivors whose allowances have lost more than 20 percent of their purchasing power are eligible for STAR Program benefits. The STAR percentage increase is effective annually on January 1.

Future ad hoc or permanent retirement benefit increases under the STAR Program will be subject to approval by the LACERA Board of Retirement on an annual basis, provided sufficient excess earnings are available as determined by the LACERA Board of Investments. Ad hoc STAR benefits are payable only for the calendar year approved. Permanent STAR benefits become part of the member's retirement allowance and are payable for life.

Except for program year 2005, the LACERA Board of Retirement made permanent the 2001 through 2009 STAR benefits at an 80 percent level, as authorized in the CERL. For program years 2010 through 2022, STAR benefits were not provided due to minimal increases in the CPI percentage such that all eligible members maintained COLA Accumulation accounts below the 20 percent threshold for providing STAR benefits.

The STAR Program has received $1.523 billion in funding from the program's inception in 1990 to the present. Ad hoc STAR Program costs from 1990 through 2001 reduced the STAR Program reserve by $556 million. Subsequently, except for program year 2005, the LACERA Board of Retirement made permanent the 2001 through 2009 STAR benefits totaling $353 million, which was transferred to employer reserves to invest and pay for permanent STAR benefits awarded. As of June 30, 2022, there is $614 million remaining in the STAR reserve to fund future STAR Program benefits.

The STAR Program is administered on a calendar-year basis. The Statistical Section contains a 10-year trend schedule of STAR Program costs.

NOTE B — Summary of Significant Accounting Policies

Reporting Entity

LACERA, with its own two governing Boards, is an independent governmental entity separate and distinct from the County of Los Angeles (County). Due to the nature of the relationship between LACERA and the County, LACERA's Pension Plan and OPEB Trust funds are reflected as fiduciary funds within the County's basic financial statements. The OPEB Custodial Fund reports fiduciary activities that are conducted by LACERA on behalf of the County without a trust or equivalent arrangement. Maintaining appropriate controls and preparing the financial statements are the responsibility of LACERA management. LACERA's Audit Committee and the Chief Audit Executive assist the LACERA Board of Retirement and Board of Investments (Boards) in fulfilling their fiduciary oversight responsibilities for the organization's financial reporting process, values and ethics, internal controls, compliance with laws and regulations, and risk management.

Method of Reporting

LACERA follows the Generally Accepted Accounting Principles in the United States of America (U.S. GAAP) as applicable to governmental units. Accounting and financial reporting pronouncements that guide LACERA are promulgated by the Governmental Accounting Standards Board (GASB).

The financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting to reflect LACERA's overall operations. Revenue is recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Employer and employee contributions are recognized in the period in which the contributions are due, pursuant to legal requirements. Benefits and refunds are recognized when due and payable in accordance with the terms of each benefit plan.

OPEB Custodial Fund and OPEB Trust Fund Presentation

The OPEB Custodial Fund and OPEB Trust Fund are presented in the Statement of Fiduciary Net Position and the Statement of Changes in Fiduciary Net Position as part of the Basic Financial Statements.

The OPEB Custodial Fund captures the annual financial operating activity of the OPEB Program for all participating employers (i.e., County, Court, and LACERA), including the outside districts. Plan sponsors and members provide monthly funding using a pay-as-you-go methodology, which LACERA uses to pay healthcare premiums including administrative fees, as well as other healthcare benefits provided by the OPEB Program. LACERA acts as a custodian for these funds on behalf of the plan sponsors and participants. Actual amounts paid out by LACERA in the form of benefits and reimbursed to LACERA in the form of contributions are included within the OPEB Custodial Fund. Residual balances (contributions that exceed benefit payments) are reported at fiscal year-end, held on behalf of plan sponsors, and made available to fund current benefit payments in subsequent fiscal years.

OPEB Trust financial activity includes receiving prefunding contributions provided by plan sponsors either quarterly or on an annual basis. Funds are set aside and placed in trust to earn investment income and interest, which is held and used to provide future OPEB benefits at the plan sponsors' discretion. Investment income activity is reported in the OPEB Trust. For financial statement presentation purposes, GASB standards require that employer contributions within the OPEB Trust be increased by the monthly pay-as-you-go costs and included as additions to the OPEB Trust that will not be reimbursed to the employers using OPEB Trust assets. Matching expenses are charged as service benefits to the OPEB Trust through deductions, which also include administrative expenses (per paragraphs 28a and 31 of GASB Statement Number 74). See Note Q for OPEB Trust prefunding contributions from participating employers.

Capital Assets (Including Intangible Assets)

Capital assets are items that benefit the organization for more than one fiscal year. LACERA's potential capital assets are largely held in information technology systems. The information technology environment is continuously changing, causing frequent alterations and upgrades. As such, LACERA treats these items as budgeted expenses, as they are immaterial to LACERA's overall financial statements. Management reviewed and considered all expenses that could be capitalized as capital or intangible assets and determined these items to be appropriately classified as expenses for the current fiscal year.

Accrued Vacation and Sick Leave

Employees who terminate or retire from active employment are entitled to full compensation for all unused vacation time and a percentage of their unused sick leave time. The accrued vacation and sick leave balances for LACERA employees as of June 30, 2022 and 2021 were $5.4 million and $5.3 million, respectively.

Cash and Short-Term Securities

Cash includes deposits with various financial institutions, the County, and non-U.S. currency holdings, translated to U.S. dollars using the exchange rates in effect at June 30, 2022 and 2021.

LACERA classifies fixed income securities with a maturity of 12 months or less as short-term investments. Foreign exchange contracts held in pending status are also included in this category.

Real Estate Separate Account Investments

LACERA's real estate investments utilize several different types of legal structures called special purpose entities (SPEs), including title holding corporations (THCs) and limited liability companies (LLCs). The THCs are nonprofit corporations under §501(c)(25) and §501(c)(2) of the Internal Revenue Code (IRC). The LLCs do not have tax-exempt status, but their income is excludable from taxation under IRC §115. Both THCs and LLCs invest in real estate assets located throughout the United States. Under GASB Statement Number 72, *Fair Value Measurement and Application*, the THCs and LLCs meet GASB's definition of an investment and therefore are included in the accompanying financial statements presented as investments at fair value. For additional information, see Note J — Special Purpose Entities.

Fair Value of Investments

Investments are carried at fair value. Fair values for investments are derived by various methods, as indicated in the following chart:

Investments	Source
Publicly Traded Securities, such as stocks and bonds. Bonds include obligations of the U.S. Treasury, U.S. agencies, non-U.S. governments, and both U.S. and non-U.S. corporations. Also included are mortgage-backed securities and asset-backed securities.	Valuations are provided by LACERA's custodian based on end-of-day prices from external pricing vendors. Non-U.S. securities reflect currency exchange rates in effect at June 30, 2022 and 2021.
Whole Loan Mortgages	For the LACERA Member Home Loan Program, valuation is performed by LACERA staff based on loan information provided by Ocwen Financial Corporation, the program's mortgage servicer, with fair market value adjustments based on the market returns of the Bloomberg Barclays mortgage-backed securities index.
Real Estate Equity Commingled Funds[1]	Fair value as provided by real estate fund managers, based on review of cash flow, exit capitalization rates, and market trends. Fund managers commonly subject each property to independent third-party appraisal annually. Investments under development are carried at cumulative cost until development is completed.
Real Estate: Special Purpose Entities, including Title Holding Corporations and Limited Liability Companies[1]	Fair value of the investment as provided by investment managers. Each property is subject to independent third-party appraisals every year.
Real Estate Debt Investments[1]	Fair value for real estate debt investments as provided by investment managers.
Private Equity and Real Assets[1]	Fair value provided by investment managers as follows: Private investments—valued by the general partner giving consideration to financial condition and operating results of the portfolio companies, nature of investment, marketability, and other factors deemed relevant. Public investments—valued based on quoted market prices, less a discount, if appropriate, for restricted securities.

Investments	Source
Public Market Equity and Fixed Income Investments Held in Institutional Commingled Fund/Partnership[1]	Fair value is typically provided by third-party fund administrator, who performs this service for the fund manager.
Derivatives	Over-the-counter derivatives (other than currency forwards) valuations are provided by the fund managers. Currency forward contracts are valued by the custodian bank.
Hedge Fund of Funds[1]	Valuation of the underlying funds is performed by those funds' general partners. Valuation of the fund of funds portfolios are provided by third-party administrators and by the general partner for the portfolios held in limited partnership vehicles.

[1]These assets are reported by LACERA based on the practical expedient allowed under GAAP.
Note: The fair value hierarchy is provided in Note P — Fair Value of Investments.

There are certain market risks, credit risks, foreign currency exchange risks, liquidity risks, and event risks that may subject LACERA to economic changes occurring in certain industries, sectors, or geographies. For additional information, see Note G — Deposit and Investment Risks.

Dividend income is recorded on the ex-dividend date. Other investment income is recorded as earned on an accrual basis.

PENSION PLAN INVESTMENTS

Investment Policy Statement

The allocation of investment assets within the LACERA Defined Benefit Pension Plan (Pension Plan) investment portfolio is approved by the LACERA Board of Investments, as outlined in the LACERA Investment Policy Statement (IPS). Pension Plan (or Fund) assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status of the liabilities for the benefits provided through the Pension Plan. The IPS calls for an asset liability study to be conducted no later than every three to five years.

In November 2018, the LACERA Board of Investments adopted a restated IPS to address topics such as Legal Authority, Investment Philosophy and Strategy, Investment Process, Risk Management, Roles and Responsibilities, Asset Allocation and Benchmarks, and Delegated Authorities. In addition, the IPS includes several related policies as attachments: Corporate Governance Principles, Corporate Governance Policy, Responsible Contractor Policy, Emerging Manager Policy, and Placement Agent Policy.

The LACERA Board of Investments and internal staff implement asset allocation targets through the use of external managers who manage portfolios using active and passive investment strategies.

Financial statements were prepared using traditional investment asset classifications (i.e., equity, fixed income, private equity, real assets, real estate, and hedge funds). In the following table and in the Investment Section, investment information is presented in functional asset categories. LACERA's Board of Investments developed and practices its Investment Beliefs, which state that long-term strategic allocation will be the determinant of LACERA's risk/return outcomes. Based on the Pension Trust Asset Allocation Study completed by Meketa Investment Group (Meketa) in March 2018, the Board of Investments approved the use of a functional framework developed by LACERA's Investment Office for modeling purposes, which offers the inclusion of a broader group of investments within Credit and Real Assets and Inflation Hedges. The functional categories include various asset classes that represent the risk/return characteristics of each area. LACERA expects the four functional categories to diversify the Fund, generate returns, and optimize growth, while mitigating downside risk, ultimately to build a portfolio that can meet LACERA's future benefit obligations. The asset allocation determines what proportion of the Fund is allocated to each functional category and underlying asset class, including target weights and allowable ranges as a percentage of the Fund.

Schedule of Target Allocation and Long-Term Expected Rate of Return

For the Fiscal Year Ended June 30, 2022 and 2021

Asset Class	2022 Target Allocation (Policy)	2022 Weighted Average Long-Term Expected Real Rate of Return (After Expected 2.75% Inflation Rate) (Geometric)	2021 Target Allocation (Policy)	2021 Weighted Average Long-Term Expected Real Rate of Return (After Expected 2.75% Inflation Rate) (Geometric)
Growth	**51.0%**	**5.5%**	**47.0%**	**5.3%**
Global Equity	34.0%	4.3%	35.0%	4.2%
Private Equity	14.0%	6.9%	10.0%	6.1%
Non-Core Private Real Estate	3.0%	6.7%	2.0%	6.3%
Credit	**11.0%**	**2.2%**	**12.0%**	**1.7%**
Liquid Credit	6.0%	1.5%	9.0%	3.6%
Illiquid Credit	5.0%	2.8%	3.0%	2.3%
Real Assets and Inflation Hedges	**17.0%**	**3.6%**	**17.0%**	**3.2%**
Core Private Real Estate	6.0%	3.3%	7.0%	2.9%
Natural Resources and Commodities	4.0%	3.7%	4.0%	3.2%
Infrastructure	4.0%	4.8%	3.0%	4.5%
TIPS	3.0%	(0.3)%	3.0%	(0.9)%
Risk Reduction and Mitigation	**21.0%**	**0.2%**	**24.0%**	**(0.4)%**
Investment Grade Bonds	13.0%	(0.3)%	19.0%	(0.9)%
Diversified Hedge Funds	5.0%	1.6%	4.0%	1.7%
Long-Term Government Bonds	2.0%	—%	—%	—%
Cash Equivalents	1.0%	(1.0)%	1.0%	(1.6)%

Target Allocation

The LACERA Board of Investments approved the current target allocation as a result of the Asset Allocation Study completed by Meketa in May 2018. At the time, the Board adopted asset allocation targets to provide for asset diversification in an effort to meet LACERA's actuarial assumed rate of return, consistent with market conditions and risk control. In May 2021 LACERA completed an asset allocation exercise, and the Board approved revised target weights at its May 2021 meeting. Transition to the first phase of the revised target allocation occurred during this fiscal year with the final target weights expected to be achieved in the upcoming fiscal year.

Weighted Average Long-Term Expected Real Rate of Return

The long-term expected real rate of return on Pension Plan investments is based on inflation expectations and nominal return expectations developed by Meketa for each asset class. In the case of the total portfolio and broad asset groupings (e.g., Growth, Credit), investment returns are calculated using a portfolio approach that first calculates nominal expected returns by incorporating target weights, nominal expected returns, and volatility and correlations estimates for each asset class, adjusted by the defined return period. Nominal expected returns for each asset class are then converted to real expected returns by adjusting them for inflation, using a base inflation rate assumption of 2.75 percent.

A simple weighted sum of asset class returns will not yield the results shown on the table given the process followed to adjust for inflation, the compounding to a given time period, and the impact of volatility and correlations to the portfolio.

GASB Discount Rate

GASB Statement Number 67 requires determination of whether the Pension Plan's Fiduciary Net Position is projected to be sufficient to make projected benefit payments. The discount rate used to measure the Total Pension Liability (TPL) was 7.13 percent. This rate reflects the long-term assumed rate of return on assets for funding purposes of 7.00 percent, net of all expenses, increased by 0.13 percent, gross of administrative expenses.

The valuation assumption for the long-term expected return is reassessed in detail at the triennial investigation of experience, and is set based on a long-term time horizon; the most recent analysis was completed in January 2020. See Milliman's Investigation of Experience for Retirement Benefit Assumptions report for the period July 1, 2016–June 30, 2019 for more details. The assumption for the long-term expected return is reviewed annually for continued compliance with the relevant actuarial standards of practice. As part of this assessment, Milliman compares the assumption with the 20-year expected geometric return determined by

LACERA's investment consultant, Meketa, and other measures of expected long-term returns.

The projection of cash flows used to determine the discount rate assumed that Pension Plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rates. Based on those assumptions, the Pension Plan's Fiduciary Net Position was projected to be sufficient to pay projected benefit payments in all future years. Therefore, the long-term expected rate of return on Pension Plan investments was applied to all periods of projected benefit payments to determine the TPL.

Money-Weighted Rate of Return

The annual money-weighted rate of return on Pension Plan investments, net of investment expenses as of the fiscal years ended June 30, 2022 and 2021, were 0.6 percent and 25.2 percent, respectively. The money-weighted rate of return is a measure of the performance of an investment calculated by finding the rate of return that will set the present values of all cash flows equal to the value of the initial investment. This method is equivalent to the internal rate of return. Historical returns are presented in the Schedule of Investment Returns — Pension Plan in the Required Supplementary Information Section.

Time-Weighted Rate of Return

The annual time-weighted rate of return on Pension Plan investments, net of investment expenses as of the fiscal years ended June 30, 2022 and 2021, were 0.1 percent and 25.2 percent, respectively. The time-weighted rate of return is a measure of the compound rate of growth in a portfolio. This measure is often used to compare the performance of investment managers because it eliminates the distorting effects on growth rates created by inflows and outflows of money. The time-weighted return breaks up the return on an investment portfolio into separate intervals based on whether money was added or withdrawn from the fund. Historical returns are presented in the Investments Results Based on Fair Value — Pension Plan in the Investment Section.

Use of Estimates

The preparation of LACERA's financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes to the financial statements. Actual results may differ from these estimates.

Reclassifications

Comparative data for the prior year have been presented in the selected sections of the accompanying Statement of Fiduciary Net Position and Statement of Changes in Fiduciary Net Position.

GASB PRONOUNCEMENTS

Leases

In June 2017, the GASB issued Statement Number 87 (GASB 87), *Leases*, which improves accounting and financial reporting for leases by governments. This statement requires recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. Under this statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources.

LACERA completed a thorough evaluation of GASB 87, *Leases*, and determined that LACERA does not need to apply the GASB 87 recognition and measurement criteria to the current lease population. Therefore, there are no new lease disclosures included in LACERA's June 30, 2022 financial statements. LACERA's office space is located in the Gateway Plaza building, which is held by LACERA as an investment, to which GASB 87, Paragraph 41 provides an exclusion for investments measured and reported at fair value. LACERA Gateway Property, Inc, as the owner of Gateway Plaza and lessor, has not issued debt for which the principal and interest payments are secured by the lease payments. For disclosures regarding LACERA's fair value of investments and office space lease, please refer to Note P — Fair Value of Investments and Note K — Related Party Transactions, respectively.

Subscription-Based Information Technology Arrangements

GASB issued Statement Number 96, *Subscription-Based Information Technology Arrangements* (SBITAs), to establish SBITAs as intangible assets with a corresponding subscription liability for contracts that convey control of the right to use another party's information technology software. The objective of this Statement is to better meet the information needs of financial statement users by a) establishing uniform accounting and financial reporting requirements for SBITAs, b) improving the comparability of financial statements among governments that have entered into SBITAs, and c) enhancing the understandability, reliability, relevance, and consistency of information about SBITAs. This statement also brings the guidance on the accounting and financial reporting for SBITAs in line with that of GASB 87, Leases. LACERA did not apply measurement and disclosure criteria under GASB 87 and will review the requirements of GASB 96 effective for the fiscal year ending June 30, 2023.

NOTE C — Pension Plan Contributions

Funding Policy

In 1994, the County issued $2 billion in pension obligation bonds to fully fund the LACERA retirement benefits plan based on the amount of LACERA's unfunded liability at that time. This required a Retirement System Funding Agreement (Funding Agreement) between the Los Angeles County Board of Supervisors and the LACERA Board of Retirement and Board of Investments establishing the retirement system's funding policy for the next 15 years. With completion of the June 30, 2008 retirement benefit actuarial valuation, the Funding Agreement's terms dictating funding policy, including the treatment of the STAR Reserve, became unenforceable. As such, the LACERA Board of Investments created a Retirement Benefit Funding Policy (Funding Policy) to provide LACERA's plan actuary direction in performing retirement benefit actuarial valuations.

In December 2009, the LACERA Board of Investments adopted this Funding Policy, which was later amended in February 2013 to conform to the new standards mandated in the California Public Employees' Pension Reform Act of 2013 (PEPRA). The Funding Policy requires actuarial valuations to be performed annually to determine employer and employee contribution rates.

Member and Employer Contribution Rates

Members and employers contribute to LACERA based on unisex rates recommended by an independent consulting actuary and adopted by the LACERA Board of Investments and thereafter the Los Angeles County Board of Supervisors. Contributory plan members are required to contribute between approximately 6 percent and 18 percent of their annual covered salary. Member and employer contributions received from the outside districts constitute part of LACERA's Pension Plan as a whole.

Participating employers are required to contribute the remaining amounts necessary to finance the coverage of their employees' (members') pension benefits through monthly or annual prefunded contributions at actuarially determined rates. Rates for contributory plan members who entered the Pension Plan prior to January 1, 2013 are based upon plan entry age and plan-type enrollment. The PEPRA-mandated retirement plan contributions for new members who enter the system on and after January 1, 2013 are based on a single flat-rate percentage that varies by plan and are structured in accordance with the required 50/50 normal cost-sharing between the employer and the member.

Both member rate methodologies are actuarially designed for the members, as a group, to make contributions into the Pension Plan, which when combined with employer contributions and investment earnings, provide sufficient funding for their benefits. As a result of collective bargaining, actual member contribution rates for various plan types are controlled through these agreements and through additional employer contributions (for some contributory plans), known as the surcharge amount, which is subject to change each year. As required by GASB Statement Number 82, member contributions paid by the employer are reported within the member contribution amounts.

The employer contribution rate is composed of the normal cost and the UAAL amortization payment. The normal cost is the portion of the actuarial present value of retirement benefits attributable to the current year of service. Amortization is payments made for prior year unfunded benefits not provided by future normal costs. The employer normal cost rate from the latest actuarial valuation as of June 30, 2021 slightly decreased from 10.89 percent to 10.88 percent, and the employers' required contribution rate to finance the UAAL decreased from 14.85 percent to 13.58 percent. Effective with the June 30, 2019 valuation, all new UAAL layers are amortized over a 20-year period, beginning with the date the contribution is first expected to be made. In addition, all existing amortization layers were set to be amortized over a maximum 22-year period and now have a period of 20 years or less, so they are fully amortized no later than 2042. Member contribution rates decreased for PEPRA members, with General Plan G moving down from 9.10 percent to 9.08 percent and Safety Plan C decreasing slightly from 14.42 percent to 14.33 percent, effective with the 2021 Actuarial Valuation. There was no change in contribution rates for the other retirement plans.

Experience Study

At its January 2020 meeting, the BOI adopted a 3.29 percent increase in the employer contribution rate due to the 2019 experience study. The impact of the increase was reduced by a three-year phase-in approach. The calculated total employer contribution rate effective July 1, 2021 would have been 25.74 percent but was reduced by 1.10 percent, resulting in an employer contribution rate of 24.64 percent.

The total employer contribution rate decreased 0.18 percent from the previous valuation as of June 30, 2020 (from 24.64 percent in 2021 to 24.46 percent 2022). This was primarily due to the recognition of the current year's investment gains being largely offset by the increase from the phase-in of the final portion of the 2019 assumption and method changes, where the recognition was deferred in the prior valuation. For the fiscal year beginning July 1, 2022, the 24.46 percent reflects the full three-year phase-in of increased employer contributions rate due to the new assumptions adopted based on the 2019 experience study.

Contribution Payments

For the fiscal years ended June 30, 2022 and June 30, 2021, Los Angeles County, including the Superior Court and LACERA, as well as the outside districts, paid their employer contributions and withholding of employee pension plan contributions due to LACERA in the form of cash payments. For the fiscal years ended June 30, 2022 and June 30, 2021, employer contributions totaled $2.2 billion and $2.0 billion, respectively, and member contributions totaled $759 million and $761 million, respectively.

Pension Plan Contributions

For the Fiscal Years Ended June 30, 2022 and 2021

(Dollars in Thousands)

	2022	2021
Employers		
Los Angeles County[1]	**$2,122,282**	$1,940,715
Superior Court	**77,450**	72,021
Local Agency Formation Commission for the County of Los Angeles	**148**	133
South Coast Air Quality Management District[2]	**—**	—
Little Lake Cemetery District	**9**	8
Los Angeles County Office of Education[3]	**—**	—
Total Employer Contributions	**$2,199,889**	$2,012,877
Member Contributions[4]	**$758,632**	$760,994
Total Contributions	**$2,958,521**	$2,773,871

[1]LACERA contributions are included with Los Angeles County.

[2]South Coast Air Quality Management District has no active members contributing to the Pension Plan for the fiscal years ended 2022 and 2021.

[3]Los Angeles County Office of Education has no active members contributing to the Pension Plan for the fiscal years ended 2022 and 2021.

[4]In accordance with GASB Statement No. 82, payments made by an employer to satisfy member contribution requirements are classified as member contributions.

NOTE D — Pension Plan Reserves

LACERA includes Pension Plan reserve accounts within its financial records for various operating purposes as outlined in LACERA's reserves accounting policies. Reserves are established from member and employer contributions and the accumulation of realized investment income after satisfying investment and administrative expenses. With the exception of the reserves required by CERL, reserves are neither required nor recognized under generally accepted accounting principles in the United States of America (i.e., U.S. GAAP). They are not shown separately on the Basic Financial Statements (i.e., Statement of Fiduciary Net Position), although the sum of these reserves equals the Fiduciary Net Position Restricted for Benefits. The reserves do not represent the present value of assets needed, as determined by the actuarial valuation, to satisfy retirement and other benefits as they become due. Instead, the balances contained within the Fiduciary Net Position Restricted for Benefits, when combined with future investment earnings and contributions from members and employers, are used to satisfy member retirement benefits.

Pension Plan

LACERA's major classes of Pension Plan reserves are:

Member Reserves

Member Reserves represent the balance of member contributions. Additions include member contributions and realized investment earnings. Deductions include annuity payments to retirees, contribution refunds to members, and related expenses.

Employer Reserves

Employer Reserves represent the balance of employer contributions for future retirement payments to current active members. Additions include contributions from employers and realized investment earnings. Deductions include annuity payments to retired members, lump-sum death/burial benefit payments to members' survivors, and supplemental disability payments.

Supplemental Targeted Adjustment for Retirees (STAR) Reserve

STAR Reserve represents the balance of transfers from the Contingency Reserve for future supplemental cost-of-living adjustment (COLA) increases. During fiscal years 1995–1999, 25 percent of excess earnings were credited to the STAR Reserve, pursuant to the 1994 Retirement System Funding Agreement between LACERA and the County. Additions include transfers from the Contingency Reserve. Deductions include STAR Program payments to retirees and funding for permanent benefits. In October 2008, except for Program Year 2005, the LACERA Board of Retirement made permanent the 2001 through 2009 STAR programs at an 80 percent level, as authorized in the County Employees Retirement Law of 1937 (CERL). For program years 2010 through 2021, additional STAR benefits were not provided. There were no new retirees or beneficiaries entitled to additional STAR benefits for Program Year 2022 due to modest increases in the Consumer Price Index (CPI). Thus, all eligible members had COLA Accumulation accounts below the 20 percent threshold for providing STAR benefits.

STAR Program awards are subject to approval by the Board of Retirement on an annual basis, provided sufficient excess earnings are available in the STAR Reserve. The Board of Retirement may approve ad hoc STAR benefits that are payable only for the calendar year approved or permanent STAR benefits that become part of the member's retirement allowance and are payable for life.

Contingency Reserve

Contingency Reserve represents reserves accumulated for future earning deficiencies, investment losses, and other contingencies. Additions include realized investment earnings and other revenues. Deductions include investment expenses; administrative expenses; interest allocated to other reserves, in priority order, to the extent that realized earnings are available for the six-month period, as defined in the 2009 Retirement Benefit Funding Policy (Funding Policy) amended in 2013 and approved by the LACERA Board of Investments; and funding of the STAR Reserve when excess earnings are available and benefits are authorized by the LACERA Board of Retirement. For the fiscal years ended June 30, 2022 and 2021, the net investment realized earnings were applied as interest credits to the Reserve accounts in priority order as defined by the Funding Policy, leaving no available credits for the Contingency Reserve.

Pension Plan Reserves

As of June 30, 2022 and 2021

(Dollars in Thousands)

	2022	2021
Member Reserves	**$25,804,263**	$24,646,373
Employer Reserves	**32,011,255**	29,026,898
STAR Reserve	**614,011**	614,011
Contingency Reserve	**—**	147,104
Total Reserves at Book Value	**$58,429,529**	$54,434,386
Unrealized Investment Portfolio Appreciation	**$11,860,083**	$18,577,640
Total Reserves at Fair Value[1]	**$70,289,612**	$73,012,026

[1]Total Reserves at Fair Value equals the Fiduciary Net Position Restricted for Benefits as presented in the Basic Financial Statements.

NOTE E — Pension Plan Liabilities

The County Employees Retirement Law of 1937 (CERL) requires an actuarial valuation to be performed at least every three years for the purpose of measuring the Pension Plan's funding progress and setting employer and employee contribution rates. LACERA exceeds this requirement by engaging an independent actuarial consulting firm to perform an actuarial valuation for the Pension Plan annually. Employer contribution rates and employee contribution rates for new retirement plans are established under the California Public Employees' Pension Reform Act of 2013 (PEPRA) and may be updated each year as a result of the valuation.

LACERA engages an independent actuarial consulting firm to perform an investigation of experience (experience study) at least every three years, which is guided by actuarial practices and consistent with CERL requirements. The economic and demographic assumptions are reviewed and updated as deemed necessary each time an experience study is completed. The experience study and corresponding annual valuation are the basis for changes in employer and employee contribution rates for both PEPRA and legacy retirement plans necessary to properly fund the Pension Plan.

The LACERA Board of Investments adopted some new assumptions beginning with the June 30, 2019 actuarial valuation based on the actuary's recommendation upon completing the 2019 triennial experience study. Some assumptions from prior experience studies were reaffirmed and carried forward. For financial reporting purposes, LACERA reviews these assumptions annually to ensure they continue to represent appropriate plan assumptions under U.S. GAAP.

Actuarial Assumptions

Actuarial valuations of an ongoing benefits plan involve assumptions about the probability of the occurrence of events far into the future. Examples include assumptions about future employment, mortality, cost trends, assumed rate of return, inflation, and other demographic and economic changes over time. Actuarially determined assumptions are subject to continual review or modification as actual experience is compared with past expectations, and new estimates are made about the future. Benefit projections for financial reporting purposes are based on the adopted assumptions, actual Pension Plan demographics, and include the types of benefits provided at the time of each valuation.

Employer contribution rate increases were phased in over a three-year period when new assumptions were adopted based on the 2019 triennial experience study. Instead of immediately recognizing the new employer contribution rates in the first year, the employer rates were stepped up over time with rates slightly higher in the third year as compared to if the new employer contribution rates were fully recognized in the first year. The phase-in of increases in employer contributions over a three-year period supports LACERA's fiduciary duty of legal authority set forth in the California Constitution, Article XVI, Section 17(a) to minimize the financial impact to the employer where it does not conflict with the paramount fiduciary duty to provide benefits to members and their beneficiaries.

The Total Pension Liability (TPL) as of June 30, 2022 was determined by completing a roll-forward calculation based on the actuarial valuation conducted as of June 30, 2021, using the following actuarial assumptions in accordance with the requirements of GASB Statement Number 67 (GASB 67). The actuarial funding valuation serves as a basis for the GASB 67 financial reporting information. All actuarial methods and assumptions used for this GASB analysis were the same as those used for the June 30, 2021 funding valuation, except where differences are noted. Key actuarial methods and significant assumptions used to calculate the TPL are presented as follows. For additional information regarding the actuarial valuation, refer to the Actuarial Section.

Actuarial Methods and Significant Assumptions

Description	Method
Actuarial Cost Method	Individual entry age.
Discount Rate	7.13 percent, net of Pension Plan investment expense, including inflation. This rate was adopted beginning with the June 30, 2019 valuation.
Price Inflation	2.75 percent annual rate. This rate was adopted beginning with the June 30, 2016 valuation and reaffirmed in the 2019 triennial experience study.
General Wage Growth and Projected Salary Increases	General wage growth: 3.25 percent. Projected salary increases: 3.51 percent to 12.54 percent. This rate was adopted beginning with the June 30, 2016 valuation. The rate was reaffirmed in the 2019 triennial experience study.
Cost-of-Living Adjustments	Post-retirement benefit increases of either 2.75 percent or 2 percent per year (a pro-rata portion for Plan E) are assumed. For the Total Pension Liability, STAR COLA (supplemental cost-of-living adjustments) benefits are assumed to be substantively automatic at the 80 percent purchasing power level until the STAR Reserve is projected to be insufficient to pay further STAR benefits. This roll-forward calculation includes a future liability for STAR COLA benefits. See Note A — Plan Description for additional COLA and STAR COLA information.
Mortality	Various rates based on the Pub-2010 mortality tables and using the MP–2014 Ultimate Projection Scale for expected future mortality improvement. This assumption was adopted with the June 30, 2019 valuation.

Other Key Assumptions

Other key actuarial assumptions used to calculate the TPL as of the June 30, 2022 and 2021 measurement dates are the same as those used to prepare actuarial funding valuations for June 30, 2021 and 2020, respectively.

Net Pension Liability

GASB 67 requires public pension plans to provide the calculation of the Net Pension Liability (NPL). The NPL is measured as the Total Pension Liability less the amount of the Pension Plan's Fiduciary Net Position. For the *Schedule of Net Pension Liability and Related Ratios* and the *Schedule of Changes in Net Pension Liability and Related Ratios*, see the Required Supplementary Information Section.

The NPL is an accounting measurement for financial statement reporting purposes. The funded status of the Pension Plan is calculated separately by the consulting actuary and the results, along with other funding metrics, are included in the actuarial valuation report. The components of LACERA's (the Pension Plan's) NPL at fiscal year-end June 30, 2022 and 2021 were as follows:

Schedule of Net Pension Liability

For the Fiscal Years Ended June 30, 2022 and 2021
(Dollars in Thousands)

	2022	2021
Total Pension Liability	**$83,931,424**	$80,303,904
Less: Fiduciary Net Position	**(70,289,612)**	(73,012,026)
Net Pension Liability	**$13,641,812**	$7,291,878
Fiduciary Net Position as a Percentage of Total Pension Liability	**83.75%**	90.92%

The TPL increased from fiscal year 2021 due to the normal operations of LACERA, including the cost of benefits earned over the period (service cost), interest on the TPL, and benefit payments. The NPL increased primarily due to negative investment returns for the fiscal year ended June 30, 2022, compared to the expected investment return of 7.0 percent.

GASB Discount Rate

Milliman's January 2020 Investigation of Experience analysis was used to develop the 7.13 percent assumption used for the current reporting date. This is equal to the 7.00 percent long-term investment return assumption adopted by the Board of Investments (net of investment and administrative expenses), plus 0.13 percent assumed administrative expenses.

The plan's projected Fiduciary Net Position, after reflecting employee and employer contributions, was expected to be sufficient to make all future benefit payments of current active and inactive employees. Therefore, the discount rate for calculating the TPL as prescribed by GASB, is equal to the long-term expected rate of return, plus administrative expenses.

GASB Discount Rate

For the Fiscal Years Ended June 30, 2022 and 2021

	2022	2021
GASB Discount Rate	**7.13 %**	7.13 %
Long-Term Expected Rate of Return, Net of Expenses	**7.00 %**	7.00 %
Municipal Bond Rate	**N/A**	N/A

Sensitivity Analysis

In accordance with GASB 67, sensitivity of the NPL to changes in the discount rate must be reported. The following presents the NPL, calculated for the fiscal year ended June 30, 2022, using the discount rate of 7.13 percent, as well as the results of NPL calculations using a discount rate that is 1 percentage point lower (6.13 percent) or 1 percentage point higher (8.13 percent) than the current rate (7.13 percent). A corresponding calculation is presented for the fiscal year ended June 30, 2021, based on the discount rate in effect for that year.

Sensitivity Analysis

For the Fiscal Years Ended June 30, 2022 and 2021

(Dollars in Thousands)

	2022			2021		
	1% Decrease [6.13%]	Current Discount Rate [7.13%]	1% Increase [8.13%]	1% Decrease [6.13%]	Current Discount Rate [7.13%]	1% Increase [8.13%]
Total Pension Liability (Asset)	$95,318,250	$83,931,424	$74,528,252	$91,186,244	$80,303,904	$71,310,939
Less: Fiduciary Net Position	(70,289,612)	(70,289,612)	(70,289,612)	(73,012,026)	(73,012,026)	(73,012,026)
Net Pension Liability/(Asset)	**$25,028,638**	**$13,641,812**	**$4,238,640**	**$18,174,218**	**$7,291,878**	**($1,701,087)**

NOTE F — Partial Annuitization of Pension Benefit Payments

In January 1987, LACERA purchased single life annuities from two insurance companies that provided pension benefit payments to a portion of retired members, referred to as covered members. Under the terms of the agreements, LACERA continues to administer all pension benefit payments to covered members. There is no effect on covered members since they retain all pension benefits accorded to LACERA members under the law—including rights to a monthly continuing allowance that is also payable to eligible survivors or beneficiaries of deceased LACERA retirees, health insurance subsidies, and any cost-of-living adjustments (COLAs) awarded. The values of the annuities are entirely allocated to covered members. In accordance with the agreements, the annuity providers make monthly annuity reimbursements to LACERA limited to the straight life annuity payments and statutory COLA increases.

LACERA is responsible for any difference in pension benefit payments payable to covered members that are not reimbursed by the insurance companies. The reimbursements received are netted against the pension and annuity payments (i.e., Retiree Payroll) reported in LACERA's financial statements. For the fiscal year ended June 30, 2022, LACERA paid $7.2 million to covered members and received $6.0 million in related reimbursements. For the fiscal year ended June 30, 2021, LACERA paid $9.3 million to covered members and received $7.6 million in related reimbursements. As the annuity providers' monthly annuity reimbursements are allocated to covered members' pension payments, the fair value of contracts was excluded from pension plan assets and actuarially determined amounts.

NOTE G — Deposit and Investment Risks

The County Employees Retirement Law of 1937 (CERL) vests the LACERA Board of Investments with exclusive control over LACERA's investment portfolio. The LACERA Board of Investments establishes Investment policy statements and investment manager guidelines for the management of the LACERA defined benefit retirement plan (Pension Plan) and the LACERA Other Post-Employment Benefits Master Trust (OPEB Master Trust or OPEB Trust). The LACERA Board of Investments exercises authority and control over the management of LACERA's Fiduciary Net Position Restricted for Benefits by setting a policy that the LACERA Investment Office staff executes either internally or through the use of prudent external experts.

Each investment policy statement recognizes that every investment asset class and type is subject to certain risks. Outlined below are the deposit and investment risks as they relate to fixed-income investments.

Credit Risk

Credit Risk is the risk that an issuer or a counterparty to an investment transaction will not fulfill its obligations, causing the investment to decline in value. LACERA seeks to maintain a diversified portfolio of fixed-income instruments in order to obtain the highest total return for the Pension Plan at an acceptable level of risk within this asset class. To control credit risk, credit quality guidelines have been established.

Investment Grade Bonds

Investment grade bonds are categorized as a component of the Risk Reduction and Mitigation functional asset category presented in the Investment Section and are subdivided into two types of strategies: Core and Core Plus, with target allocation ranges of 80 to 100 percent for Core and 0 to 20 percent for Core Plus. Investment guidelines for Core managers require that they invest predominantly in sectors represented in their benchmark index, which consists of 100 percent of bonds rated investment grade. As a result, Core portfolios consist of almost 100 percent of bonds rated investment grade by the major credit rating agencies: Moody's, S&P Global Ratings (S&P), and Fitch. Core Plus managers are afforded some latitude to deviate from the benchmark index in order to generate excess return, so investment grade bonds must make up at least 70 percent of Core Plus portfolios.

High Yield Bonds

Dedicated high yield bond portfolios are categorized in the Credit functional asset category presented in the Investment Section. By definition, high yield bonds are securities rated below investment grade. Therefore, the majority of bonds in the high yield portfolios are rated below investment grade by at least one of the major credit rating agencies: Moody's, S&P, and Fitch.

The credit portfolios allow for the assumption of more credit risk than investment grade portfolios by investing in securities that include unrated bonds, bonds rated below investment grade issued by corporations undergoing financial stress or distress, junior tranches of structured securities backed by residential and commercial mortgages, bank loans, illiquid credit, and emerging market debt. LACERA utilizes specific investment manager guidelines for these portfolios that limit maximum exposure by issuer, industry, and sector, which result in well-diversified portfolios.

The following is a schedule for the year ended June 30, 2022 of the credit quality ratings by Moody's, a nationally recognized statistical rating organization, of investments in fixed income securities. Whole loan mortgages included in the Pension Plan portfolio of $12 million are excluded from this presentation.

Credit Quality Ratings of Investments in Fixed Income Securities — Pension Plan

As of June 30, 2022

(Dollars in Thousands)

Quality Ratings	U.S. Treasuries	U.S. Govt. Agencies	Municipals	Corporate Debt/Credit Securities	Pooled Investments	Non-U.S. Fixed Income	Private Placement Fixed Income	Total	Percentage of Portfolio

Custodial Credit Risk

LACERA's contract with its custodian State Street Bank and Trust (Bank) provides that the Bank may hold LACERA's securities registered in the Bank's or its agent's nominee name in bearer form, in book-entry form, with a clearing house corporation, or with a depository, so long as the Bank's records clearly indicate that the securities are held in custody for LACERA's account. The Bank may also hold securities in custody in LACERA's name when required by LACERA. When held in custody by the Bank, the securities are not at risk of loss in the event of the Bank's financial failure, because the securities are not property (assets) of the Bank. Cash invested overnight in the Bank's depository accounts is subject to the risk that in the event of the Bank's failure, LACERA might not recover all or some of those overnight deposits. This risk is mitigated when the overnight deposits are insured or collateralized.

LACERA's policy as incorporated in its current contract with the Bank requires the Bank to certify it has taken all steps to assure all LACERA monies on deposit with the Bank are eligible for and covered by pass-through insurance, in accordance with applicable law and FDIC rules and regulations. The steps taken by the Bank include paying deposit insurance premiums when due, maintaining a prompt corrective action capital category of "well capitalized," and identifying on the Bank's records that it acts as a fiduciary for LACERA with respect to the monies on deposit. In addition, the Bank is required to provide evidence of insurance and to maintain a financial institution bond, which would cover the loss of money and securities with respect to any and all property the Bank or its agents hold in or for LACERA's account, up to the amount of the bond.

To implement certain investment strategies, some of LACERA's assets are invested in investment managers' pooled vehicles. The securities in these vehicles may be held by a different custodian other than State Street Bank and Trust.

Counterparty Risk

Counterparty risk for investments is the risk that, in the event of the failure of the counterparty to complete a transaction, LACERA would not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. LACERA and its investment managers seek to minimize the risk of loss from its counterparties by diversifying the number of counterparties, periodically reviewing their credit quality, and seeking to structure agreements so that collateral is posted on accrued gains if they reach certain size thresholds.

Concentration of Credit Risk

For diversification purposes, all investment grade and liquid credit portfolios limit the exposure to a single issuer. This limitation is typically 5 percent, but does not apply to U.S. Treasury securities, government-guaranteed debt (including G-7 countries), agency debt, agency mortgage-backed securities, and approved commingled funds and fund-of-one vehicles.

As of June 30, 2022, LACERA did not hold any investments in any one issuer that would represent 5 percent or more of the Pension Plan Fiduciary Net Position. Investments issued or explicitly guaranteed by the U.S. government and pooled investments are excluded from this requirement.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Duration is a measure of the price sensitivity of a fixed-income portfolio to changes in interest rates. It is calculated as the weighted average time to receive a bond's coupon and principal payments. The longer the duration of a portfolio, the greater its price sensitivity to changes in interest rates.

To manage interest rate risk, investment manager guidelines require that the duration of all investment grade bond portfolios must remain within a range centered around the duration of the benchmark index. This range is currently plus or minus 25 percent of the benchmark duration. Deviations from any of the stated guidelines require prior written authorization from LACERA.

The Duration in Fixed Income Securities — Pension Plan schedule for the year ended June 30, 2022 presents the duration by investment type. Whole loan mortgages included in the Pension Plan portfolio of $12 million are excluded from this presentation.

Duration in Fixed Income Securities — Pension Plan

As of June 30, 2022

(Dollars in Thousands)

Investment Type	Fair Value	Portfolio-Weighted Average Effective Duration[1]
U.S. Treasuries, U.S. Government Agency, and Municipal Instruments:		
U.S. Treasuries	$6,255,435	11.94
U.S. Government Agency	879,765	4.26
Municipal/Revenue Bonds	10,531	11.07
Subtotal U.S. Treasuries, U.S. Government Agency, and Municipal Instruments	**$7,145,731**	
Corporate Bonds and Credit Securities:		
Asset-Backed Securities	$243,612	1.98
Corporate and Other Credit	2,540,329	2.06
Fixed Income Swaps and Options	(22,523)	N/A
Pooled Funds	6,795,856	2.06
Subtotal Corporate Bonds and Credit Securities	**$9,557,274**	
Non-U.S. Fixed Income	$342,300	1.49
Private Placement Fixed Income	1,584,609	3.91
Subtotal Non-U.S. and Private Placement Securities	**$1,926,909**	
Total Fixed Income Securities	**$18,629,914**	

Note: The Duration table does not include holdings within commingled investment structures or structures that are not directly held in custody by LACERA's global custodian, State Street Bank and Trust Company.

[1]Effective Duration is a measure of a bond's sensitivity to interest rates. It is calculated as the percentage change in a bond's price caused by a change in the bond's yield. For example, a duration of 5 indicates that a 1 percent increase in a bond's yield will cause the bond price to decline 5 percent.

The Duration in Fixed Income Securities — Pension Plan schedule for the year ended June 30, 2021 presents the duration by investment type. Whole loan mortgages included in the Pension Plan portfolio of $16 million are excluded from this presentation.

Foreign Currency Risk

Foreign Currency Risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or deposit. LACERA's investment managers are permitted to invest in approved countries or regions, as stated in their respective investment manager guidelines. To mitigate foreign currency risk within global equity, LACERA has implemented a passive currency hedging program, which hedges into U.S. dollars approximately 50 percent of LACERA's foreign currency exposure for developed market equities.

The following schedule represents LACERA's exposure to foreign currency risk in U.S. dollars. Most of the exposure is from separately managed accounts, with the remaining exposure from non-U.S. commingled funds that are denominated in foreign currency. For the commingled funds, LACERA owns units, and the fund holds actual securities and/or currencies. The values shown include LACERA's separately managed account holdings and the pro rata portion of non-U.S. commingled fund holdings. The OPEB Trust did not hold any non-U.S. investment securities as of June 30, 2022.

NOTE H — Securities Lending Program

The Board of Investments' policies authorize LACERA to participate in a securities lending program. Securities lending is an investment management activity that mirrors the fundamentals of a loan transaction. Securities are lent to brokers and dealers (borrowers), and in turn, LACERA receives cash and non-cash collateral. When cash collateral is received, the income that is generated from securities lending has two sources: lending and reinvestment. LACERA pays the borrower interest on the collateral and invests the collateral with the goal of earning a higher yield than the interest rate paid to the borrower. When non-cash collateral is received, the borrower pays a fee for borrowing the security.

For the first half of fiscal year 2021, LACERA's securities lending program was managed by two parties: LACERA's custodian bank, State Street Bank and Trust, and a third-party lending agent, Goldman Sachs Agency Lending (GSAL). State Street Bank and Trust lent LACERA's non-U.S. equities, U.S. Treasury, and U.S. Agency securities. GSAL lent LACERA's U.S. equities and corporate bonds. During the second half of fiscal year 2021, GSAL was terminated and its program was transferred to State Street Bank and Trust. By the end of June 2021 and throughout fiscal year 2022, State Street Bank and Trust was the sole manager of LACERA's securities lending program. Collateralization for fiscal years 2022 and 2021 is set on non-U.S. loans at a 105 percent minimum and on U.S. loans at a 102 percent minimum of the market value of securities on loan.

State Street Global Advisors (SSGA) invests the collateral received from the lending programs. The collateral is invested in short-term highly liquid instruments. The maturities of the investments made with cash collateral typically do not match the maturities of their securities loans. Loans are marked to market daily, so that if the fair value of a security on loan rises, LACERA receives additional collateral. Conversely, if the fair value of a security on loan declines, then the borrower receives a partial return of the collateral. Earnings generated in excess of the interest paid to the borrowers represent net income. LACERA shares this net income with the lending agent based on contractual agreements.

Under the terms of the lending agreements, the lending agent provides borrower default indemnification in the event a borrower does not return securities on loan. The terms of the lending agreements entitle LACERA to terminate all loans upon the occurrence of default and purchase a like amount of "replacement securities" when loaned securities are not returned. LACERA does not have the ability to pledge assets received as collateral without a borrower default. In the event the purchase price of replacement securities exceeds the amount of collateral, the lending agent is liable to LACERA for the difference, plus interest. Either LACERA or the borrower of the security can terminate a loan on demand.

At fiscal year-end, LACERA had no credit risk exposure to borrowers, because the amount of collateral received exceeded the value of securities on loan. LACERA had no losses on securities lending transactions resulting from the default of a borrower for the fiscal years ended June 30, 2022 and 2021.

As of June 30, 2022, the fair value of securities on loan was $3.7 billion, with a value of cash collateral received of $1.4 billion and non-cash collateral of $2.5 billion. As of June 30, 2021, the fair value of securities on loan was $3.4 billion, with a value of cash collateral received of $1.2 billion and non-cash collateral of $2.3 billion. LACERA's investment income, net of expenses from securities lending, was $11.1 million and $4.8 million for the fiscal years ended June 30, 2022 and 2021, respectively.

The following table shows the fair value of securities on loan, cash and non-cash collateral received as well as the calculated mark.

Securities Lending

As of June 30, 2022 and 2021

(Dollars in Thousands)

	2022			
Securities on Loan	**Fair Value of Securities on Loan**	**Cash Collateral Received**	**Non-Cash Collateral Received**	**Calculated Mark[1]**
U.S. Equity	$2,295,594	$862,637	$1,559,646	($17,143)
U.S. Fixed Income	958,823	438,042	575,808	15
Non-U.S. Equity	466,448	100,398	404,899	(5,842)
Total	**$3,720,865**	**$1,401,077**	**$2,540,353**	**($22,970)**

	2021			
Securities on Loan	**Fair Value of Securities on Loan**	**Cash Collateral Received**	**Non-Cash Collateral Received**	**Calculated Mark[1]**
U.S. Equity	$1,505,009	$110,975	$1,495,387	($2,885)
U.S. Fixed Income	1,237,110	1,034,611	238,468	1,661
Non-U.S. Equity	609,309	52,943	600,317	(1,902)
Total	**$3,351,428**	**$1,198,529**	**$2,334,172**	**($3,126)**

[1]Calculated mark is performed daily. It is the amount LACERA will collect from the borrower (if the amount is positive) or payment to the borrower (if the amount is negative) to bring the collateralization to appropriate levels based on fair value.

NOTE I — Derivative Financial Instruments

Per LACERA's Investment Policy Statement, LACERA may employ derivative instruments to hedge or gain exposure to certain investments. A derivative is a financial instrument that derives its value from an underlying asset that represents direct ownership of a security or a direct obligation of an issuer. Derivatives may be exchange-traded or traded over the counter (OTC). LACERA expects that any use of derivatives by external managers must adhere to LACERA's policies and investment guidelines.

Futures

Futures are financial agreements to buy or sell an underlying asset at a specified future date and price. Futures are standardized instruments traded on organized exchanges, and they are marked to market daily. The futures exchange reduces counterparty credit risk by acting as a central counterparty. It does this by collecting a daily margin payment from one trade participant and crediting it to the other, based on price changes in the underlying asset.

Currency Forwards

Similar to futures agreements, forwards represent an agreement to buy or sell an underlying asset at a specified future date and price. However, forwards are non-standardized agreements tailored to each specific transaction. Payment for the transaction is generally delayed until the settlement or expiration date. Forward contracts are privately negotiated and do not trade on a centralized exchange; therefore, they are considered over-the-counter instruments. Currency forward contracts are used to manage currency exposure, implement the passive currency hedge, and facilitate the settlement of international security purchases and sales.

Currency Forwards Analysis

Note: This Currency Forwards Analysis table does not include holdings within commingled investment structures or structures that are not directly held in custody by LACERA's global custodian, State Street Bank and Trust Company.

Options

An option contract is a type of derivative in which a buyer (purchaser) has the right, but not the obligation, to buy or sell a specified amount of an underlying security at a fixed price by exercising the option before its expiration date. The seller (writer) has an obligation to buy or sell the underlying security if the buyer decides to exercise the option.

Swaps

A swap is an agreement between two or more parties to exchange a sequence of cash flows over a period of time in the future. The cash flows exchanged by the counterparties are tied to a notional amount. A swap agreement specifies the time period over which the periodic payments will be exchanged. The fair value represents the gains or losses since the prior mark-to-market.

The following Investment Derivatives schedule reports the fair value balances, changes in fair value, and notional amounts of derivatives outstanding as of and for the year ended June 30, 2022, classified by type, not including holdings within commingled investment structures or structures that are not directly held in custody by LACERA's global custodian, State Street Bank and Trust Company.

All investment derivative positions are included as part of Investments at Fair Value in the Statement of Fiduciary Net Position. All changes in fair value are reported as part of Net Appreciation/ (Depreciation) in Fair Value of Investments in the Statement of Changes in Fiduciary Net Position.

Investment information was provided by LACERA's investment managers and custodian bank, State Street Bank and Trust Company.

Counterparty Credit Risk

LACERA is exposed to counterparty credit risk on investment derivatives that are traded OTC and are reported in asset positions. Derivatives exposed to counterparty credit risk include currency forward contracts and certain swap agreements. To minimize counterparty credit risk exposure, LACERA's investment managers continually monitor credit ratings of counterparties. In addition, collateral provided by the counterparty reduces LACERA's counterparty credit risk exposure. Should there be a counterparty failure, LACERA would be exposed to the loss of the fair value of derivatives that have unrealized gains and any collateral provided to the counterparty, net of applicable netting arrangements.

The following schedule displays the fair value of investments with each counterparty's S&P, Fitch, and Moody's credit rating by counterparty's name alphabetically, not including holdings within commingled investment structures or structures that are not directly held in custody by LACERA's global custodian, State Street Bank and Trust Company.

Counterparty Credit Risk Analysis

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Interest rate swaps are an example of an investment that has a fair value that is highly sensitive to interest rate changes. These investments are disclosed in the following table, not including holdings within commingled investment structures or structures that are not directly held in custody by LACERA's global custodian, State Street Bank and Trust Company.

Interest Rate Risk Analysis

NOTE J — Special Purpose Entities

Real Estate Investments

LACERA maintains several different types of special purpose entities (SPEs) in its investment portfolio, which are legal structures created to hold one or more real estate assets. The Investment Policy Statement approved by the Board of Investments allows investment managers to leverage the properties with debt that is included in property liabilities.

As of June 30, 2022, the LACERA real estate portfolio held 32 title holding corporations (THCs) and 45 limited liability companies (LLCs). As of June 30, 2021, the portfolio held 34 THCs and 48 LLCs.

The total fair values of assets invested in THCs and LLCs as of June 30, 2022 and June 30, 2021 were $4.1 billion and $3.8 billion, respectively.

Debt Program

The investment managers for the Debt Program are Barings, LLC and Quadrant Real Estate Advisors, LLC. The total fair values of assets invested in these two Debt Program accounts as of June 30, 2022 and June 30, 2021 were $111 million and $157 million, respectively. The Debt Program is included in LACERA's Credit functional category portfolio. Per LACERA's Board-approved 2021 Credit Structure Review, the legacy Credit assets, which include the underlying assets within the Debt Program, will be liquidated over the natural life of the investments.

Real Estate and Debt Program assets are also disclosed in Note P — Fair Value of Investments.

As presented in the Investment Section, Real Estate and Debt Program assets are included in the following functional category portfolios: Growth, Credit, and Real Assets and Inflation Hedges. For additional information regarding LACERA's investment portfolio and functional categories, see the Investment Section.

NOTE K — Related Party Transactions

Office Space Lease

In 1991, LACERA, as the sole shareholder, formed a title holding corporation (THC) to acquire Gateway Plaza, a 273,546 square foot 13-story office building located in Pasadena, California, which serves as the LACERA headquarters. At that time, LACERA, the lessee, entered into its original lease agreement with the THC, as lessor, to occupy approximately 85,000 square feet of office space. LACERA's offices include facilities to conduct in-person services with members, workstations for LACERA staff, and meeting space to host in-person Board of Retirement and Board of Investment meetings. Under the terms of the original lease and the subsequent 16 amendments, which expired on December 31, 2020, LACERA did not pay rent for the office space it occupied. Instead, LACERA was credited with the entire payment of base rent due each month. However, LACERA was required to pay its proportionate share of the building's operating costs and property taxes, as defined in the lease agreement.

LACERA entered into the 17th Amendment with the THC to occupy 125,559 square feet of office space in December 2020. The 17th lease agreement extended the term of the lease for an additional 60-month period, commencing on January 1, 2021 and ending on December 31, 2025. Under this most recent lease agreement, LACERA is required to pay monthly rent for the new term, with a three-month period of rent abatement from January 1, 2021 to March 31, 2021. The rent amounts are based on the current market rate for comparable space. In addition, as defined in the lease agreement, LACERA is required to pay its proportionate share of the increase in the building's operating costs and property taxes over its base year.

Total rent expenses paid by LACERA were approximately $6.0 million and $2.9 million for the fiscal years ended June 30, 2022 and June 30, 2021, respectively.

NOTE L — Administrative Expenses

The LACERA Board of Retirement and Board of Investments annually adopt the operating budget for the administration of LACERA. The administrative expenses, subject to statutory limitations, are charged against the investment earnings of the Pension Plan.

Beginning with the fiscal year ended June 30, 2012, LACERA implemented a provision of the CERL that shifted the administrative budget limitation from an asset-based cap to a liability-based cap. This CERL provision states that the annual budget for administrative expenses of a CERL pension plan may not exceed 0.21 percent of the actuarial accrued liability of the plan.

Expenses for computer software, hardware, and computer technology consulting services relating to such expenditures are included in the cost of administration, although they need not be included under CERL. Pursuant to the CERL, the cost of internal legal representation secured by the Board of Retirement and Board of Investments from LACERA's Legal Office, other than representation concerning investment of monies, is not to exceed 0.01 percent of retirement benefits plan assets in any budget year. LACERA's costs for such legal representation are within the statutory limit and included in administrative expenses.

Under applicable sections of the CERL, both LACERA Boards approved the operating budgets for fiscal years ended June 30, 2022 and June 30, 2021, which were prepared based upon the 0.21 percent CERL limit. For these years, LACERA's approved operating budgets were well below the statutory limit, and the actual amounts spent were less than the approved budgets.

Due to the crisis caused by the COVID-19 pandemic, in April 2020, the Chief Executive Officer requested approval from the Board of Retirement granting emergency purchasing authority, up to and including a total of $1 million above his existing authority, for goods and services deemed necessary to address the COVID-19 emergency. Expenditures are subject to consultation with the Board of Retirement Chair and Vice Chair and are to be reported to the full Board with notification to the Board of Investments. This recommendation was adopted, and authority granted covering a period of 180 days, and was not renewed. There were no COVID-19 expenses incurred under the emergency purchasing authority for the fiscal year ended June 30, 2022.

During the fiscal year, regular business operations resumed at LACERA's offices. LACERA staff returned to the office environment under a new hybrid work model whereby staff alternate on designated days between working in the office and working from home. During the prior fiscal year, LACERA made modifications to office space for staff safety and purchased supplies of personal protective equipment so there were no significant expenditures required to accommodate staff.

For the fiscal year ended June 30, 2022, total expenses for goods and services to address operational needs resulting from COVID-19 decreased to $66,000 as compared to the fiscal year ended June 30, 2021, when the amount spent was $347,000. The decrease in expenses was primarily due to a reduction of technology equipment purchases for the fiscal year ended June 30, 2022. LACERA's expenditures, including the COVID-19 related expenses, remained within the operating budget and did not exceed the statutory limit.

Beginning with the operating budget for the fiscal year ended June 30, 2021, LACERA implemented a staggered budget development approach by obtaining Board approval of an operating budget before the start of the new fiscal year and then completing a mid-year budget amendment during the fiscal year for the Boards' approval. This staggered approach enables executive leadership the opportunity to realign resources with the strategic direction of the organization and support the management team in implementing new or urgent initiatives that might occur during the year.

The following budget-to-actual analysis of administrative expenses schedule is based upon the mid-year budget amendment for the fiscal years ended June 30, 2022 and June 30, 2021, as approved by the LACERA governing boards, in comparison to actual administrative expenses.

Budget-to-Actual Analysis of Administrative Expenses

As of June 30, 2022 and 2021

(Dollars in Thousands)

	2022	2021

[1]The 2022 and 2021 budget calculations are based on the Pension Plan actuarial accrued liability, as of June 30, 2020 and June 30, 2019, respectively.

NOTE M — Commitments and Contingencies

Litigation

LACERA is a defendant in various lawsuits and other claims arising in the ordinary course of its operations. For additional disclosures regarding litigation, please see Note A — Benefit Plan Descriptions. The management and legal counsel of LACERA estimate the ultimate outcome of such litigation will not have a material effect on LACERA's financial statements.

Securities Litigation

In 2001, the LACERA Board of Investments adopted a Securities Litigation Policy in response to incidents of corporate corruption, fraud, and misconduct at publicly traded companies whose securities are held within LACERA's investment portfolio. The Policy requires LACERA's Legal Office to monitor securities fraud class actions and to actively pursue recovery of LACERA's losses in accordance with the Policy.

In 2010, the U.S. Supreme Court held that certain fraud provisions of the U.S. securities laws could not be applied to securities purchased outside the U.S. Therefore, the LACERA Board of Investments adopted a global policy to ensure that LACERA continues to meet its fiduciary duty by identifying, monitoring, and evaluating securities actions in which the fund has an interest, both foreign and domestic, and pursuing such claims when and in a manner the LACERA Board of Investments determines is in the best interest of the fund.

Compliance with the Securities Litigation Policy is part of the efforts of the LACERA Board of Investments, with the assistance of the LACERA Legal Office, to protect the financial interests of LACERA and its members.

LEASES

Equipment

LACERA leases equipment under lease agreements that expire over the next five years. The annual commitments and operating expenses for such equipment leases were approximately $197,000 and $211,000 for the fiscal years ended 2022 and 2021, respectively.

Office Space Lease

The LACERA office space lease agreement was originally entered in January 1991. Subsequent amendments were made with the latest one dated December 23, 2020. LACERA entered into the 17th Amendment and extended the terms with an expiration date of December 31, 2025.

The lease agreement for LACERA's office space is also discussed in Note K — Related Party Transactions. The total rent expenses for leasing the building premises are $6.0 million and $2.9 million in fiscal years ended 2022 and 2021, respectively.

Capital Commitments

LACERA real estate, private equity, hedge fund, and activist investment managers identify and acquire investments on a discretionary basis. Investment policies are approved by the LACERA Board of Investments and controlled by investment management agreements that identify limitations on each investment manager's discretion. Such investment activities are further restricted by the amount of capital allocated or committed to each manager.

As of June 30, 2022, capital commitments approved by LACERA's Board of Investments, which are outstanding to the various investment managers but not yet funded, totaled $8.0 billion.

NOTE N — Other Post-Employment Benefits (OPEB) Program

Program Description

In April 1982, the County adopted an ordinance pursuant to the County Employees Retirement Law of 1937 (CERL) that provided for a retiree healthcare insurance program and death/burial benefits for retired employees and their eligible dependents. In 1982, the County and LACERA entered into an agreement whereby LACERA's Board of Retirement would administer the program subject to the terms and conditions of the agreement. In 1994, the County amended the Agreement to ensure that the OPEB Program will continue even if there are changes to or termination of the active employee health insurance programs.

In June 2014, the LACERA Board of Retirement approved the County's request to modify the agreement to create a new retiree healthcare benefits program in order to lower its costs. Structurally, the County segregated all the then-current retirees and employees into the LACERA-administered Retiree Healthcare Benefits Program (Tier 1) and placed all employees hired after June 30, 2014 into the Los Angeles County Retiree Healthcare Benefits Program (Tier 2). On June 17, 2014, the Los Angeles County Board of Supervisors adopted changes to Los Angeles County Code Title 5 — Personnel, which established the benefit provisions for the Tier 2 program.

One difference included in this modification involves LACERA's administrative responsibility for the Retiree Healthcare Program. Under Tier 1, LACERA will continue its agreed-upon role as Program Administrator for retiree healthcare benefits as governed by the 1982 Agreement. Under the Tier 2 program, LACERA is responsible for administering this program; however, the County has the option to choose another organization to administer Tier 2 benefits.

Since inception, the OPEB Program's liabilities and costs were determined within a cost-sharing plan structure, rather than separately for each employer. In July 2018, the OPEB Program, in which Los Angeles County, LACERA, Superior Court, and the outside districts participate, was restructured as an agent multiple-employer defined benefit OPEB plan (agent plan).

Membership

Employees are eligible for the OPEB Program if they are members of LACERA and retire from the County of Los Angeles, Superior Court, LACERA, or a participating outside district. Healthcare benefits are also offered to qualifying survivors of deceased retired members and qualifying survivors of deceased active employees who were eligible to retire at the time of death. Eligibility to receive a pension benefit is a prerequisite for retiree healthcare and death benefits. Therefore, eligibility and qualifications applicable to retiree healthcare and death/burial benefits are substantially similar to pension benefits. The Summary of Major OPEB Program Provisions is available by contacting LACERA or visiting the LACERA website for additional information.

LACERA Membership — OPEB Medical and Dental/Vision Benefits

As of June 30, 2022 and 2021

	2022		2021	
	Medical	**Dental/Vision**	**Medical**	**Dental/Vision**
Retired Participants				
Retired Members and Survivors	54,065	55,772	52,832	54,262
Spouses and Dependents	27,684	31,811	26,867	30,825
Total Retired	**81,749**	**87,583**	**79,699**	**85,087**
Inactive Members — Vested	9,250	9,250	8,714	8,714
Active Members — Vested[1]	74,796	74,796	74,434	74,434
Total Membership Eligible for Benefits	**165,795**	**171,629**	**162,847**	**168,235**

[1]Active members include terminated members who are vested (deferred) and eligible to receive OPEB benefits. Active members exclude non-vested (inactive) members who are ineligible for OPEB benefits.

LACERA Membership — OPEB Death/Burial Benefits

As of June 30, 2022 and 2021

	2022	2021
Retired with Eligibility for Death/Burial Benefits[2]	**61,931**	60,097
Total Retired	**61,931**	60,097
Inactive Members — Vested	**9,250**	8,714
Active Members — Vested[1]	**74,796**	74,434
Total Membership Eligible for Benefits	**145,977**	143,245

[1]Active members include terminated members who are vested (deferred) and eligible to receive OPEB benefits. Active members exclude nonvested (inactive) members who are ineligible for OPEB benefits.
[2]Survivors, spouses and dependents are not eligible for death benefits.

Benefit Provisions

The OPEB Program offers members an extensive choice of medical plans as well as two dental/vision plans. The medical plans are either HMOs or indemnity plans, and some are designed to work with Medicare benefits, such as the Medicare Supplement or Medicare HMO plans. Coverage is available regardless of preexisting medical conditions. Under the Tier 2 benefits structure, retirees who are eligible for Medicare are required to enroll in that program. Medicare-eligible retirees/survivors and their covered dependents must enroll in Medicare Parts A and B and in a Medicare HMO plan or a Medicare Supplement plan under the Tier 2 program.

Medical and Dental/Vision

Program benefits are provided through third-party insurance carriers with the participant's cost for medical and dental/vision insurance varying according to the years of retirement service credit with LACERA, the plan selected, and the number of eligible dependents covered. The County contribution subsidizing the participant's cost starts at 10 years of eligible service credit in the amount of 40 percent of the lesser of the benchmark plan rate or the premium of the plan in which the retiree is enrolled. For each year of eligible retirement service credit earned beyond 10 years, the County contributes 4 percent per year, up to a maximum of 100 percent for a member with 25 years of service credit. The County contribution can never exceed the premium of the benchmark plans. Members are responsible for premium amounts above the benchmark plans, including those with 25 or more years of service credit.

Under the Tier 1 benefits structure, the County subsidy is based on the coverage elected by the retiree. The benchmark plans are Anthem Blue Cross Plans I and II for medical and Cigna Indemnity Dental/Vision for dental and vision plans. Under Tier 2, the County subsidy is based on retiree/survivor-only coverage. Tier 2 medical benchmark plans are Anthem Blue Cross Plans I and II for Medicare-ineligible members, Anthem Blue Cross Plan III for Medicare-eligible members, and Cigna Indemnity Dental/Vision for dental and vision plans.

Medicare Part B

The County reimburses the member's and/or eligible dependent's Medicare Part B Premium (up to the standard rate only) paid by the member to Social Security for Part B coverage, subject to annual approval by the County Board of Supervisors. Eligible members and their dependents must be currently enrolled in both Medicare Part A and Medicare Part B and enrolled in a LACERA-administered Medicare HMO Plan or Medicare Supplement Plan, and meet all of the qualifications. Under the Tier 2 benefits structure, the County reimburses for Medicare Part B (at the standard rate) for eligible members or eligible survivors only.

Disability

If a member is granted a service-connected disability retirement and has less than 13 years of service, the County contributes the lesser of 50 percent of the benchmark plan rate or the premium of the plan in which the retiree is enrolled. Under the Tier 2 program, the benchmark plan rate is based on retiree-only premiums. A member with 13 years of service credit receives a 52 percent subsidy. This percentage increases 4 percent for each additional completed year of service, up to a maximum of 100 percent.

Death/Burial Benefit

There is a one-time lump-sum $5,000 death/burial benefit payable to the designated beneficiary upon the death of a retired member, paid by LACERA and then reimbursed to LACERA by the employer. Active and vested terminated (deferred) members are eligible for this benefit once they retire. Spouses and dependents are not eligible for this benefit upon their death.

Healthcare Reform

In March 2010, President Obama signed into law the Affordable Care Act (ACA). The ACA impacts the County's future healthcare liabilities. Estimated ACA fees are included in the OPEB liabilities. However, as a retiree-only group plan, LACERA is exempt from many of the provisions implemented thus far, including these significant provisions:

- Dependent coverage for adult children up to age 26
- Elimination of lifetime maximum limits
- No cost-sharing for approved preventive services

In December 2019, the Further Consolidated Appropriations Act (H.R. 1865) repealed the excise tax and health insurer fee beginning in the calendar year 2021 and extended the Patient-Centered Outcomes Research Institute (PCORI) Fee through 2029. The OPEB assumptions for the July 1, 2021, valuation reflect the exclusion of the excise tax and the health insurer fees.

Eligible dependent child age limit increased to age 26: The plan sponsor, the County of Los Angeles, approved an extension of the dependent children age limit up to age 26 under the Retiree Healthcare Program, regardless of a dependent child's marital or student status. This is a result of Senate Bill (SB) 1088. Until July 1, 2014, SB 1088 exempted retiree-only plans, such as LACERA's from this provision. It required health plan carriers to offer the coverage to dependents up to age 26 but does not obligate the plan sponsor, the County of Los Angeles, to pay for coverage up to age 26. However, effective March 9, 2015, the County determined that it would pay for dependent coverage up to age 26 within the existing OPEB Program provisions, as described below under Contributions Authority.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES — OPEB PROGRAM

Basis of Presentation

OPEB activity at LACERA is reported in the basic financial statements within two distinct funds, the OPEB Custodial Fund and the OPEB Trust Fund, in accordance with GASB Statement Number 74 (GASB 74).

The OPEB Custodial Fund accounts for assets held in a fiduciary capacity that are not held in a trust. The funds held within the OPEB Custodial Fund do not meet the definition of a qualifying trust under GASB 74 and are not used to reduce the employers' total OPEB liability. However, the ownership of the OPEB Custodial Fund belongs to the County, Superior Court, LACERA, and the participating outside district employers. Assets and liabilities are recorded using the economic resources measurement focus and accrual basis of accounting. Receivables include contributions due as of the reporting date. Payables include premium payments and refunds due to members and accrued investment and administrative expenses.

The OPEB actuarial valuation groups the agents using the following structure. There is a total of three agents participating in the OPEB Trust who are included in the seven agents of the OPEB Program. The most recent OPEB Experience and Assumption Study report, prepared as of July 1, 2020, includes the population of all participating agents. Separate liabilities are calculated for the agents participating in the OPEB Trust and the OPEB Program.

Agent and Agent Grouping

OPEB Trust

County, Superior Court and LACERA

OPEB Program[1]

County, Superior Court, LACERA, SCAQMD, LACOE, LAFCO, LLCD

[1]South Coast Air Quality Management District (SCAQMD), Los Angeles County Office of Education (LACOE), Local Agency Formation Commission for the County of Los Angeles (LAFCO), and Little Lake Cemetery District (LLCD).

OPEB Trust — Agent Plan

The County, Superior Court, and LACERA have established separate accounts within the LACERA OPEB Trust to prefund their own OPEB Program liabilities. For better precision in allocating and accounting for these liabilities, as of July 1, 2018, the OPEB Program transitioned from a cost-sharing plan structure to an agent multiple-employer plan (agent plan) structure. Under the previous cost-sharing plan structure, OPEB Program liabilities and costs were determined with respect to the total LACERA OPEB Program, rather than separately for each employer. However, an agent plan structure determines program liabilities and costs directly by employer and allocates shared expenses to each employer. This provides employers with liability and cost information that is more precise for their active, vested-terminated, and retiree population, which helps them make informed decisions to manage these OPEB costs. In addition, assets in the OPEB Trust, while commingled for investment purposes, are separately tracked for each participating employer. The July 1, 2018 OPEB valuation marked the first actuarial valuation performed under an agent plan reflecting the funding information at the individual agent (employer) level.

For additional information pertaining to the OPEB Trust, see Note Q — Other Post-Employment Benefits (OPEB) Trust.

Investment Valuation

Investments are carried at fair value, which are derived from quoted market prices. For publicly traded securities and issues of the United States Government and its agencies, the most recent sales price as of fiscal year-end is used.

Contributions Authority

Pursuant to the 1982, 1994, and 2014 agreements between the County and LACERA, the parties agreed to the continuation of the post-retirement health insurance benefits then in existence. The County agreed to subsidize a portion of the insurance premiums of certain retired members and their eligible dependents based on the member’s length of service. The County further agreed to maintain the status quo of existing benefits provided to participants. LACERA agreed not to change retired members’ contributions toward insurance premiums or modify medical benefit levels without the County’s prior consent. As part of the 2014 Agreement, the County modified the existing healthcare benefits plan, which created a new benefit structure, the Tier 2 program, for all employees hired after June 30, 2014.

Premium Payments

During the fiscal years ended June 30, 2022 and 2021, respectively, healthcare premium payments of $671.1 million and $654.3 million were made to insurance carriers. These premiums were funded by employer subsidy payments of $623.0 million and participant payments of $48.1 million for the fiscal year ended 2022. The employer subsidy payments for the fiscal year ended 2021 were $605.7 million with participant payments of $48.6 million.

In addition, $88.2 million and $10.0 million were funded by employer subsidy payments for Medicare Part B reimbursements and death/burial benefits, respectively, for the fiscal year ended June 30, 2022, and $80.1 million and $9.3 million for these benefits, respectively, during the fiscal year ended June 30, 2021.

A premium holiday is a temporary period in which the monthly premium costs for both the program sponsors (i.e., County and participating employers) and affected members are waived. Affected members are those retirees/survivors enrolled in certain medical and dental/vision benefit plans who also pay their share of the monthly premiums. There were no premium holidays during the fiscal years ended June 30, 2022 and 2021.

NOTE O — Hedge Fund Investments

LACERA's Investment Policy Statement establishes the portfolio framework for and role of the hedge funds program. Diversified hedge funds comprise a variety of hedged investments, such as relative value, arbitrage, and long/short strategies within a diversified portfolio.

The status of LACERA's hedge fund program as of June 30, 2022 is as follows:

- LACERA is invested in eight hedge fund managers in the core hedge funds portfolio.
- LACERA is invested in five hedge fund emerging managers in the hedge funds emerging manager portfolio. LACERA's discretionary hedge funds emerging manager separate account manager, Stable Asset Management, selected five emerging managers during the last fiscal year.
- LACERA continues to have exposure with one hedge fund of funds manager, Grosvenor Capital Management (GCM). In 2019, LACERA initiated the full redemption of the GCM hedge fund of funds' portfolio. This portfolio began returning cash during the prior fiscal year and will continue to distribute cash in alignment with the liquidity terms of the portfolio or underlying managers. GCM is managing the redemption process of the GCM portfolio.

The investment performance for this strategy is measured separately from other asset classes. The fair values of assets invested in hedge funds as of June 30, 2022 and June 30, 2021 were $4.4 billion and $2.7 billion, respectively.

Hedge fund assets are also disclosed in Note P — Fair Value of Investments.

The core portfolio, emerging manager portfolio, and GCM hedge funds of funds portfolio reside within Diversified Hedge Funds under the Risk Reduction and Mitigation functional asset category of LACERA's Total Fund. For additional information regarding LACERA's investment portfolio and functional categories, see the Investment Section.

NOTE P — Fair Value of Investments

For the fiscal year ended June 30, 2016, LACERA adopted GASB Statement Number 72 (GASB 72), *Fair Value Measurement and Application*. GASB 72 was issued to address accounting and financial reporting issues related to fair value measurements and disclosures. LACERA categorizes its fair value measurements within the fair value hierarchy established by Generally Accepted Accounting Principles in the United States of America (U.S. GAAP). The hierarchy is based on the valuation inputs used to measure the fair value of the investment securities and assets. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. Certain investments held by LACERA are valued at net asset value (NAV) per share when an investment does not have a readily determined fair value, provided that the NAV is calculated and used as a practical expedient to estimate fair value in accordance with the requirements of GAAP.

Equity and Fixed Income Securities

Equity securities classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets issued by pricing vendors for these securities.

Fixed income and equity securities classified in Level 2 of the fair value hierarchy are valued using prices determined by matrix pricing techniques maintained by the various pricing vendors for these securities. Equity securities classified in Level 2 are not traded in the active market. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices. These matrix pricing techniques incorporate inputs such as yield, prepayment speeds, and credit spreads for fixed income securities. Derivative securities classified as Level 2 are securities whose values are either derived daily from associated securities that are traded or are determined by using a market approach that considers benchmark interest rates.

Fixed income and equity securities classified in Level 3 are securities whose stated market price is unobservable by the marketplace; many of these securities are priced by the issuers or industry groups for these securities. Fair value is defined as the quoted market value on the last trading day of the period. These prices are obtained from various pricing sources obtained by LACERA's custodian bank, State Street Bank and Trust.

Hedge Funds, Private Equity, Real Assets, Real Estate, Equity, and Fixed Income Funds

Investments in hedge funds, private equity, real assets, real estate, equity, and fixed income funds are valued at estimated fair value, as determined in good faith by the general partner (GP), in accordance with GAAP fair value principles in instances where no observable public market values are available. Investments that are estimated at fair value are initially valued at cost with subsequent adjustments that reflect third party transactions, financial operating results, and other factors deemed relevant by the GP. These assets are reported by LACERA based on the practical expedient allowed under GAAP. In instances where observable public market values are available for the underlying securities held, fair value is determined by the fund's administrator using independent pricing sources.

Real Estate Separate Account Investments

Investments in real estate are valued at estimated fair value, as determined in good faith by the Investment Manager. These investments are initially valued at cost, with subsequent adjustments that reflect third-party transactions, financial operating results, and other factors deemed relevant by the investment manager. Properties are subject to independent third-party appraisals every year.

LACERA has the following recurring fair value measurements as of June 30, 2022 and 2021:

Investments and Derivative Instruments Measured at Fair Value — Pension Plan

Investments Measured at Net Asset Value — Pension Plan

As of June 30, 2022

(Dollars in Thousands)

	Fair Value	Unfunded Commitments	Redemption Frequency (if Currently Eligible)	Redemption Notice Period
Fixed Income Funds[1]	$6,254,217	$857,195	Daily, Monthly or Not Eligible	1-60 days or N/A
Commingled Equity Funds[2]	1,660,096	—	Daily, Monthly or Not Eligible	1-60 days or N/A
Hedge Funds[3]	4,440,434	381,198	Daily, Monthly, Quarterly, Semi-Annual, Annual; Self-Liquidating	5-180 days
Private Equity[4]	12,753,842	4,822,028	Not Eligible	N/A
Real Estate[4]	5,802,979	334,665	Quarterly or Not Eligible	30 days+ or N/A
Real Assets[4]	1,363,252	1,618,103	Not Eligible	N/A
Total Investments Measured at NAV	**$32,274,820**			

[1]**Fixed Income Funds**: Nine fixed income funds are valued at the net asset value (NAV) of units held at the end of the period based upon the fair value of the underlying investments. Approximately 80 percent of assets are available within 12 months; these funds provide daily, monthly or quarterly liquidity. Approximately 20 percent of the fund assets have liquidity beyond 12 months.

[2]**Commingled Equity Funds**: Five equity funds are considered commingled in nature. They are valued at the NAV of units held at the end of the period based upon the fair value of the underlying investments. Most of the funds are highly liquid within one month; three of these funds representing five percent of Commingled Equity assets have liquidity subject to lock-up periods that limit or prohibit redemptions for the next three years.

[3]**Hedge Funds**: This portfolio consists of 13 current funds and two fund of funds. Hedge Fund investments are valued at NAV per share. When considering liquidity terms of the current funds, 62 percent of the fund assets are available within 12 months; these funds provide daily, monthly, quarterly, semi-annual, or annual liquidity. Some of these funds are subject to redemption notices that extend the time frame to receive redemptions beyond the next 12 months. Approximately 38 percent of fund assets are in funds that offer periodic liquidity that extends beyond the next 12 months.

LACERA's Hedge Funds portfolio invests in the following strategies:

(a) Macro and Tactical Trading: This strategy makes investments based on analyses and forecasts of macroeconomic trends, including governmental and central bank policies, fiscal trends, trade imbalances, interest rate trends, inter-country relations, and economic and technical analysis.
(b) Equity Long/Short: This strategy purchases and/or sells equities based on fundamental and/or quantitative analysis and other factors.
(c) Credit: This strategy includes long-biased credit, long/short credit, structured credit, and mortgage credit.
(d) Relative Value: This strategy's focus is to benefit from valuation discrepancies that may be present in related financial instruments by purchasing and/or shorting these instruments.
(e) Multi-Strategy: This strategy aims to pursue varying strategies to diversify risks and reduce volatility.
(f) Event Driven: This strategy seeks to gain an advantage from pricing inefficiencies that may occur in the onset or aftermath of a corporate action or related event.

[4]**Private Equity, Real Assets, and Real Estate Funds**: LACERA's Private Equity portfolio consists of 272 funds, investing primarily in buyout funds, with some exposure to venture capital, special situations, fund of funds, and co-investments. Due to contractual limitations, none of the funds are currently eligible for redemption. One of the funds may be eligible for redemption after three years, while the remaining 271 funds are ineligible for up to 10 years. The Real Assets portfolio consists of 17 funds, investing primarily in infrastructure and natural resources. Due to contractual limitations, none of the funds are eligible for redemption as the lock-up period is typically from 10-15 years. The Real Estate portfolio, composed of 23 commingled funds, invests in both U.S. and Non-U.S. commercial real estate. The fair values of these funds have been determined using net assets valued at the end of the period and net assets valued one quarter in arrears plus current quarter cash flows. Three out of 23 Real Estate funds are eligible for redemption depending upon the availability of cash for redemptions in the fund. Distributions are received as underlying investments within the funds are liquidated, which on average can occur over the span of 5 to 10 years. For Real Estate investments held in separate accounts and debt program investments, see Note J — Special Purpose Entities.

Private Equity[4]	11,321,964	4,757,015	Not Eligible	N/A
Real Estate[4]	5,294,150	971,004	Quarterly or Not Eligible	30 days+ or N/A
Real Assets[4]	149,983	1,462,640	Not Eligible	N/A
Total Investments Measured at NAV	**$32,249,847**			

[1]**Fixed Income Funds**: Nine fixed income funds are valued at the net asset value (NAV) of units held at the end of the period based upon the fair value of the underlying investments. 59 percent of the Fixed Income NAV assets have liquidity beyond 12 months; these funds provide daily, monthly, or quarterly liquidity. 38 percent of the fund assets have liquidity beyond 12 months. Two of the funds representing 3 percent of the Fixed Income NAV assets have liquidity available at the end of the fund terms, which range from three to seven years.

[2]**Commingled Equity Funds**: Five equity funds are considered commingled in nature. They are valued at the NAV of units held at the end of the period based upon the fair value of the underlying investments. Most of the funds are highly liquid within one month; three of the funds representing 5 percent of Commingled Equity assets have liquidity available subject to lock-up periods that limit or prohibit redemptions for the next three to four years.

[3]**Hedge Funds**: The portfolio consists of eight current funds and two fund of funds. Hedge Fund investments are valued at NAV per share. When considering liquidity terms of the eight current funds, 76 percent of the fund assets are available within 12 months; these funds provide daily, monthly, quarterly, semi-annual, or annual liquidity. Some of these funds are subject to redemption notices that extend the time frame to receive redemptions beyond the next 12 months. The remaining 24 percent of fund assets are in funds that offer periodic liquidity that extends beyond the next 12 months.

LACERA's Hedge Funds portfolio invests in the following strategies:

(a) Macro and Tactical Trading: This strategy makes investments based on analyses and forecasts of macroeconomic trends, including governmental and central bank policies, fiscal trends, trade imbalances, interest rate trends, inter-country relations, and economic and technical analysis.
(b) Equity Long/Short: This strategy purchases and/or sells equities based on fundamental and/or quantitative analysis and other factors.
(c) Credit: This strategy includes long-biased credit, long/short credit, structured credit, and mortgage credit.
(d) Relative Value: This strategy's focus is to benefit from valuation discrepancies that may be present in related financial instruments by purchasing and/or shorting these instruments.
(e) Multi-Strategy: This strategy aims to pursue varying strategies diversify risks and reduce volatility.
(f) Event Driven: This strategy seeks to gain an advantage from pricing inefficiencies that may occur in the onset or aftermath of a corporate action or related event.

[4]**Private Equity, Real Assets, and Real Estate Funds**: LACERA's Private Equity portfolio consists of 254 funds, investing primarily in buyout funds, with some exposure to venture capital, special situations, fund of funds, and co-investments. Due to contractual limitations, one of the funds may be eligible for redemption after three years, while the remaining 253 funds are ineligible for up to 10 years. The Real Assets consist of 12 funds, investing primarily in infrastructure and natural resources. Due to contractual limitations, none of these funds are eligible for redemption as lock-up is typically from 10-15 years. The Real Estate portfolio, composed of 23 funds, invests in both U.S. and non-U.S. commercial real estate. The fair values of these funds have been determined using net assets valued one quarter in arrears plus current quarter cash flows. Three out of 23 funds are eligible for redemption depending upon the availability of cash for redemptions in the fund. Distributions are received as underlying investments within the funds are liquidated, which on average can occur over the span of five to 10 years. For Real Estate investments held in separate accounts and debt program investments, see Note J — Special Purpose Entities.

NOTE Q — Other Post-Employment Benefits (OPEB) Trust

Los Angeles County (County) OPEB Trust

Pursuant to the California Government Code, the County established an irrevocable, tax-exempt OPEB Trust, which LACERA administers, for the purpose of holding and investing assets to prefund the Retiree Healthcare Benefits Program. In May 2012, the County Board of Supervisors approved entering into a trust and investment services agreement with the LACERA Board of Investments to serve as trustee and investment manager.

The County began funding the OPEB Trust in an effort to reduce its unfunded OPEB liability. It provides a framework whereby the County contributes to the Trust with regular frequency and may transition, over time, to a prefunding model which will use OPEB Trust assets to pay retiree healthcare benefits. Under the existing pay-as-you-go model, the County uses current budgeted assets to pay benefits. The County OPEB Trust does not modify the participating employers' existing benefit programs.

The County OPEB Trust serves as a funding tool for the participating employers to hold and invest assets that can be used to pay expenses associated with future OPEB benefits, such as medical, dental, and vision provided by the Retiree Healthcare Program, including the retiree death/burial benefit. Participating employers will be responsible for and have full discretion over the timing of payments into the Trust. Assets held in the OPEB Trust are restricted for OPEB purposes as defined in the Trust Agreement. There are only two participating employers in the County OPEB Trust: Los Angeles County and LACERA.

Los Angeles Superior Court (Court) OPEB Trust

Similar to the OPEB Trust established by the County, the Court followed the County's lead and established a separate trust fund, the Court OPEB Trust, to prefund the Court's OPEB liabilities. Pursuant to the California Government Code, the Court established an irrevocable OPEB Trust for the purpose of holding and investing assets to prefund the Retiree Healthcare Program, which LACERA administers. In April 2016, the Judicial Council of California approved the Court's request to establish a qualified irrevocable trust, as well as LACERA's Board of Investments as trustee and investment services provider.

In May 2016, to conform the language of the County OPEB trust agreement to the language of the Court's OPEB trust agreement, the Board of Supervisors approved the First Amendment to the *Trust and Investment Services Agreement for the County of Los Angeles OPEB Program* between the County and LACERA. This amendment permits the pooling of County and Court OPEB Trust assets solely for investment purposes.

In June 2016, similar to the County, the Court entered into a trust and investment services agreement with the LACERA Board of Investments. The Court is the only employer participating in the Court OPEB Trust.

OPEB Master Trust

In July 2016, LACERA's Board of Investments adopted the OPEB Master Trust Declaration and unitization of County and Court OPEB Trust investments. As trustee of the separate OPEB Trusts established by the County and the Court, the Board of Investments has sole and exclusive authority, control over, and responsibility for directing the investment and management of the Master OPEB Trust assets.

A unitized fund structure may allow for synergy from the shared economy and leveraged investment opportunities for greater diversification of assets. Unitization also provides participants the ability to pool assets and resources while retaining total fund and functional category values and reporting for each participant. This approach can offer administrative efficiency, potential cost savings, and permit flexibility in asset allocation. The unitized structure preserves the ability to base investments on the individual needs of each participating employer.

Funding Policy

In June 2015, the Board of Supervisors approved the countywide budget with a dedicated funding policy for the OPEB liability using a multi-year approach to enhance the County's OPEB Trust funding commitment in a consistent manner.

Under the County OPEB Trust, LACERA is defined as a “Contributing Employer.” Separate accounts are maintained for the contributions and expense obligations of the County and LACERA. Since its inception, LACERA participated with the County in lock-step funding on a pro-rata basis. LACERA’s annual budget includes provisions for its share of OPEB Trust contributions. In December 2015, the LACERA Boards adopted the LACERA OPEB Funding Policy allowing LACERA to prefund its portion of retiree healthcare benefits in sync with the County, while also allowing LACERA to prefund its portion of the liability separately. LACERA is not legally obligated, under the Trust or otherwise, to match the County’s funding practices, but such a course of action, which has been followed in the past, reduces LACERA’s share of healthcare liabilities.

LACERA OPEB Liability Funding

On April 22, 2022 at LACERA’s Joint Organizational Governance Committee meeting, LACERA revised its administrative budget policy to include additional OPEB Trust prefunding contributions at the discretion of LACERA’s Chief Executive Officer. The policy states that based upon a projected budget surplus, an additional OPEB contribution may be up to, but not exceed the OPEB contribution amount originally budgeted for that year; so, an administrative budget surplus can be used to double LACERA’s total OPEB prefunding contribution for the year. In June of 2022, LACERA’s Board of Retirement and Board of Investments approved the budget policy changes.

The Court continues to pay its OPEB liability on a pay-as-you-go basis. Although the Court has not adopted a formal OPEB funding policy, when budgeted surplus funds are available at fiscal year end, the Court may earmark such excess funds in its discretion from year to year as OPEB Trust contributions.

INVESTMENT POLICIES — OPEB MASTER TRUST

Investment Policy

The allocation of investment assets within the OPEB Master Trust are approved by the OPEB trustee, the LACERA Board of Investments. As outlined in the OPEB Master Trust Investment Policy Statement, assets are managed on a total return basis with the overall goal to provide retiree healthcare program participants with post-employment healthcare benefits as promised, via a long-term investment program.

Target Allocation

The Board’s revised asset allocation policy, adopted in December 2017, divides the Trust into four broad functional categories and contains asset classes that align with the purpose of each function. The Board has approved target weights at both the functional category and asset class level to provide for diversification of assets in an effort to meet the OPEB Program’s actuarial assumed rate of return, consistent with market conditions and risk control.

At the June 2021 Board meeting, the Board approved a new strategic asset allocation for the OPEB Master Trust that provides the same probability of achieving its target return, but with significantly lower volatility. Consistent with LACERA’s Investment Beliefs, the new strategic asset allocation also provides additional benefits of diversification by introducing private market assets into the portfolio structure.

The functional categories have final target weights of 45.0 percent in Growth, 18.0 percent in Credit, 20.0 percent in Real Assets and Inflation Hedges, and 17.0 percent in Risk Reduction and Mitigation. As part of the Board-approved, three-step implementation plan, the transition to the new target asset allocation will occur over time, with the second phase transpiring in the upcoming fiscal year.

Investment Concentrations

As of June 30, 2022, the OPEB Master Trust held approximately 50.0 percent in Growth, 20.0 percent in Credit, 10.0 percent in Risk Reduction and Mitigation, and 20.0 percent in Real Assets and Inflation Hedges. In addition, The OPEB Master Trust did not hold investments in any one issuer that would represent 5 percent or more of the OPEB Master Trust Fiduciary Net Position Restricted For Benefits.

Money-Weighted Rate of Return

For the fiscal year ended June 30, 2022, the annual money-weighted rate of return on OPEB Trust investments, net of OPEB Trust investment expenses, was 11.8 percent. Historical returns will be presented as they become available in the Schedule of Investment Returns — OPEB Program presented in the Required Supplementary Information section of this report.

Schedule of Target Allocation

For the Fiscal Years Ended June 30, 2022 and 2021

Asset Class	2022 Target Allocation		2021 Target Allocation	
Growth	**50.0%**		**50.0%**

TIPS		6.0%		6.0%
Real Estate Investment Trusts (REITs)		10.0%		10.0%
Commodities		4.0%		4.0%

Contributions

The participating employers historically discharged their current healthcare premium subsidy obligations on a pay-as-you-go basis. LACERA bills the participating employers and members for healthcare premiums on a monthly basis and receives reimbursement. The County, Superior Court, and LACERA use the OPEB Trust as a mechanism to prefund these obligations, depositing monies into the irrevocable OPEB Trust, earning interest and investment income, and dispersing funds in accordance with the terms of the Trust Agreement. Retiree healthcare program participants are required to pay the difference between the employer-paid subsidy and the actual premium cost.

For the fiscal year ended June 30, 2022, LACERA contributed a total of $3,131,000 to prefund LACERA's portion of OPEB benefits. This amount includes the originally funded contribution through LACERA's administrative budget, and an additional contribution based on a projected budget surplus for the fiscal year 2021–2022.

During fiscal years ended June 30, 2022 and 2021, the County, Superior Court, and LACERA made total prefunding contributions to the OPEB Trust of $376.4 million and $362.7 million respectively, in excess of the pay-as-you-go amounts, both of which are recorded as revenue within the OPEB Trust.

Administration

Contributions — OPEB Trust

For the Fiscal Years Ended June 30, 2022 and 2021
(Dollars in Thousands)

	2022	2021
Los Angeles County	**$372,243**	$357,269
LACERA	**3,131**	1,477
Superior Court	**1,000**	3,955
Total Contributions[1]	**$376,374**	$362,701

[1]Contributions presented here are limited to OPEB Trust prefunding from plan sponsors. OPEB Trust employer contributions presented in the Statement of Changes in Fiduciary Net Position include pay-as-you-go contributions per GASB reporting requirements. Please see Note B — Summary of Significant Accounting Policies for additional information.

The OPEB Trust administration costs include payments for investment management fees, custodial fees, consultant fees, and overhead charged by LACERA for administering the OPEB Trust Fund. Expenses totaled $1.8 million and $1.6 million for fiscal years ended June 30, 2022 and 2021, respectively. The increase in costs was due to asset rebalancing and the addition of new investment accounts. These administrative costs are paid by the OPEB Trust.

Expenses — OPEB Trust

For the Fiscal Years Ended June 30, 2022 and 2021

	2022				
	Management Fees	Custodial Fees	Consultant Fees	Administrative Expenses	Total
Los Angeles County	$924,384	$212,539	$59,881	$449,217	$1,646,021

[2]Money-Weighted Rate of Return is calculated as the internal rate of return on Pension Plan investments, net of investment expenses.

Notes to Required Supplementary Information — Pension Plan

Actuarial Methods and Significant Assumptions

The actuarial assumptions used to determine Pension Plan liabilities and employer and employee contributions are based on the results of the 2019 triennial investigation of experience (experience study).

The June 30, 2021 actuarial valuation prepared by the consulting actuary reaffirmed all assumptions adopted by the LACERA Board of Investments in January 2020. The LACERA Board of Investments approved a three-year phase-in of the changes to employer contribution rates.

Key Methods and Significant Assumptions[1]

Description	Method
Valuation Timing	*Contribution Rates Effective Two Years After Valuation* Actuarially determined contribution rates are calculated as of June 30, two years prior to the end of the fiscal year in which the contributions are reported. Contributions calculated for the June 30, 2021 valuation are applied for the fiscal year July 1, 2022 to June 30, 2023.
Actuarial Cost Method	Individual entry age.
Investment Rate of Return	*Annual Rate of 7.0 Percent* Future investment earnings are assumed to accrue at an annual rate of 7.0 percent, compounded annually, net of both investment and administrative expenses. This rate was adopted beginning with the June 30, 2019 valuation.
Consumer Price Index	*Annual Rate of 2.75 Percent* This rate was adopted beginning with the June 30, 2016 valuation and reaffirmed in the 2019 triennial experience study.
Salary Increases and Wage Growth	*Projected Salary Increases: 3.51 Percent to 12.54 Percent* In addition to increases in salary due to promotions and longevity, the increases include an assumed 3.25 percent per annum rate of increase in the general wage growth.
Asset Valuation Method	*Five-Year Asset Smoothing* Assets are valued using a five-year smoothing method based on the difference between expected market value and actual market value. The recognition method is non-asymptotic, and there is no minimum or maximum corridor applied.
Amortization Method	*20-Year Amortization* The Unfunded Actuarial Accrued Liability (UAAL) is amortized as a level percentage of pay. Effective June 30, 2019, existing UAAL layers as of June 30, 2018 are amortized over their remaining periods, not to exceed 22 years. Each new layer effective on or after June 30, 2019 is amortized over a 20-year period. The UAAL contribution rate calculated in the June 30, 2021 funding valuation includes 13 layers.

Key Methods and Significant Assumptions[1] continued

Description	Method
Retirement Age	*Various Rates and Probabilities* A schedule of the probabilities of employment termination based on age due to a particular cause is used. For additional information, see the Probability of Occurrence tables in the Actuarial Section.
Cost-of-Living Adjustments (COLAs)	*Annual COLAs of 2.75 Percent or 2 Percent* Post-retirement benefit increases of either 2.75 percent or 2 percent per year are assumed for the valuation in accordance with statutory limits. This rate was adopted beginning with the June 30, 2016 valuation.
Mortality	*2019 SOA Mortality Tables for Public Employees* Various rates based on Pub-2010 mortality tables and using MP-2014 Ultimate Projection Scale. See the June 30, 2021 actuarial funding valuation report for details.
Recognition of Inflows/Outflows	*Straight-Line Amortization*
Gains or Losses	
Investment	Straight-line amortization over five years.
Economic/Demographic	Straight-line amortization over expected working life.
Assumption Changes or Inputs	Straight-line amortization over expected working life.

[1]Assumptions applied to funding valuation calculations may vary with those applied to GASB 67 calculations.

Changes in Pension Plan Assumptions

In addition to the annual actuarial valuations, LACERA requires its consulting actuary to review the reasonableness of the economic and demographic actuarial assumptions every three years. An experience study was performed by the actuary for the three-year period ended June 30, 2019. This review, commonly referred to as the investigation of experience or experience study, is accomplished by comparing actual experience during the preceding three years to what was expected to happen according to the actuarial assumptions. Based upon the experience study, the actuary determines whether changing the assumptions or methodology will better project benefit liabilities and asset growth. At the January 2020 Board of Investments meeting, the Board reaffirmed some existing assumptions and adopted some new valuation assumptions with the approval of the 2019 experience study report. Those assumptions were used to prepare the June 30, 2019, 2020, and 2021 actuarial valuation reports.

Assumption changes from the June 30, 2016 experience study report are also presented to meet GASB 67 requirements to disclose significant assumptions and other inputs to measure and report the Total Pension Liability over a 10-year period. These assumptions were adopted by the Board of Investments at their December 2016 meeting.

2019 Assumption Changes

The Board adopted a decrease in the investment return assumption to 7.0 percent. The CPI assumption of 2.75 percent and general wage growth assumption of 3.25 percent remained unchanged.

New mortality tables based on recently published tables that are specific to public plans' general and safety members, with adjustments to match LACERA experience, were adopted. The MP-2014 Ultimate Projection Scale was retained and reflects the gradual year-to-year improvement in mortality that is expected to occur in the future. This is sometimes referred to as "generational mortality." Mortality rates are based on the Pub-2010 mortality tables and include projections for expected future mortality improvement using the MP-2014 Ultimate Projection Scale.

2016 Assumption Changes

The Board adopted a decrease in the investment return assumption to 7.25 percent, a decrease in the

CPI assumption to 2.75 percent, and a corresponding decrease in the general wage growth assumption to 3.25 percent.

An increase in life expectancies was adopted. Various rates are based on the RP-2014 Healthy and Disabled Annuitant mortality tables and include a projection for expected future mortality improvement using 100 percent of the MP-2014 Ultimate Projection Scale.

Schedule of Investment Returns — OPEB Program[1]

Planning

Preparing for the journey requires the proper equipment and supplies, and a trustworthy, accurate map.

In 1138, geographer Muhammad al-Idrisi was commissioned by King Roger II of Sicily to create a detailed map of the world. Fifteen years later, the Tabula Rogeriana (Map of Roger) was published—a comprehensive compilation of maps, climatic zones, descriptions of geographic areas and cultures, and illustrations that served as the most advanced guide of the world for the next 300 years.

Dear LACERA Members:

I am pleased to present the Investment Section of LACERA's Annual Comprehensive Financial Report for Fiscal Year 2022. LACERA oversees two funds (the Funds) for the County of Los Angeles, the defined benefit retirement plan (the Pension Plan) and the LACERA Other Post-Employment Benefit Master Trust for retiree healthcare benefits (the OPEB Trust).[1] This section presents the investment performance of the Pension Plan and the OPEB Trust as well as an overview of the investment portfolios.

Jonathan Grabel
Chief Investment Officer

During fiscal year 2022, a multitude of factors weighed down on growth and continued to exacerbate economic uncertainty, including high inflation, a persistent and evolving pandemic, the effects of the Russian/Ukraine war, and global food and energy supply constraints. LACERA invests over a long-time horizon, and there will be times of strong market returns as well as times of market turmoil. With this in mind, LACERA's Board of Investments proactively adopted a new strategic asset allocation and a strategic plan in recent years with the intent to build a portfolio that can meet LACERA's future benefit obligations while being resilient in times of market volatility. Consistent with these Board-approved frameworks, LACERA's portfolio is designed to maximize risk-adjusted returns while maintaining sufficient liquidity to pay monthly benefits to our members now and into the future.

Performance Summary

The Pension Plan returned a modest 0.1 percent during the fiscal year, while the OPEB Trust posted a loss of 11.2 percent during the same period.[2] The different return profiles can primarily be attributed to the different asset allocation for the OPEB Trust relative to the Pension Plan and also that the OPEB Trust did not invest in private assets during the fiscal year. LACERA aims to meet or exceed the Funds' respective benchmarks over a full market cycle and their respective actuarial expected return assumptions over the long term. As illustrated below, the Pension Plan's return outperformed its policy benchmark for all periods and is ahead of its actuarial expected return of 7.0 percent[3] for all periods except the one-year period. The Pension Plan's outperformance for the fiscal year relative to its policy benchmark demonstrates the benefits of the broad diversification built into LACERA's strategic asset allocation during this time of market uncertainty. The OPEB Trust exceeded its policy benchmark return for the three-, five-, and seven-year periods, but did not meet its actuarial expected return of 6.0 percent for any time period other than the seven-year period.[4]

[1]LACERA is responsible for the administration and investment of two separate funds: the County of Los Angeles (the County) defined benefit retirement plan, whose assets provide retirement benefits for employees of the County and outside districts, and the LACERA Other Post-Employment Benefit Master Trust, whose assets are held in trust to provide post-employment healthcare benefits for retirees of the County, LACERA, and the Superior Court of California, County of Los Angeles.
[2]The Pension Plan and OPEB Trust returns are calculated based on a time-weighted rate of return. All returns are net of fees unless otherwise noted.
[3]The Pension Plan's actuarial expected return for the period ending June 30, 2022.
[4]The OPEB Trust's actuarial expected return for the period ending June 30, 2022.

Annualized Total Returns (Net of Fees)

Fiscal Year Ended June 30, 2022

Pension Plan	0.1%	8.5%	8.1%	7.7%	8.6%
Policy Benchmark	*-4.6*	*6.2*	*7.0*	*6.9*	*7.9*
OPEB Trust[5]	-11.2	4.4	5.8	6.7	n/a
Policy Benchmark	*-11.0*	*4.2*	*5.4*	*5.5*	*n/a*

[5]Performance inception for the OPEB Trust is February 1, 2013.

Asset Allocation

LACERA's Board of Investments (the Board) adopts separate investment policy statements to guide the Pension Plan's and the OPEB Trust's investments. Each investment policy statement defines a strategic asset allocation that aims to maximize long-term growth while ensuring that LACERA meets its current and future obligations. To that end, LACERA expects the Funds' strategic asset allocations to be the core driver of risk-adjusted returns over the long term.

The Pension Plan's and the OPEB Trust's strategic asset allocations apportion investment dollars among functional categories and sub-asset classes based on long-term risk and return objectives and short-term liquidity needs. A table detailing the functional categories, sub-asset classes, and the role each is expected to fulfill in LACERA's investment portfolios is presented below.[6]

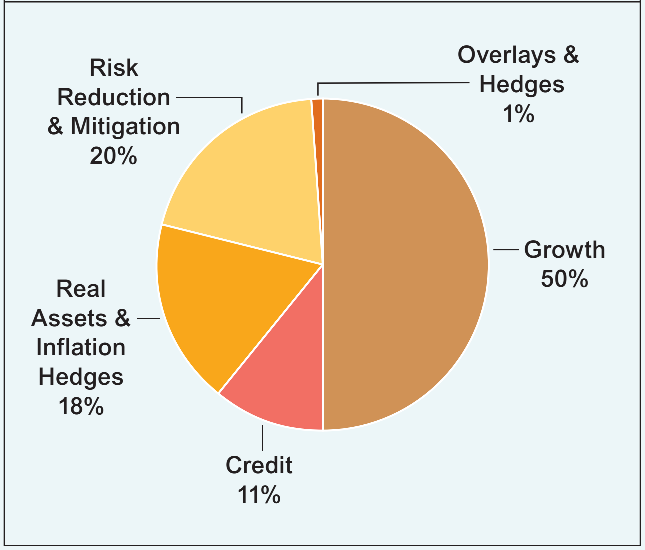
Functional Category	Sub-Asset Classes	Role in Portfolio
Growth	Global Equity Private Equity Non-Core Real Estate	Primary driver of long-term total returns
Credit	Liquid Credit Illiquid Credit	Produce current income and moderate long-term total returns with lower risk than growth assets
Real Assets and Inflation Hedges	Core Real Estate Natural Resources/Commodities Infrastructure Treasury Inflation Protected Securities	Provide income and hedge against inflation
Risk Reduction and Mitigation	Investment Grade Bonds Diversified Hedge Funds Long-term Government Bonds Cash	Provide current income and a modest level of return while reducing total portfolio risk

LACERA's Board reviews the strategic asset allocation for each Fund every three to five years or more often if needed to ensure that both portfolios are aligned with anticipated risks and opportunities. Asset allocation studies consider a number of factors including, but not limited to: the Funds' current and projected funded status, liabilities, and liquidity requirements; the long-term risk, return, and correlation expectations for individual asset categories; and an assessment of future economic conditions.

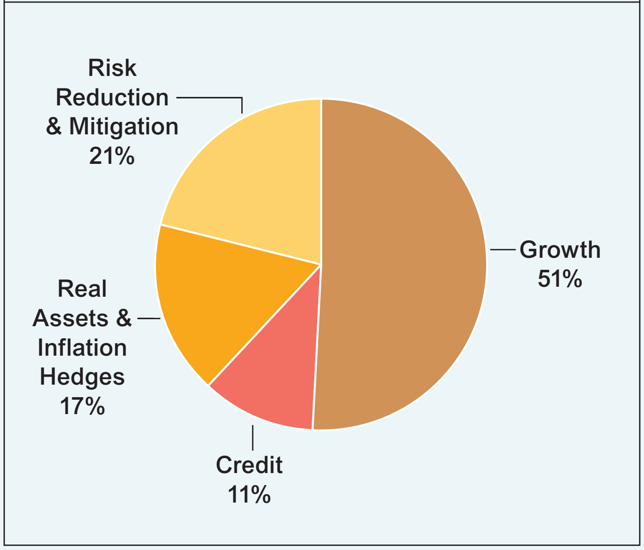
[6] The current functional frameworks of the Pension Plan and the OPEB Trust differ slightly as the OPEB Trust did not invest in private assets. In June 2021, the Board of Investments approved an 18 percent allocation to private assets for the OPEB Trust as part of the strategic asset allocation review. During the 2022–23 fiscal year, the OPEB Trust will begin investing in private assets.

The Pension Plan's June 30, 2022 actual and target asset allocation are shown below.[7]

Pension Plan Actual Asset Allocation



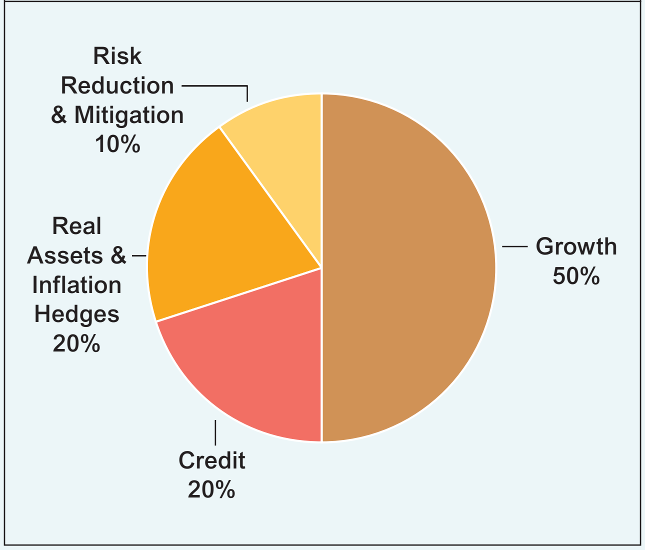
Pension Plan Target Asset Allocation



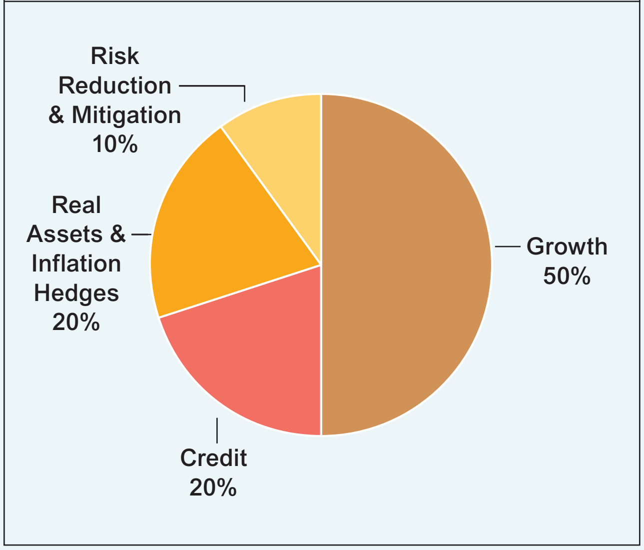
[7]The Pension Plan's actual asset allocation includes an overlay and hedges composite, which invests LACERA's excess cash (cash in excess of the target allocation of 1 percent of the Pension Plan's total assets) in synthetic securities that provide similar investment exposure to the Pension Plan and hedges 50 percent of the non-U.S. developed market currency exposure in Pension Plan's global equities portfolio.

Based on its own liquidity needs and funding status, the OPEB Trust's strategic asset allocation differs from that of the Pension Plan. The OPEB Trust's fiscal year-end and target allocations are illustrated below.

OPEB Trust Actual Asset Allocation



OPEB Trust Target Asset Allocation



During the fiscal year, LACERA transitioned the assets of the Pension Plan and OPEB Trust toward the strategic asset allocation targets approved by LACERA's Board of Investments in May 2021. Both portfolios were in compliance with their policy target allocation ranges as of fiscal year end.

Beyond strategic asset allocation, LACERA has done significant work in recent years to execute on the five distinct strategic initiatives enumerated in LACERA's strategic plan: 1) enhance operational effectiveness, 2) optimize the investment model, 3) maximize stewardship and ownership rights, 4) strengthen influence on fees and cost of capital, and 5) execute LACERA's TIDE (Towards Inclusion, Diversity, and Equity) initiative. Taken together, these initiatives are designed to maximize investment returns while mitigating risks. Consistent with these initiatives, LACERA has undertaken innovative solutions to improve expected outcomes, all of which inure to the benefit of our members. For example, LACERA established an internally managed private equity co-investment program, which has resulted in excess returns relative to the core private equity program and benchmarks while providing significant cost savings. We continue to negotiate novel fee terms and structuring rights with some of our largest alternative asset managers, resulting in LACERA retaining a higher share of the profits while enhancing our control and visibility into the underlying investments and operational costs.

Core Performance Drivers

In last year's letter, I mentioned that LACERA took proactive steps to build a more resilient, diversified, and risk-mitigating portfolio in preparation for changing economic conditions. Today we see the benefits of our efforts as the economy is facing an environment with high inflation, rising interest rates, and unexpected geopolitical events. The returns of many institutional portfolios have been adversely impacted. Despite these challenges, the Pension Plan delivered a slightly positive return during the fiscal year and outperformed its benchmark by 470 basis points. The Pension Plan's real assets and inflation hedges asset class provided strong performance, returning 14 percent for the fiscal year, while the cash overlay and hedges composite contributed a gain of $558 million in the same period. Positive returns from these two areas helped offset the negative returns experienced in the growth, credit, and risk reduction and mitigation asset classes. Additionally, all functional asset classes of the Pension Plan outperformed their individual benchmarks. LACERA's execution of its strategic asset allocation has enhanced portfolio diversification and, when combined with the execution of our strategic initiatives, have led to the Pension Plan's strong performance relative to its benchmark and peers during the fiscal year and over recent periods.

Looking Forward

The global economy and geopolitical environment experienced a remarkable amount of uncertainty during the last fiscal year. While we are pleased that the Pension Plan was able to weather the challenges and outperform the benchmark portfolio for the fiscal year, we understand that the uncertainty in the market is likely to continue for some time. We remain humbled and focused on our role as stewards of capital for our members' retirement futures. LACERA's mission is to produce, protect, and provide the promised benefit to its members, and we are as committed as ever to delivering long-term durable returns so that LACERA can deliver on its promise.

Respectfully submitted,

Jonathan Grabel

Jonathan Grabel

[1]**Total Fund — Time-Weighted Rate of Return** is the aggregate increase or decrease in the value of the portfolio resulting from the net appreciation or depreciation of the principal of the fund, plus or minus the net income or loss experienced by the fund during the period. The returns are presented net of investment management fees.

[2]**Total Fund — Money-Weighted Rate of Return** is a measurement of investment performance, net of investment expenses, adjusted for the changing amounts actually invested. The returns are presented net of investment management fees.

[3]**Return on Smoothed Valuation Assets** consists of annual investment income in excess or shortfall of the expected rate of return on a valuation (actuarial) basis, smoothed over a specified period with a portion of the year's asset gains or losses being recognized each year beginning with the current year.

[4]**Actuarial Assumed Rate of Return** is the future investment earnings of the assets, which are assumed to accrue at an annual rate, compounded annually, net of both investment and administrative expenses. The actuarial assumed rate of return is 7 percent as adopted by the Board of Investments based on the results of the actuarial investigation of experience completed in January 2020. For Fiscal Year 2021–2022, interest crediting and operating tables applied the 7 percent actuarial assumed rate of return.

[5]**Actuarial Funded Ratio** is a measurement of the funded status of the fund, calculated by dividing the valuation assets by the actuarial accrued liability.

[6]**Actuarial Valuation** report for June 30, 2022 is not yet available at financial statement publication.

Plotting the Route

To set a course, navigators mark launch and destination points on a map and plot waypoints in between, with straight-line segments leading from waypoint to waypoint.

With their scientific approach, the ancient Greeks greatly advanced mapmaking. Mathematician Eratosthenes (276–194 BCE) knew the world was spherical and used geometry to accurately calculate the earth's circumference. He was also the first to apply parallels and meridians (latitudinal and longitudinal lines) to a two-dimensional map to link different locations and estimate their distances.

Introduction

The actuarial process at the Los Angeles County Employees Retirement Association (LACERA) is governed by provisions in the County Employees Retirement Law of 1937 (CERL) and the California Public Employees' Pension Reform Act of 2013 (PEPRA). CERL requires LACERA to obtain an investigation of experience and actuarial valuation of the Pension Plan at least once every three years. It further requires the LACERA Board of Investments to transmit its recommendations related to contribution rates to the County Board of Supervisors, the primary plan sponsor. The County Board of Supervisors adopts contribution rates in accordance with LACERA's recommendations but may make minor adjustments to comply with Memoranda of Understanding (MOUs) established between the County and employee unions.

LACERA engages an independent actuarial consulting firm to perform the Pension Plan valuation annually, exceeding the regulatory frequency requirements. In addition, every three years, in compliance with CERL, the consulting actuary performs an investigation of experience of retirement benefits (experience study). On a triennial basis, a separate consulting actuarial firm reviews both the annual valuation and experience study.

Valuation Policy

The LACERA Board of Investments maintains the Retirement Benefit Funding Policy (Funding Policy). The Funding Policy was most recently amended in February 2013 to conform to the new standards mandated in PEPRA and to include the Supplemental Targeted Adjustment for Retirees (STAR) Reserve balance as part of the valuation assets on an ongoing basis in future valuations. STAR benefits previously awarded by the Board of Retirement are included for future valuations. However, the liability for STAR benefits that may be awarded in the future is not included in the valuation.

The Funding Policy requires an annual adjustment of the employer contribution rates based on the actuary's annual valuation. Milliman, the Pension Plan consulting actuary, reviewed the adequacy of the plan sponsor funding policies in accordance with actuarial standards of practice (ASOP). Milliman performed the most recent actuarial valuation as of June 30, 2021 and recommended changes to the employer and select employee (member) contribution rates. At its December 2021 meeting, the LACERA Board of Investments adopted Milliman's June 30, 2021 valuation report.

In addition to the annual valuations, LACERA requires its actuary to review the reasonableness of the economic and demographic actuarial assumptions every three years. This review, commonly referred to as the experience study, is accomplished by reviewing relevant forecasts and comparing actual experience to what was expected to happen according to the actuarial assumptions. Based on this review, the actuary recommends changes in the assumptions or methodology that will better project benefit liabilities and asset growth. The LACERA Board of Investments adopts, possibly with modification, the recommended actuarial methods and assumptions to be used in future valuations. At its January 2020 meeting, the LACERA Board of Investments adopted Milliman's recommendations based on the 2019 Investigation of Experience for Retirement Benefit Assumptions report with modifications to the recommended economic and demographic assumptions, and adopted a three-year phase-in of the resulting change in employer contribution rates.

Member Contributions

Member contribution rates for contributory legacy plans (General Plans A, B, C, and D, and Safety Plans A and B) vary based on the age a member joins LACERA and the underlying actuarial assumptions and methodologies. Therefore, it is expected that these member contribution rates will change no more frequently than every three years. As part of the experience study, the Pension Plan actuary recommends adjustments to member contribution rates, if necessary, due to changes in the underlying actuarial assumptions and methodologies. Since there were no changes to the underlying actuarial assumptions and methodologies in the June 30, 2021 valuation, the actuary had no recommended changes to member contribution rates for these retirement plans.

General Plan G and Safety Plan C use single-rate member contribution rates that are equal to one-half of the respective plan's normal cost rate. As such, it is expected that member contribution rates for these plans may change annually. Based on the June 30, 2021 valuation, the actuary recommended new member contribution rates effective July 1, 2022. The recommended member contribution rates are slightly lower for all Plan G and Safety Plan C members.

Employer Contributions

The consulting actuary reviews employer contribution rates each year and recommends changes if necessary. The members and employers are responsible for contributing a portion of the present value of pension plan benefits and expenses, which is allocated to a valuation year by the actuarial cost method. These contributions are known as normal cost contributions. The portion not funded by expected member contributions is the responsibility of the employers and is included in the employer normal cost. The employers are also responsible for contributions to eliminate funding shortfalls related to liabilities accrued in the past, including changes in the economic and demographic assumptions impacting past service. This portion of the employer's contribution rate is known as the Unfunded Actuarial Accrued Liability (UAAL) contribution rate.

For the June 30, 2021 valuation, the actuary recommended new employer normal cost contribution rates for all plans and a new UAAL contribution rate, effective July 1, 2022. Based on the 2021 valuation, the employer normal cost rate decreased from 10.89 percent to 10.88 percent, and the employers' required contribution rate to finance the UAAL decreased from 14.85 percent to 13.58 percent. The decrease in the calculated employer contribution rate from 24.64 percent to 24.46 percent of payroll was due to the recognition of the current year investment gains, which was offset by an increase due to the phase-in of the final portion of 2019 assumption changes. Due to the phase-in approach, the employer contribution rates set for the prior two fiscal years were lower than determined by actuarial calculations, resulting in an increase in the UAAL. Without the phase-in, the employer contribution rate in fiscal year beginning 2021 would have been 25.74 percent of pay instead of the 24.64 percent that is currently being paid. Shortfalls between assets required to fund the plan (contributions and investment earnings) and liabilities (benefit payments) required to be paid will result in future employer contribution increases to fund the UAAL. For the fiscal year beginning July 1, 2022, the impact of the June 30, 2019 assumption changes is fully phased-in and the employer contribution rate is approximately 0.23 percent higher to account for the phase-in approach.

Actuarial Cost Method

The entry age actuarial cost method is used for both funding requirements and financial reporting purposes. This method was approved by LACERA in 1999, as recommended by the consulting actuary. The entry age normal method allocates costs to each future year as a level percentage of payroll, which is ideal for employers to budget for future costs.

Amortization Method

LACERA employs a layered amortization method to fund the UAAL. Under this method, the initial UAAL amount as of June 30, 2009 was amortized over a closed 30-year period. Subsequent changes in the UAAL were amortized over new closed 30-year periods. Effective with the June 30, 2019 valuation, the amortization period was decreased so all existing layers with more than 22 years remaining were re-amortized over closed 22-year periods. All new UAAL layers are amortized over a 20-year period, beginning with the date the contribution is first expected to be made.

Actuarial Reviews

The LACERA Board of Investments Actuarial Audit Policy Directive requires actuarial reviews of retirement benefit valuations and experience studies at regular intervals in the same cycle as LACERA's triennial experience study and valuation. Cavanaugh Macdonald, as LACERA's reviewing actuary, performed the most recent review of Milliman's experience study and valuation reports as of June 30, 2019.

In regard to the most recent review of the experience study, Cavanaugh Macdonald concluded, “We find the proposed actuarial assumptions and methods to be reasonable. The Investigation of Experience was performed by qualified actuaries and was performed in accordance with the principles and practices prescribed by the Actuarial Standards Board.” According to Cavanaugh Macdonald, regarding the review of Milliman’s valuation report, “We find the June 30, 2019 actuarial valuation results to be reasonable and accurate, based on the assumption and methods used.”

Other Actuarial Information

Actuarially Determined Contributions: The Schedule of Contributions History — Pension Plan included in the Required Supplementary Information of the Financial Section provides 10 years of actuarially determined contributions in relation to the actual contributions provided to the Pension Plan.

Actuarial Methods and Assumptions: A detailed description of the actuarial methods and assumptions for the Pension Plan valuation used by the consulting actuary to prepare the Pension Plan (Retirement Benefits) funding valuation report is included in this Actuarial Section. The Financial Section also discusses the actuarial methods and significant assumptions used for financial reporting and required Governmental Accounting Standards Board (GASB) Statement Number 67 disclosures. Any differences between these assumptions used for actuarial funding and those applied for financial reporting purposes are noted.

The following additional information is included in this section:

- Actuary’s Certification Letter — Pension Plan
- Summary of Actuarial Methods and Assumptions — Pension Plan
- Schedule of Funding Progress — Pension Plan
- Active Member Valuation Data — Pension Plan
- Retirants and Beneficiaries Added to and Removed from Retiree Payroll — Pension Plan
- Actuary Solvency Test — Pension Plan
- Actuarial Analysis of Financial Experience — Pension Plan
- Retirement Probability of Occurrence

A Summary of Major Pension Plan Provisions is available upon request by contacting LACERA or visiting the LACERA website.

See Note A — Benefit Plan Descriptions in the Financial Section for pension plan information.

Board of Investments
Los Angeles County Employees Retirement Association
300 North Lake Avenue, Suite 820
Pasadena, CA 91101-4199

Dear Trustees of the Board:

The basic financial goal of LACERA is to establish contributions which fully fund the System's liabilities and which, as a percentage of payroll, remain level for each generation of active members.[1] Annual actuarial valuations measure the progress toward this goal, as well as test the adequacy of the contribution rates.

LACERA measures its funding status as the Funded Ratio, which is equal to the actuarial value of valuation assets over the actuarial accrued liabilities. The funding status based on the past three actuarial valuations is shown below:

Valuation Date	Funded Ratio
June 30, 2019	77.2%
June 30, 2020	76.3%
June 30, 2021	79.3%

It is our opinion that LACERA continues in sound financial condition as of June 30, 2021. The increase in the Funded Ratio since the prior year is primarily due to the recognition of actuarial asset gains from the current year, with an offset for larger than expected salary increases. Using the market value of assets as of June 30, 2021, the Funded Ratio would be 88.3%. As of June 30, 2021 a net asset gain is being deferred.

LACERA's funding policy provides that the County's contributions are equal to the normal cost rate, net of member contributions, plus the amortization payment of any Unfunded Actuarial Accrued Liability (UAAL) or minus the amortization of any Surplus Funding. A UAAL occurs when the Funded Ratio is less than 100%. Effective with the June 30, 2019 valuation, the amortization of the UAAL uses a layered 20-year approach, under which increases or decreases in the UAAL each year are amortized over closed 20-year periods. All layers created prior to June 30, 2019 with a period greater than 22 years were re-amortized over new closed 22-year periods at that time. Surplus Funding occurs when the Funded Ratio is greater than 120%. If the Funded Ratio exceeds 120% and all conditions in California Government Code Section 7522.52(b) are satisfied, then the Surplus Funding is amortized over an open 30-year period.

[1]A further goal is to minimize employer contributions, consistent with the requirements of Article XVI, Section 17 of the California Constitution and Section 31595 of the California Government Code so long as it does not impair the paramount fiduciary duty to provide benefits to members and their beneficiaries.

The current funding policy requires LACERA to consider all of the funds in the Contingency Reserve in excess of 1% of the market value of assets as part of the valuation assets. The STAR Reserve is also considered part of the valuation assets. The Board's policy does not include any corresponding liability for future STAR benefits in the valuation. Note that if all of the STAR Reserve funds were excluded from the valuation assets for funding purposes, the Funded Ratio on June 30, 2021 would decrease to 78.5%.

In preparing the June 30, 2021 valuation report, we relied, without audit, on information (some oral and some in writing) supplied by LACERA. This information includes, but is not limited to, statutory provisions, employee data, and financial information. In our examination of these data, we have found them to be reasonably consistent and comparable with data used for other purposes, although we have not audited the data at the source. Since the valuation results are dependent on the integrity of the data supplied, the results can be expected to differ if the underlying data is incomplete or missing. It should be noted that if any data or other information is inaccurate or incomplete, our calculations may need to be revised.

The valuation is also based on our understanding of LACERA's current benefit provisions and the actuarial assumptions which were reviewed and adopted by the Board of Investments. The funding assumptions were based on the triennial investigation of experience study report as of June 30, 2019 and adopted at the January 8, 2020 Board of Investments meeting. The assumptions and methods used for financial reporting under GASB 67 are the same as the funding assumptions and methods with the following exceptions:

1. The discount rate is gross of administrative expenses.
2. The STAR COLA is treated as substantively automatic and is valued to the extent it is projected to be paid in the future.
3. The individual entry age normal cost method is used without modification.
4. The Fiduciary Net Position is equal to the market value of assets minus liabilities.

The actuarial computations presented in the valuation report are for purposes of determining the recommended funding amounts for LACERA consistent with our understanding of their funding requirements and goals. The liabilities are determined by using the entry age funding method. The actuarial assets are determined by using a five-year smoothed recognition method of asset gains and losses, determined as the difference of the actual market value to the expected market value. In our opinion, the actuarial assumptions and methods are internally consistent, individually reasonable and, in combination, represent a reasonable estimate of the anticipated experience of LACERA. In our assessment of the investment return assumption, we have considered LACERA's investment policy and Meketa's capital market assumptions, in addition to Milliman's capital market assumptions and forecasts of other external investment consultants. The valuation results were developed using models intended for valuations that use standard actuarial techniques.

Future actuarial measurements may differ significantly from the current measurements as presented in the valuation report and GASB 67 report due to such factors as the following: experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period); and changes in the program provisions or applicable law. Due to the limited scope of our assignment, we did not perform an analysis of the potential range of future measurements.

Milliman's work is prepared exclusively for LACERA for a specific and limited purpose. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. It is a complex, technical analysis that assumes a high level of knowledge concerning LACERA's operations.

No third party recipient of Milliman's work product who desires professional guidance should rely upon Milliman's work product. Such recipients should engage qualified professionals for advice appropriate to their specific needs.

The consultants who worked on this assignment are retirement actuaries. Milliman's advice is not intended to be a substitute for qualified legal or accounting counsel. The signing actuaries are independent of the plan sponsor. We are not aware of any relationship that would impair the objectivity of our work.

Milliman prepared the following information for the actuarial section:
1. Retirees and Beneficiaries Added to and Removed from Benefits – Pension
2. Actuarial Analysis of Financial Experience – Pension
3. Actuary Solvency Test – Pension
4. Schedule of Funding Progress – Pension

In addition, for Note E – Pension Plan Liabilities of the financial section, Milliman prepared the Schedule of Net Pension Liability, and Sensitivity Analysis.

Except as noted above, LACERA staff prepared the information in Note E and the Required Supplementary Information, based on information supplied in prior actuarial reports, our June 30, 2021 actuarial valuation, and our June 30, 2022 GASB 67 report. Milliman has reviewed the information in Note E for accuracy.

We certify that the assumptions and methods used for funding and financial reporting purposes in the June 30, 2021 funding valuation meet the parameters set by Actuarial Standards of Practice promulgated by the Actuarial Standards Board (ASB). We are members of the American Academy of Actuaries and have experience in performing valuations for public retirement systems.

Sincerely,

Nick J. Collier, ASA, EA, MAAA
Principal and Consulting Actuary

Craig Glyde, ASA, EA, MAAA
Principal and Consulting Actuary

NC/CG/va

The table below includes a summary of actuarial methods and both demographic and economic assumptions used by LACERA's consulting actuary in performing the actuarial valuation of the Pension Plan.

Method/Assumption	Application
Actuarial Methods and Assumptions	*2019 Pension Plan Experience Study* The actuarial methods and assumptions used to determine Pension Plan liabilities are based on the results of the 2019 experience study as recommended by Milliman, the consulting actuary, and adopted by the LACERA Board of Investments. *2021 Pension Plan Actuarial Valuation* Milliman used the 2019 experience study results to prepare the annual actuarial valuation report as of June 30, 2021. LACERA used the 2021 Actuarial Valuation report to update the valuation disclosures in this Actuarial Section. *Retirement Benefit Funding Policy* In 2009, the Board of Investments approved the Retirement Benefits Funding Policy (Funding Policy). Under the Funding Policy, modifications to the asset valuation and amortization methods were adopted beginning with the June 30, 2009 actuarial valuation. The Funding Policy was amended in February 2013 to conform with the standards mandated in PEPRA and to specify that the Supplemental Targeted Adjustment for Retirees (STAR) Reserve should be included as a valuation asset on an ongoing basis.
Actuarial Cost Method	*Entry Age Normal* Under the principles of this method, the actuarial present value of the projected benefits of each individual included in the valuation is allocated as a level percentage of the individual's projected compensation between entry age and assumed exit (until maximum retirement age). For members who transferred between plans, entry age is based on original entry into the retirement system. This method was reaffirmed in the 2019 experience study.
Actuarial Asset Valuation Method	*Five-Year Asset Smoothing* The assets are valued using a five-year smoothing method based on the difference between the expected and actual market value of assets as of the valuation date. The gains and losses on market value are recognized over a five-year period to spread out the impact of investment market performance, rather than recognizing the entire effect of market changes each year. The expected market value is the prior year's market value increased with the net cash flow of funds, all increased with interest during the past fiscal year at the expected investment return rate assumption. The five-year smoothing valuation basis for all assets was adopted beginning with the June 30, 2009 valuation. *STAR Reserve Assets* The inclusion of the STAR Reserve in the valuation of assets was formalized for current and future actuarial valuations in the February 2013 amendment to LACERA's Funding Policy. Since the June 30, 2013 valuation, Milliman has included the STAR Reserve as part of the valuation assets.
Amortization of Unfunded Actuarial Accrued Liability (UAAL)	*20-Year Amortization* As of the June 30, 2019 valuation, all existing amortization layers were set to be amortized over a maximum 22-year period and now have a period of 20 years or less. Future actuarial gains and losses are amortized over new closed 20-year periods, beginning with the date the contribution is first expected to be made. This is referred to as layered amortization. For the June 30, 2021 valuation, 13 amortization layers were used to calculate the total amortization payment beginning July 1, 2022.

Method/Assumption	Application
General Wage Growth and Projected Salary Increases	*3.25 Percent Wage Growth and Various Rates* Projected salary increases: 3.51 percent to 12.54 percent. The total expected increase in salary includes both merit and the general wage increase assumption of 3.25 percent per annum. The total result is compounded rather than additive. Increases are assumed to occur in the middle of the fiscal year (i.e., January 1) and apply only to base salary. The mid-year timing reflects that salary increases occur throughout the year, or on average mid-year. The General Wage Growth rate was adopted beginning with the June 30, 2016 valuation. The rate was reaffirmed in the 2019 triennial experience study. The Projected Salary Increases were adopted beginning with the June 30, 2019 valuation.
Investment Rate of Return	*Annual Rate of 7.0 Percent* Future investment earnings are assumed to accrue at an annual rate of 7 percent, compounded annually, net of both investment and administrative expenses. The same rate of return is used to discount the actuarial accrued liability. This rate was adopted beginning with the June 30, 2019 valuation.
Post-Retirement Benefit Increases	*Annual COLAs of 2.75 Percent or 2.0 Percent* Post-retirement benefit increases of either 2.75 percent or 2 percent per year are assumed for the valuation in accordance with statutory limits. These adjustments, which are based on the Consumer Price Index (CPI), are assumed payable each year in the future, as they are not greater than the expected increase in the CPI of 2.75 percent per year. Plan E members receive a prorated post-retirement benefit increase of 2 percent for service credit earned on and after June 4, 2002. The portion payable is based on a ratio of the member's years of service earned on and after June 4, 2002 to the member's total years of service. The portion of the full 2 percent increase not provided for may be purchased by the member. COLA adjustments for members with service credit earned prior to June 4, 2002 are based on a ratio of months of service earned on and after June 4, 2002 divided by the total months of service.
Consumer Price Index (CPI)	*Annual Rate of 2.75 Percent* This rate was adopted beginning with the June 30, 2016 valuation and reaffirmed in the 2019 triennial experience study.
Rates of Separation From Employment	*Various Rates and Probabilities* Various rates are dependent upon member's age, gender, years of service, and retirement plan. Each rate represents the probability that a member will separate from service at each age (or service duration) due to the particular cause. These rates of separation from active service were adopted beginning with the June 30, 2019 valuation. The Probability of Occurrence schedule included in this Actuarial Section includes a summary of probability of retirement and withdrawal for sample ages.

Method/Assumption	Application
Expectation of Life After Retirement[1,2]	*2019 SOA Mortality Tables for Public Employees* The same post-retirement mortality probabilities are used in the valuation for both members retired from service and their beneficiaries. Current beneficiary mortality is assumed to be the same as for healthy general members of the same sex. Future beneficiaries are assumed to be of the opposite sex and have the same mortality as general members. **Males:** **General Members:** PubG-2010 Healthy Retiree Mortality Table for Males, with MP-2014 Ultimate Projection Scale. **Safety Members:** PubS-2010 Healthy Retiree Mortality Table for Males multiplied by 85 percent, with MP-2014 Ultimate Projection Scale. **Females**: **General Members:** PubG-2010 Healthy Retiree Mortality Table for Females multiplied by 110 percent, with MP-2014 Ultimate Projection Scale. **Safety Members:** PubS-2010 Healthy Retiree Mortality Table for Females, with MP-2014 Ultimate Projection Scale. These probabilities were adopted June 30, 2019.
Expectation of Life After Disability[1,2]	*2019 SOA Mortality Tables for Public Employees* **Males:** **General Members:** Average of PubG-2010 Healthy Retiree Mortality Table for Males and PubG-2010 Disabled Retiree Mortality Table for Males, both projected with MP-2014 Ultimate Projection Scale. **Safety Members:** PubS-2010 Healthy Retiree Mortality Table for Males, with MP-2014 Ultimate Projection Scale. **Females:** **General Members:** Average of PubG-2010 Healthy Retiree Mortality Table for Females and PubG-2010 Disabled Retiree Mortality Table for Females, both projected with MP-2014 Ultimate Projection Scale. **Safety Members:** PubS-2010 Healthy Retiree Mortality Table for Females, with MP-2014 Ultimate Projection Scale. These probabilities were adopted June 30, 2019.

[1]The PUB-2010 mortality tables were published by the Society of Actuaries (SOA's) Retirement Plans Experience Committee (RPEC) in January 2019. The data studied includes approximately 46 million life-years of exposure and 580,000 deaths from public pension plans over the period 2008 to 2013. The PUB-2010 mortality tables include separate tables for general and safety members, and for each of those classes of members includes separate mortality tables for healthy annuitants, disabled retirees, and employees.

[2]The SOA's Mortality Improvement Scale MP-2014 (published in October 2014) is used to adjust the PUB-2010 mortality tables to account for anticipated changes in mortality rates in future years. In general, it is assumed that mortality rates will improve (implying longer lifetimes) in the future due partially to improvements in healthcare.

Method/Assumption	Application
Recent Changes and Their Financial Impact	*2019 Pension Plan Experience Study* An experience study was performed by the consulting actuary for the three-year period ended June 30, 2019. The LACERA Board of Investments adopted the demographic assumptions recommended in that report with a three-year phase-in of the impact of the change on employer contribution rates. In addition, the Board of Investments adopted a lower investment return assumption. Changes to those assumptions and other financial impacts are discussed below. *STAR Reserve* The STAR Reserve is included in the 2019 valuation assets. There is no corresponding liability for future potential STAR benefits included in the valuation. The inclusion of the STAR Reserve in the valuation assets was formalized for the current and future actuarial valuations in the February 2013 amendment to LACERA's Funding Policy. *2019 Assumption Changes* At the January 2020 LACERA Board of Investments meeting, the Board adopted new assumptions with the 2019 Investigation of Experience report. The adopted assumptions included lowering the investment return assumption from 7.25 percent to 7 percent, increasing the rates of assumed merit salary increases (primarily for Safety members), and updating mortality tables to the public plan specific tables published in 2019 by the Society of Actuaries Retirement Plans Experience Committee (RPEC). Of these changes, the reduction in the investment return assumption had the greatest impact on the results of this valuation. All assumption changes have been reflected in the June 30, 2019 actuarial valuation. *Funded Ratio* As of June 30, 2021, the Funded Ratio increased from 76.3 percent to 79.3 percent, primarily due to the recognition of current and prior year investment gains and losses that caused an increase of 2.5 percent in the Funded Ratio. Contributions to amortize the Unfunded Actuarial Accrued Liability (UAAL) caused a 0.7 percent increase, while salary increases greater than assumed partially offset these increases and caused the Funded Ratio to decrease by 0.4 percent. *Employer Contributions* The total calculated employer contribution rate decreased from the prior valuation by 0.18 percent (from 24.64 percent to 24.46 percent) of payroll. The decrease in the employer contribution rate is primarily due to the recognition of current and prior year investment gains and losses, offset by the impact of the phase-in of the final portion of the 2019 assumption changes. The cost impact of the assumption changes was phased in over a three-year period. Without the phase-in of the increase, the employer contribution rate would have been 25.74 percent effective July 1, 2021. The effect of the phase-in is an increase in the UAAL that will require higher employer contribution rates in future years. *Member Contributions* New member contribution rates are recommended for General Plan G and Safety Plan C effective July 1, 2022. General Plan G and Safety Plan C member rates are required to be equal to 50 percent of the gross normal cost of the respective plan. The recommended member contribution rates are slightly lower for General Plan G and Safety Plan C. Member contribution rates for all contributory legacy plans (General Plans A, B, C, and D, and Safety Plans A and B) vary based on a member's entry age when joining LACERA and the underlying assumptions. The actuary had no recommended changes to member contribution rates for all other plans.

Schedule of Funding Progress — Pension Plan

Introduction

The actuarial valuation of the retiree medical, dental/vision, and death benefits promised to retired Los Angeles County (County) workers who also participate in the LACERA retirement benefits plan is governed by provisions in the LACERA Other Post-Employment Benefits (OPEB) Actuarial Valuation and Audit Policy (OPEB Policy), which the LACERA Board of Retirement establishes and adopts. The OPEB Policy is subject to periodic assessments to identify and incorporate necessary updates and revisions. In October 2017, the OPEB Policy was revised and now parallels the policy applicable to the retirement benefits actuarial valuation and related actuarial review process.

LACERA engages an independent actuarial consulting firm to perform the OPEB Program valuation annually, consistent with the OPEB Policy. In addition, every three years to comply with the OPEB Policy, the consulting actuary, Milliman, performs an investigation of experience (experience study). On a triennial basis, a separate consulting actuarial firm reviews both the annual valuation and experience study.

The OPEB actuarial valuations are performed to review program funding metrics and to satisfy financial statement reporting guidelines that apply to sponsoring employers, such as the County, and those organizations who administer OPEB benefit programs, such as LACERA.

Contributions and Funding Policy

The County historically satisfied its healthcare premium subsidy obligations on a pay-as-you-go basis. LACERA bills the premiums to the County, outside districts, and members on a monthly basis. Plan members are required to pay the difference between the applicable employer-paid subsidy and the actual premium cost. An administrative fee to cover the costs of administering the OPEB Program is included in the monthly healthcare premium.

In June 2015, the County Board of Supervisors approved the countywide budget with a dedicated funding promise for the OPEB liability, using the multiyear approach to enhance the County's OPEB Trust balances in a consistent manner. This funding commitment provides prefunding goals and indicates that the County has placed a priority on making OPEB contributions. The County, LACERA, and Superior Court regularly prefund these obligations, depositing monies into an irrevocable OPEB trust. The plan sponsors provide updated funding projections each year, including a five-year forecast. Milliman reviewed the adequacy of the plan sponsor funding policies and found them to be in compliance with Actuarial Standards of Practice (ASOP) Number 6.

Actuarial Cost Method

Effective with the July 1, 2018 OPEB valuation, the actuarial cost method was changed to entry age normal. Under the principles of this method, the actuarial present value of the projected benefits of each individual included in the valuation is allocated as a level percentage of the individual's projected compensation between entry age and assumed exit (until maximum retirement age). For members who transferred between plans, entry age is based on original entry into the retirement system. The entry age normal actuarial cost method is also used for financial reporting purposes as required by GASB.

OPEB Agent Plan

The July 1, 2018 OPEB valuation marked the first valuation prepared under an agent plan structure, changing OPEB funding reporting from the cost-sharing plan structure used in OPEB valuations since July 1, 2006. At the direction of the County to precisely allocate its own liabilities, the agent plan structure allows for projecting the actuarial accrued liability based on each individual agent's assets and investment rate of return assumptions. The investment earnings assumption for agents that are prefunding through the OPEB Trust is the expected return for the OPEB Trust. The investment earnings assumption for the agents that are not prefunding through the OPEB Trust is the County's general funds' expected return. However, OPEB specific demographic assumptions such as initial enrollment, medical plan and tier selection, spouse age difference, and re-enrollment assumptions are combined for all of the agents.

The following agents and agent groupings were developed to determine the liability for the individual agents, the total OPEB Trust, and the total OPEB Program:

- OPEB Trust — Los Angeles County, Superior Court, and LACERA
- OPEB Program — Los Angeles County, Superior Court, LACERA, and outside districts

The total OPEB Program agent grouping is used to disclose the aggregate amounts throughout the Actuarial Section.

Financial Reporting Standards

In June 2015, the GASB issued Statement Numbers 74 and 75, which govern new accounting and financial reporting standards for public sector post-retirement benefit programs and the employers that sponsor them. GASB 74 is for OPEB plans (LACERA) and was effective beginning for the plan fiscal year July 1, 2016.[1] GASB 75 is for employers that sponsor OPEB plans and is effective beginning for the employer fiscal year July 1, 2017.[2]

The data, assumptions, program provisions, and funding goals described in the OPEB valuation report serve as a basis for preparing separate GASB 74 and 75 disclosure reports. GASB sets forth specific financial reporting requirements for LACERA and the County, which result in different computations and data—including discount rates—than the information provided in the OPEB valuation report.

Due to the July 1, 2018 transition from a cost-sharing to an agent plan, LACERA is no longer required to disclose the OPEB Program's Net OPEB Liability (NOL). Under the agent structure reporting model, the plan administrator (LACERA) does not report information in aggregate, but instead, provides agent-specific information, as each individual agent is now required to report their portion of the NOL. LACERA has determined a GASB 74 disclosure report is no longer necessary due to the agent structure reporting changes. The last GASB 74 report prepared under a cost-sharing plan was as of a June 30, 2018 reporting date and reflected in LACERA's June 30, 2019 financial statements. LACERA's June 30, 2022 and 2021 financial statements contain some limited information within the RSI Section to support compliance with GASB 74 requirements under an agent plan.

OPEB Actuarial Projects

Milliman performed the most recent OPEB valuation as of July 1, 2021, using the 2020 OPEB experience study of actuarial assumptions. The OPEB Policy not only requires annual OPEB valuations but also requires the actuary to review the reasonableness of the economic and demographic assumptions every three years. As a result of the current OPEB Policy's increased valuation and review frequency, and for consistency with the retirement benefits valuation and review requirements, the timing of these actuarial projects was adjusted to promote operational efficiency.

Specifically, the OPEB experience study, OPEB experience study review, and OPEB valuation reviews as of July 1, 2018 and July 1, 2020 were scheduled in two-year cycles to eliminate a four-year gap between the current and prior OPEB Policy implementation.

The project schedule will revert back to a three-year cycle beginning with the July 1, 2023 OPEB experience study. Beginning in 2006, Milliman completed OPEB valuations every two years. The OPEB Policy changed the frequency to annual with the July 1, 2017 OPEB valuation.

Actuarial Review Results

The most recent actuarial reviews of the OPEB experience study and OPEB valuation were conducted based on the current OPEB Policy. The OPEB Program reviewing actuary, Cavanaugh Macdonald Consulting (CMC), last performed reviews of Milliman's OPEB experience study and OPEB valuation as of July 1, 2020.

As required by the current OPEB Policy, the actuarial reviews for the OPEB experience study and OPEB valuation performed as of July 1, 2020 complete the two-year staggered cycle. The next triennial cycle for the actuarial reviews will be conducted as of July 1, 2023 for both the OPEB experience study and OPEB valuation.

Other Actuarial Information

Actuarial Methods and Assumptions: A description of the actuarial methods and assumptions for the OPEB valuation used by the OPEB consulting actuary are included in this Actuarial Section.

The following additional information is included in this section:

- Actuary's Certification Letter — OPEB Program
- Summary of Actuarial Methods and Assumptions — OPEB Program
- Schedule of Funding Progress — OPEB Program
- Active Member Valuation Data — OPEB Program
- Retirants and Beneficiaries Added to and Removed from Rolls — OPEB Program
- Actuary Solvency Test — OPEB Program
- Actuarial Analysis of Financial Experience — OPEB Program

A Summary of Major OPEB Program Provisions is available upon request by contacting LACERA or visiting the LACERA website.

See Note N — OPEB Program for details regarding the plan description and benefits.

[1]LACERA implemented GASB 74 as of June 30, 2017.
[2]The LACERA OPEB Program participating employers implemented GASB 75 as of June 30, 2018.

Pasadena, CA 91101-4199

Dear Trustees of the Board:

Los Angeles County provides Other Postemployment Benefits (OPEB): retiree medical, dental/vision, and death/burial insurance benefits to the retired Los Angeles County (County) workers who also participate in the Los Angeles County Employees Retirement Association (LACERA) retirement benefits program. These healthcare related benefits are called the Los Angeles County OPEB Program, or the "Program". The Program currently provides these benefits on a pay-as-you-go basis while also prefunding into the OPEB Trust. OPEB actuarial funding valuations are performed annually.

A summary of the results of the past three actuarial valuations is shown below. All dollar amounts are in billions.

Valuation Date	Actuarial Accrued Liability	Assets	Unfunded Actuarial Accrued Liability	ADC* as a Percentage of Payroll
July 1, 2019	$20.75	$1.24	$19.51	18.87%
July 1, 2020	$21.30	$1.49	$19.81	18.18%
July 1, 2021	$21.16	$2.31	$18.85	16.76%

*Actuarially Determined Contribution (ADC) based on GASB 74/75 terminology.

The County's Board of Supervisors affirmed their support for prefunding its OPEB liabilities by providing specific initial appropriations to the OPEB Trust. Since the July 1, 2012 Valuation, details of a long-term funding policy have been finalized. The funding policy provides for steady increases in contributions each year with the ultimate goal of making contributions equal to the ADC. The July 1, 2014, July 1, 2016 and annual OPEB Valuations thereafter include assets invested in the OPEB Trust.

Milliman has developed certain models to estimate the values included in these valuations. The intent of the models was to estimate the assumed investment earnings, analysis of OPEB demographic assumptions, retiree health claim costs, and annual trends for retiree health benefits. We have reviewed the models, including their inputs, calculations, and outputs for consistency, reasonableness, and appropriateness to the intended purpose and in compliance with generally accepted actuarial practice and relevant actuarial standards of practice (ASOP).

The models rely on data and information as input to the models. We have relied upon certain data and information listed below for this purpose and accepted it without audit. To the extent that the data and information provided is not accurate, or is not complete, the values provided in these valuations may likewise be inaccurate or incomplete.

In preparing the July 1, 2021 OPEB funding valuation report, we relied, without audit, on information (some oral and some in writing) supplied by Los Angeles County, LACERA, and Segal (LACERA's healthcare consultant). This information includes, but is not limited to, benefit descriptions, membership data, and financial information. In our examination of these data we have found them to be reasonably consistent and comparable with data used for other purposes, although we have not audited the data at the source. Since the valuation results are dependent on the integrity of the data supplied, the results can be expected to differ if the underlying data is incomplete or missing. In some cases, where the data was incomplete, we made assumptions as noted in Table C-10 of our July 1, 2021 OPEB funding valuation report. It should be noted that if any of this information is inaccurate or incomplete, our results may be different and our calculations may need to be revised. The valuation results were developed using models intended for valuations that use standard actuarial techniques.

The valuation is also based on our understanding of the Program's current benefit provisions and the actuarial assumptions, which were reviewed and adopted by the Board of Retirement. The retirement benefit related demographic and economic assumptions were based on those developed for the June 30, 2021 valuation of the LACERA retirement benefit program, approved by LACERA's Board of Investments. Economic and relevant demographic assumptions from the retirement benefit investigation of experience, conducted by Milliman, are included in the July 1, 2021 OPEB valuation. Assumptions unique to OPEB were identified and evaluated in Milliman's 2020 OPEB investigation of experience study report as of July 1, 2020, approved by LACERA's Board of Retirement.

The OPEB Program changed from cost sharing to agent effective with the July 1, 2018 OPEB funding valuation. The OPEB demographic and trend assumptions are combined for all of LACERA's agents. The investment rate of return assumption differs by the agents that are prefunding into the OPEB Trust and the agents that are not prefunding into the OPEB Trust.

With the change from cost sharing to agent, a GASB 74 disclosure report for LACERA's financial statements is no longer required to report the OPEB Program liability in LACERA's financial statements. The employer specific information will be provided in the GASB 75 disclosure reports for employer financial reporting. The assumptions and methods used for financial reporting under GASB 75 are the same as the funding assumptions and methods used in the July 1, 2021 OPEB funding valuation report, with the following exceptions:

1. The GASB 75 discount rate is determined using depletion date methodology, and it changes on each measurement date.

2. The GASB 75 liabilities have LACERA operational administrative expenses removed.

The actuarial computations presented in the July 1, 2021 OPEB funding valuation and the forthcoming June 30, 2023 GASB 75 disclosure reports are for purposes of fulfilling financial accounting requirements for LACERA's employers. The liabilities in the July 1, 2021 OPEB funding valuation and the GASB 75 disclosure reports are determined by using the entry age normal actuarial cost method. The assets are recognized at market value. We consider the actuarial assumptions and methods to be internally consistent, to represent a long-term perspective, and to be reasonable. We believe they also meet the parameters of Governmental Accounting Standards Board Statement No. 75 for fulfilling financial accounting requirements. Nevertheless, the emerging costs will vary from those presented in our report to the extent that actual experience differs from that projected by the actuarial assumptions.

Milliman

milliman.com

Future actuarial measurements may differ significantly from the current measurements presented in the OPEB funding valuation report and the GASB 75 disclosure report due to such factors as the following: OPEB program experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period); and changes in OPEB program provisions or applicable law. Due to the limited scope of our assignment, we did not perform an analysis of the potential range of future measurements.

Milliman's work is prepared exclusively for LACERA for a specific and limited purpose. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. It is a complex, technical analysis that assumes a high level of knowledge concerning LACERA's operations.

No third party recipient of Milliman's work product who desires professional guidance should rely upon Milliman's work product. Such recipients should engage qualified professionals for advice appropriate to their specific needs.

The consultants who worked on this assignment are employee benefit actuaries. Milliman's advice is not intended to be a substitute for qualified legal or accounting counsel. The signing actuaries are independent of the plan sponsor. We are not aware of any relationship that would impair the objectivity of our work.

Milliman prepared the following information for the actuarial section:

1. Retirees and Beneficiaries Added to and Removed from Benefits – OPEB Program
2. Actuarial Analysis of Financial Experience – OPEB Program
3. Actuary Solvency Test – OPEB Program
4. Schedule of Funding Progress – OPEB Program

LACERA staff prepared the information in Note N – OPEB Program, of the financial section and the Required Supplementary Information, based on information supplied in prior actuarial reports, our July 1, 2021 OPEB actuarial funding valuation, and our forthcoming June 30, 2023 GASB 75 report. Milliman has reviewed the information in Note N for accuracy.

We certify that the assumptions and methods used for funding and financial reporting purposes in the July 1, 2021 OPEB funding valuation meet the parameters set by Actuarial Standards of Practice promulgated by the Actuarial Standards Board (ASB). We are members of the American Academy of Actuaries and have experience in performing valuations for public OPEB programs.

Sincerely,

Robert L. Schmidt, FSA, EA, MAAA
Principal and Consulting Actuary

Janet O. Jennings, ASA, MAAA
Consulting Actuary

RLS/bh

The table below includes a summary of actuarial methods and both demographic and economic assumptions used by LACERA's consulting actuary in performing the actuarial valuation of the OPEB Program.

Method/Assumption	Application
Actuarial Methods and Assumptions	*2019 Pension Plan Experience Study and 2020 OPEB Experience Study* The OPEB actuarial methods and assumptions are recommended by the consulting actuary and adopted by the Board of Retirement. The actuarial assumptions used to determine the liabilities are based on the results of the 2019 Pension Plan Investigation of Experience Study and a separate 2020 OPEB Program Investigation of Experience Study approved by the Board of Retirement in March 2021. Where applicable, the same assumptions are used for the OPEB Program as for the Pension Plan; however, some assumptions developed and applied are unique to the OPEB Program. The assumptions that overlap with the Pension Plan assumptions were reviewed and changed as of June 30, 2019, as a result of the 2019 Pension Plan triennial Investigation of Experience Study approved by the Board of Investments in January 2020. The general wage increase and inflation assumptions were evaluated for the Pension Plan and applied to the OPEB Program. *OPEB Assumptions* The consulting actuary recommended an OPEB-specific investment earnings assumption since investment earnings for the OPEB valuation are based on the expected return from the County's general assets or the expected return from the OPEB Trust. These assets are invested based on the OPEB Trust Investment Policy Statement adopted by the Board of Investments, which applies different asset allocations than the one used for the Pension Plan. The OPEB-specific assumptions, including healthcare plan elections, benefit tier enrollment, and retirement of vested terminated members, were reviewed and updated as a result of the 2020 OPEB Investigation of Experience Study. The updated experience study assumptions were adopted in March 2021 by the Board of Retirement and were applied to the OPEB valuations conducted as of July 1, 2020 and July 1, 2021. See the schedule titled Active Member Valuation Data — OPEB Program for active member valuation information.
Actuarial Cost Method	*Entry Age Normal* Effective with the July 1, 2018 OPEB Funding Valuation, the entry age normal (EAN) actuarial cost method was applied. Under the principles of this method, the actuarial present value of the projected benefits of each member included in the valuation is allocated as a level percentage of the member's projected compensation between entry age and assumed exit (until maximum retirement age). For members who transferred between retirement benefit plans, entry age is based on original entry into the system. *Unfunded Actuarial Accrued Liability (UAAL)* The portion of this actuarial present value allocated to a valuation year is called the normal cost (NC). The portion of this actuarial present value not provided for at a valuation date by the sum of a) the actuarial value of the assets and b) the actuarial present value of future normal costs is called the Unfunded Actuarial Accrued Liability (UAAL). The UAAL is amortized as a level percentage of the projected salaries of the active members, both present and future, covered by the LACERA retirement benefits plan over a 30-year period from the valuation date.

Method/Assumption	Application
Actuarial Asset Valuation Method	*Market Value*
Investment Return	*Annual Rate of 6.0 Percent for Prefunding Agents and 2.3 Percent for Other Agents* The investment earnings assumption for agents that are prefunding through the OPEB Trust is the OPEB Trust's expected return of 6.0 percent. The investment earnings assumption for agents that are not prefunding through the OPEB Trust is the County general fund's expected return of 2.3 percent. Besides projecting the OPEB Trust's investment return, this assumption is also used to calculate the Actuarial Accrued Liability (AAL). *GASB 75 Discount Rate Calculation* The reporting methodology change from cost-sharing to agent plan structure began with the July 1, 2018 OPEB Funding Valuation. The investment earnings assumption approach for this funding valuation is intended to reflect the earnings associated with each agent. The separate GASB 75 disclosure report, which provides information for employers and is different from this funding valuation, follows a prescribed discount rate.
Inflation Rate	*Annual Rate of 2.75 Percent* This rate was adopted beginning with the July 1, 2016 OPEB Valuation.
Amortization Method	*30-Year Amortization* Level percentage of projected salaries of the active members, both present and future, over a 30-year period. This is commonly referred to as a rolling 30-year amortization method and does not cover interest on the UAAL. This assumption was adopted beginning with the July 1, 2006 OPEB Valuation.

Healthcare Cost Trend Rates

	FY 2022 to FY 2023	FY 2023 to FY 2024	Ultimate (Grading from June 30, 2022 to June 30, 2105)
LACERA Medical Under 65	(0.40)%	5.40%	4.20%
LACERA Medical Over 65	0.30%	5.20%	4.20%
Part B Premiums	10.50%	1.50%	4.00%
Dental/Vision	(1.20)%	3.10%	3.60%
Weighted Average Trend	1.26%	4.62%	4.13%

Method/Assumption	Application
Claim Costs	*Varies By Program Tier* Claim cost data is reviewed for the membership in aggregate, including members of all employers, regardless of their participation in the OPEB Trust. The claim cost assumptions were updated as part of the July 1, 2021 Valuation and differ by Tier 1 and Tier 2. Retiree Healthcare Benefits Program — Tier 1 is for members who were hired before July 1, 2014. Members who were hired after June 30, 2014 are in Retiree Healthcare Benefits Program — Tier 2. The tiers have different maximum employer contributions, which impacts medical plan election patterns, resulting in different claim costs. Refer to Table A-21 of the July 1, 2021 OPEB Valuation Report for more details.
Retirement	*Minimum Retirement Ages* Members in General Plans A through D may retire at age 50 with 10 years of service, or any age with 30 years of service, or age 70 regardless of the number of years of service. General Plan G members are eligible to retire at age 52 with five years of service, or age 70 regardless of the number of years of service. Non-contributory Plan E members may retire at age 55 with 10 years of service. Members of Safety Plans A and B may retire at age 50 with 10 years of service, or any age with 20 years of service. Safety Plan C members are eligible to retire at age 50 with five years of County service.
Expectation of Life After Retirement[1,2]	*2019 SOA Mortality Tables for Public Employees* The same post-retirement mortality rates are used in the valuation for active members after termination, members retired for service, and beneficiaries. Future beneficiaries are assumed to have the same mortality as a general member of the opposite gender. The mortality tables used are listed below. Age-based rates are illustrated in the July 1, 2021 OPEB Valuation Report. These rates were adopted June 30, 2019. **Males:** **General Members:** PubG-2010 Healthy Retiree Mortality Table for Males, with MP-2014 Ultimate Projection Scale. **Safety Members:** PubS-2010 Healthy Retiree Mortality Table for Males multiplied by 85 percent, with MP-2014 Ultimate Projection Scale. **Females:** **General Members:** PubG-2010 Healthy Retiree Mortality Table for Females multiplied by 110 percent, with MP-2014 Ultimate Projection Scale. **Safety Members:** PubS-2010 Healthy Retiree Mortality Table for Females, with MP-2014 Ultimate Projection Scale.

Method/Assumption	Application
Expectation of Life After Disability[1,2]	*2019 SOA Mortality Tables for Public Employees* For disabled members, the mortality tables used are listed below while age-based rates are illustrated in the July 1, 2021 OPEB Valuation Report. These rates were adopted June 30, 2019. **Males:** **General Members:** Average of PubG-2010 Healthy Retiree Mortality Table for Males and PubG-2010 Disabled Retiree Mortality Table for Males, both projected with MP-2014 Ultimate Projection Scale. **Safety Members:** PubS-2010 Healthy Retiree Mortality Table for Males, with MP-2014 Ultimate Projection Scale. **Females:** **General Members:** Average of PubG-2010 Healthy Retiree Mortality Table for Females and PubG-2010 Disabled Retiree Mortality Table for Females, both projected with MP-2014 Ultimate Projection Scale. **Safety Members:** PubS-2010 Healthy Retiree Mortality Table for Females, with MP-2014 Ultimate Projection Scale.
Retiree Medical and Dental/Vision Eligibility and Enrollment Assumptions	*Various Rates* Any retired or vested terminated members who have not elected a refund of their member pension contributions and who will receive a retirement benefit other than a refund are eligible for retiree medical and dental/ vision enrollment. Refer to Tables A-14 through A-19 of the July 1, 2021 OPEB Valuation Report for more details regarding the enrollment assumptions.
Other Employment Termination	*Withdrawal of Contributions and Probability of Occurrence* Terminating employees may withdraw their contributions immediately upon termination of employment and forfeit the right to further retirement, medical, dental/vision, and death benefits, or they may leave their contributions on deposit with LACERA. Former contributing members whose contributions are on deposit may later elect to receive a refund, return to work, or remain inactive until becoming eligible to receive a retirement benefit under either LACERA or a reciprocal retirement plan. All terminating members who are not eligible for vested benefits are assumed to withdraw their contributions immediately. All terminating members are assumed not to be rehired. The Probability of Occurrence schedule included in this Actuarial Section provides a summary of probability of retirement and withdrawal for sample ages. Although these assumptions were developed for the Retirement Benefits Plan, they apply to the OPEB Program participant population.

[1]The PUB-2010 mortality tables were published by the Society of Actuaries (SOA's) Retirement Plans Experience Committee (RPEC) in January 2019. The data studied includes approximately 46 million life years of exposure and 580,000 deaths from public pension plans over the period 2008 to 2013. The PUB-2010 mortality tables include separate tables for general and safety members, and for each of those classes of members includes separate mortality tables for healthy annuitants, disabled retirees, and employees.

[2]The SOA's Mortality Improvement Scale MP-2014 (published in October 2014) is used to adjust the PUB-2010 mortality tables to account for anticipated changes in mortality rates in future years. In general, it is assumed that mortality rates will improve (implying longer lifetimes) in the future due partially to improvements in healthcare.

Schedule of Funding Progress — OPEB Program

(Dollars in Thousands)

Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) (b)	Unfunded Actuarial Accrued Liability (UAAL) (b-a)	Funded Ratio (a/b)	Covered Employee Payroll (c)	UAAL as a Percentage of Covered Employee Payroll [(b-a)/c]

[1]Trend information: Schedule will ultimately show data for 10 years. Additional years will be displayed as they become available prospectively.
[2]Includes vested former members.
[3]The resulting OPEB valuation report was the first annual valuation prepared in accordance with the revised OPEB Actuarial Valuation and Audit Policy Statement, which the LACERA Board of Retirement approved in October 2017, to meet the plan sponsors' GASB Statement Number 75 financial statement reporting requirements.

Actuarial Analysis of Financial Experience — OPEB Program

(Dollars in Millions)

	Valuation as of July 1							
	2021	2020	2019[1]	2018	2017[2]	2016	2014	2012
Prior Unfunded Actuarial Accrued Liability	$19,810	$19,514	$20,126	$25,558	$25,352	$28,063	$26,953	$24,031
Expected Increase/(Decrease) from Prior Valuation	747	911	1,005	1,170	1,462	3,240	3,873	3,771
Claim Costs Greater/(Less) than Expected[3]	(1,202)	(1,000)	(1,589)	(1,067)	(1,213)	(2,322)	(5,471)	(3,864)
Change in Assumptions[4]	0	314	(35)	(6,936)	—	(3,385)	3,238	3,423
Asset Return Less/(Greater) than Expected	(352)	76	1	(28)	(54)	78	(484)	N/A
All Other Experience[5]	(152)	(5)	6	1,429	11	(322)	(46)	(408)
Ending Unfunded Actuarial Accrued Liability	**$18,851**	**$19,810**	**$19,514**	**$20,126**	**$25,558**	**$25,352**	**$28,063**	**$26,953**

[1]Beginning with the 2019 report, subsequent OPEB valuation reports will exclude the excise tax.
[2]The resulting OPEB valuation report was the first annual valuation prepared in accordance with the revised OPEB Actuarial Valuation and Audit Policy Statement, which the LACERA Board of Retirement approved in October 2017, to meet the plan sponsors' GASB Statement Number 75 financial statement reporting requirements.
[3]Includes the medical care claim cost trend assumption change.
[4]In 2016, this amount includes the impact from implementing the Tier 2 Retiree Healthcare Benefits Plan.
[5]In 2018, this amount is primarily due to the impact of the excise tax.

Staying the Course

Maintaining one's bearing (the direction from one's location to a distant point given in degrees from north) requires a compass, vigilance, and making adjustments along the way.

The first magnetic compass was invented in China around 200-300 BCE and was used for mystical purposes and the art of Feng Shui. Naturally magnetic lodestone was shaped into a spoon and placed onto a bronze plate, where the lodestone consistently rotated to a north-south axis.

Introduction

The objective of the Statistical Section is to provide historical perspective, context, and detail to assist in utilizing the Basic Financial Statements, Notes to the Basic Financial Statements, and Required Supplementary Information to understand and assess the status of the Pension Plan and OPEB Program administered by LACERA as of the fiscal year-end. Statistical data is maintained within the Member Workspace (Workspace) platform. Workspace is a sophisticated in-house data management system in which LACERA actively maintains member-specific information, comprehensive plan membership records, and related member-specific documents. This section reports the most current membership status information for each type of member (general, safety, active, retired, etc.).

The statistical information provided here is divided into Financial Trends Information and Operating Information.

Financial Trends Information is intended to assist readers in understanding how LACERA's financial position has changed over time:

- *Changes in Fiduciary Net Position — Pension Plan and Changes in Fiduciary Net Position — OPEB Trust* present additions by source, deductions by type, and the total change in Fiduciary Net Position for each year.
- *Pension Benefit Expenses by Type* presents retirement benefits, refunds of contributions, and lump-sum death benefits, as deductions by type of benefit (e.g., service and disability retirement from general and safety plans).

Operating Information provides contextual information about LACERA's operations and membership to assist readers in using financial statement information to comprehend and evaluate LACERA's fiscal condition:

- *Active Members* provides membership statistics for active vested and active non-vested members. In addition, members who are not considered retired are included as terminated members and defined as vested members with deferred benefits and non-vested members with inactive benefits.
- *Retired Members by Type of Pension Benefit and Retired Members by Type of OPEB Benefit* presents benefit information for the current year by dollar level and benefit type.
- *Schedule of Average Pension Benefit Payments* presents the average monthly Pension Plan benefit, average final salary, and number of retired members, organized in five-year increments of credited service.
- *Active Members and Participating Pension Employers* presents the employers and their corresponding employees (active members) who are or may become eligible for Pension Plan benefits.
- *Retired Members of Participating OPEB Employers* presents the number of members enrolled in medical and/or dental/vision benefits.
- *Employer Contribution Rates* shown by employer for the Pension Plan is provided as additional information.
- *Supplemental Targeted Adjustment for Retirees (STAR) Program Costs* trends the Program's costs through the current calendar year-end.

[1]Beginning in 2016:

Contributions: The Trust reflects both prefunding contributions actually made to the OPEB Trust as well as additions to Fiduciary Net Position, including amounts for OPEB as the benefits come due that will not be reimbursed to the employers using OPEB plan assets.

Deductions: The Trust includes all benefit payments whether made through the Trust or by employers as OPEB benefits come due (per paragraph 28a and 31 of GASB Statement Number 74).

[1] Type of Retirement:
A: Service Retiree
B: Disability Retiree
C: Beneficiary/Continuant/Survivor

[2] Retirement Option Selected:
Unmodified: For Plans A–D and G, beneficiary receives 65 percent of the member's allowance (60 percent if the member retired before June 4, 2002); for Plan E, beneficiary receives 55 percent of member's allowance (50 percent if the member retired before June 4, 2002).

The following options reduce the member's monthly benefit:
Unmodified Plus: For all Plans (A–G), member's allowance is reduced to pay an increased continuing allowance to an eligible surviving spouse/partner.
Option 1: Beneficiary receives lump sum of member's unused contributions.
Option 2: Beneficiary receives 100 percent of member's reduced monthly benefit.
Option 3: Beneficiary receives 50 percent of member's reduced monthly benefit.
Option 4: Beneficiary(ies) receives percentage of member's reduced monthly benefit as designated by member.

[1]Contribution rates are scheduled to be effective for the fiscal year July 1 to June 30. However, Section 31454 of CERL requires the County Board of Supervisors to adjust contribution rates in accordance with LACERA's recommendations no later than 90 days following the beginning of the immediately succeeding fiscal year. Adjustments must be made effective July 1, or thereafter, but not later than September 29 of each year.

[2]As a result of PEPRA implementation, effective January 1, 2013.

[1]Rates applicable to Little Lake Cemetery District are limited to Plan D.

[2]Rates applicable to the Local Agency Formation Commission for the County of Los Angeles are limited to Plans D, E, and G. As of November 2016, there were no participating active members under Plan E.

[3]Rates applicable to the Los Angeles County Office of Education are limited to Plan A. As of June 2012, there were no participating active members.

[4]Contribution rates are scheduled to be effective for the fiscal year July 1 to June 30. However, Section 31454 of CERL requires the County Board of Supervisors to adjust contribution rates in accordance with LACERA's recommendations no later than 90 days following the beginning of the immediately succeeding fiscal year. Adjustments must be made effective July 1, or thereafter, but not later than September 29 of each year.

[5]Rates effective January 1, 2013, were a result of PEPRA implementation.

Supplemental Targeted Adjustment for Retirees (STAR) Program Costs — Pension Plan

The STAR Program is administered on a calendar-year basis. The chart below represents the STAR Program costs for the last 10 years.
